

# Installation Guide

## IMPORTANT NOTICE

**Before installing any new extension to your production website, you have to respect the following steps:**

- 1. Test the extension on a (recent) pre-production version of your website.**
- 2. If everything is alright on your preprod version: Create a backup of your production website**
- 3. Install the extension on your website.**

---

**Installation might cause issues because of specific server configuration, third-part installed modules, custom themes, core surcharges, etc ... That's why you must know what you are doing, and you must be able to rollback in case of problems. If you are not sure what to do, we advise you to order our Installation services, or ask a professional to install the extension for you.**

# HOW TO INSTALL THE EXTENSION

## Method 1:

```
composer require mageguide/skroutz-clean  
php bin/magento module:enable MageGuide_Skroutz --clear-static-content  
php bin/magento setup:upgrade  
php bin/magento cache:clean
```

## Method 2:

Unzip the extension inside your  
public\_html magento installation directory.
