

ADMIN MENU & CONFIG SEARCH

User Guide Version 2.0.0

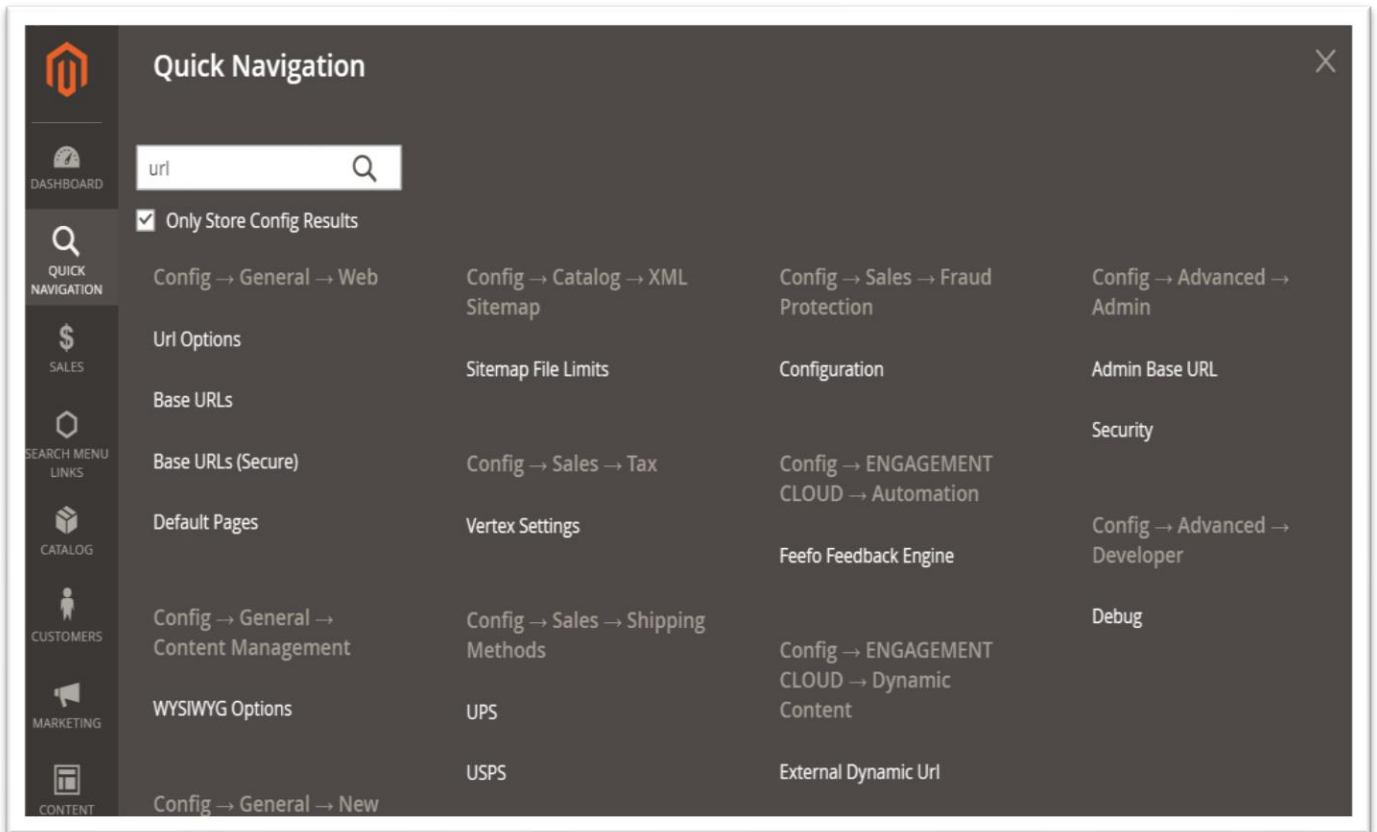

After successful installation, you will see a new menu item “Quick Navigation”. Since version 2.0.0 we have added an option to search through **store configuration links** as well. By default, the extension searches for the navigation links.

Click the check box “Only Store Config Results” to limit your search to store configuration. Matched results include section, group and its element names. The results returned are corresponding to the user role. Please see the screenshots below.

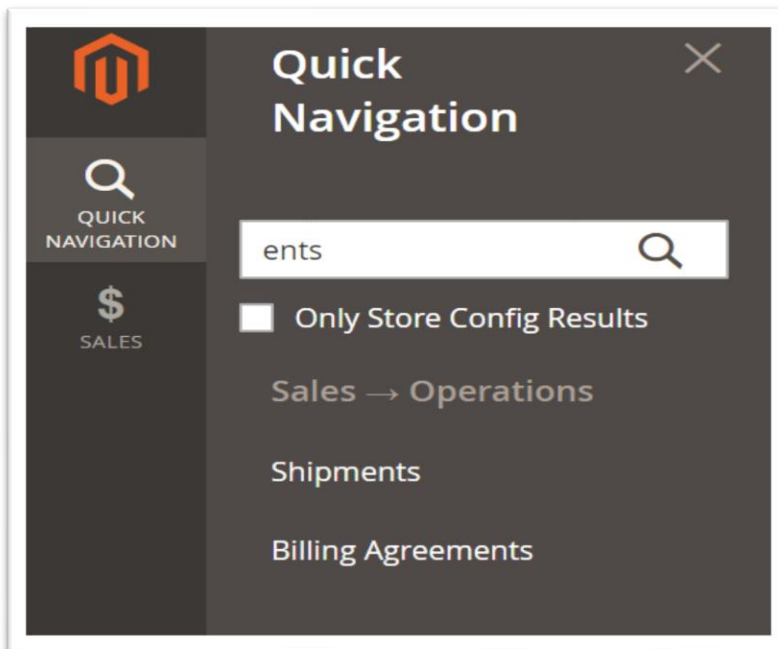

[User with the admin role and has access to all the resources](#)

User with the admin role and has access to all store config sections

User with sales role and has access only to sales resources

You can assign permission to *Quick Navigation* under Permissions -> user roles

The screenshot displays a user role configuration interface. On the left, under the heading "ROLE INFORMATION", there are three sections: "Role Info", "Role Resources" (which is highlighted with an orange vertical bar), and "Role Users". The main area is titled "Roles Resources" and features a "Resource Access" dropdown menu set to "Custom". Below this, a tree view of resources is shown. The "Resources" section is expanded, and the "Quick Navigation" resource is highlighted with a red rectangular box. The tree view includes the following items:

- Dashboard
- Search All Menu Items
- Search Form
- Quick Navigation (highlighted)
- Search Form
- Analytics
- API
- Sales
- Operations
- Orders
 - Actions
 - Create
 - View
 - Send Order Email
 - Reorder
 - Edit
 - Cancel
 - Accept or Deny Payment
