General

- In the **Enable** field, you can choose yes/no to enable/disable extension.
- In the **Redirect Page** field, you can choose redirect to page after authentication login.
- In the **Email Sender** field, you can person send mail.

Facebook, Twitter, Instagram, Google, LinkedIn Configuration :

- In the **Enable** field, you can choose yes/no to enable/disable button.
- In the **Client Id** field, you can put client id register in app.
- In the **Client Secret** field, you can put client secret register in app.
- In the **Send Password to Customer** field, you can choose yes/no to send password in email.
- In the **Sort Order** field, you can set order button.
- In the **Callback url** field, URL call back you set in apps, Example :
www.abc.com/magehitsociallogin/facebook/connect .

And clear the cache when you have any changes for our extension.

+ How to install extension :

- Unpack the extension ZIP file on your computer and connect ftp/sftp to server, then upload extension package to the corresponding root folder of your Magento installation.

- Connect SSH to server and run command:

php bin/magento module:enable Magehit_Core Magehit_Sociallogin

php bin/magento setup:upgrade

rm -rf var/cache/ var/generation/ var/page_cache/ var/view_preprocessed/

- And clear cache in backend.

+ How to register app for social login extension:

- Facebook : <https://developers.facebook.com/apps/>

You must register developers app and create app then settings same as :

The screenshot shows the Facebook App Settings page for an application named 'Login'. The left sidebar contains navigation options: Dashboard, Settings (Basic, Advanced), Roles, Alerts, App Review, PRODUCTS, Facebook Login, and + Add Product. The main content area displays the following settings:

- App ID: 718141501677039
- App Secret: [Redacted]
- Display Name: Login
- Namespace: [Empty]
- App Domains: [Empty]
- Contact Email: admin@gmail.com
- Privacy Policy URL: Privacy policy for Login dialog and App Details
- Terms of Service URL: Terms of Service for Login dialog and App Details
- App Icon: [Placeholder image, 1024 x 1024]
- Category: Apps for Pages

And set callback url :

The screenshot shows the Facebook Client OAuth Settings page for the same application. The left sidebar is identical to the previous screenshot. The main content area displays the following settings:

- Client OAuth Login: Enables the standard OAuth client token flow. Secure your application and prevent abuse by locking down which token redirect URIs are allowed with the options below. Disable globally if not used. [?]
- Web OAuth Login: Enables web based OAuth client login for building custom login flows. [?]
- Force Web OAuth Reauthentication: When on, prompts people to enter their Facebook password in order to log in on the web. [?]
- Embedded Browser OAuth Login: Enables browser control redirect uri for OAuth client login. [?]
- Valid OAuth redirect URIs: [?]
- Login from Devices: Enables the OAuth client login flow for devices like a smart TV [?]

And Copy App Id and App secret put to configuration.

- Twitter : <https://apps.twitter.com/>

You must register developers app and create app then settings same as :

Application Details

Name *

Your application name. This is used to attribute the source of a tweet and in user-facing authorization screens. 32 characters max.

Description *

Your application description, which will be shown in user-facing authorization screens. Between 10 and 200 characters max.

Website *

Your application's publicly accessible home page, where users can go to download, make use of, or find out more information about your application. This fully-qualified URL is used in the source attribution for tweets created by your application and will be shown in user-facing authorization screens. (If you don't have a URL yet, just put a placeholder here but remember to change it later.)

Callback URL

Where should we return after successfully authenticating? [OAuth 1.0a](#) applications should explicitly specify their `oauth_callback` URL on the request token step, regardless of the value given here. To restrict your application from using callbacks, leave this field blank.

Privacy Policy URL

The URL for your application or service's privacy policy. The URL will be shared with users authorizing this application.

Terms of Service URL

The URL for your application or service's terms of service. The URL will be shared with users authorizing this application.

- Enable Callback Locking (It is recommended to enable callback locking to ensure apps cannot overwrite the callback url)
- Allow this application to be used to [Sign in with Twitter](#)

Save and choose tab "Keys and Access Tokens" to copy api key and api secret put to configuration.

Application Settings

Keep the "Consumer Secret" a secret. This key should never be human-readable in your application.

Consumer Key (API Key)	qREnSnuqDhEJ3JaJlv9r9xY3o
Consumer Secret (API Secret)	gq2jf8N1pV79llW98XH7T8el34i1ABLgNErVAjsHkxRPZVlgY
Access Level	Read and write (modify app permissions)
Owner	admin
Owner ID	2284952472

Application Actions

Application Name: LoginApp

Do not use **Instagram**, **IG**, **insta** or **gram** in your app name. Make sure to adhere to the [API Terms of Use and Brand Guidelines](#).

Description: login app for magento 2

Company Name: magehit

Website URL: http://magento2extensions.a2hosted.com/mage2/

Privacy Policy URL:

Contact email: admin@gmail.com

An email that Instagram can use to get in touch with you. Please specify a valid email address to be notified of important information about your app.

Update Client

Cancel

Save and copy api key and api secret put to configuration.

- Google, Youtube : <https://console.developers.google.com/apis/credentials?project=weighty-diagram-156504>

Create credentials -> OAuth client ID -> Web application

Then settings same as :

Client ID for Web application

Client ID	756011181206-4523rbdgj54t2s4t8q2v1rduon1q7dhu.apps.googleusercontent.com
Client secret	DHcUv5gdPCZTNnoL0LeaEaIc
Creation date	Jan 23, 2017, 11:41:58 AM

Name

Web client 1

Restrictions

Enter JavaScript origins, redirect URIs, or both

Authorized JavaScript origins

For use with requests from a browser. This is the origin URI of the client application. It can't contain a wildcard (`http://*.example.com`) or a path (`http://example.com/subdir`). If you're using a nonstandard port, you must include it in the origin URI.

`http://www.example.com`

Authorized redirect URIs

For use with requests from a web server. This is the path in your application that users are redirected to after they have authenticated with Google. The path will be appended with the authorization code for access. Must have a protocol. Cannot contain URL fragments or relative paths. Cannot be a public IP address.

`http://magento2extensions.a2hosted.com/mage2/magehitsociallogin/google/connect/` ×

`http://www.example.com/oauth2callback`

Save

Cancel

Save and copy api key and api secret put to configuration.
