

LIKEtoB.UY

for Magento® 2

User Guide

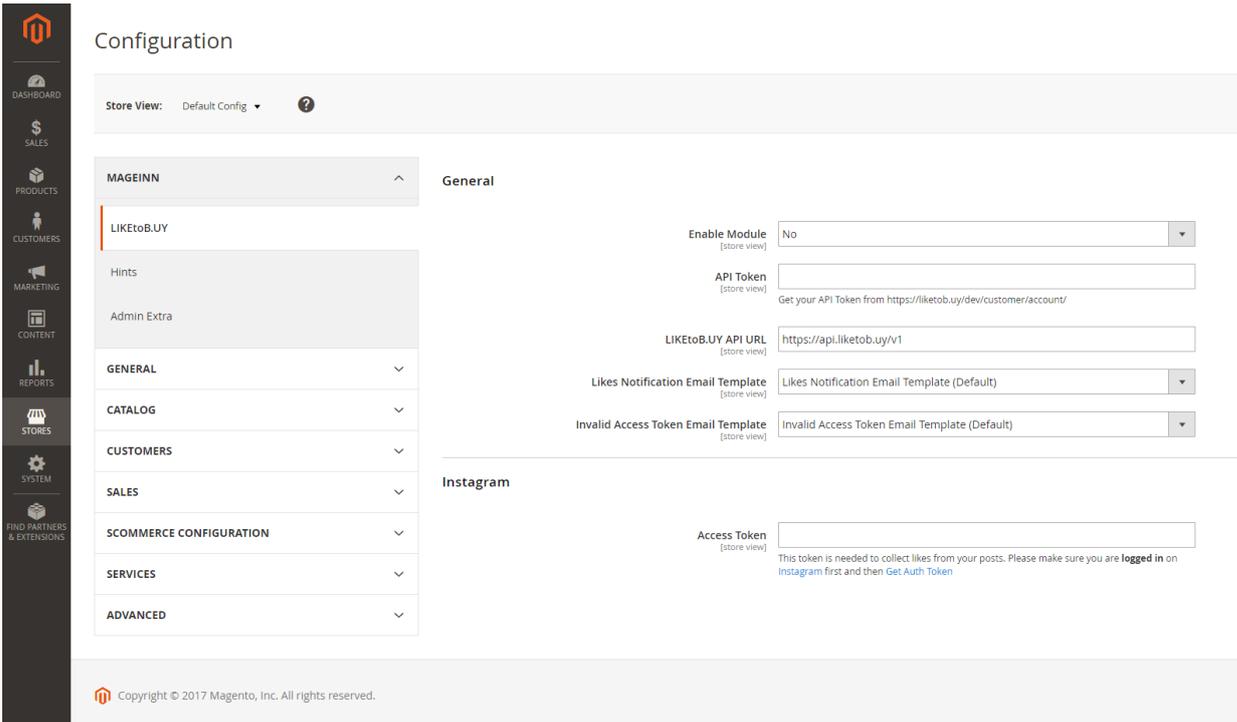

1. Configuration

To enable module go to “**Stores -> Configuration -> Mageinn -> LIKEtoB.UY**”.

There are 5 settings:

1. **Enable Module** – switches module on/off
2. **API Token** – Get your API Token from <https://liketob.uy/dev/customer/account/>
3. **LIKEtoB.UY API URL** – Leave “as is”
4. **Likes Notification Email Template** – Select a template for likes notifications
5. **Invalid Access Token Email Template** – Select template for invalid token notifications
6. **Access Token** - This is needed to collect likes from your posts. Please make sure you are logged in on Instagram first and then click on “Get Auth Token” link.

Set the above fields and click “Save Config” button to save configuration.

The screenshot shows the 'Configuration' page for the 'LIKEtoB.UY' module. The left sidebar contains navigation icons for Dashboard, Sales, Products, Customers, Marketing, Content, Reports, Stores, System, and Find Partners & Extensions. The main content area is titled 'Configuration' and shows the 'Store View' as 'Default Config'. The 'MAGEINN' section is expanded to show 'LIKEtoB.UY' under the 'General' tab. The configuration fields are as follows:

- Enable Module**: No
- API Token**: [Empty field] (Note: Get your API Token from <https://liketob.uy/dev/customer/account/>)
- LIKEtoB.UY API URL**: <https://api.liketob.uy/v1>
- Likes Notification Email Template**: Likes Notification Email Template (Default)
- Invalid Access Token Email Template**: Invalid Access Token Email Template (Default)

Below these fields is the 'Instagram' section with the following field:

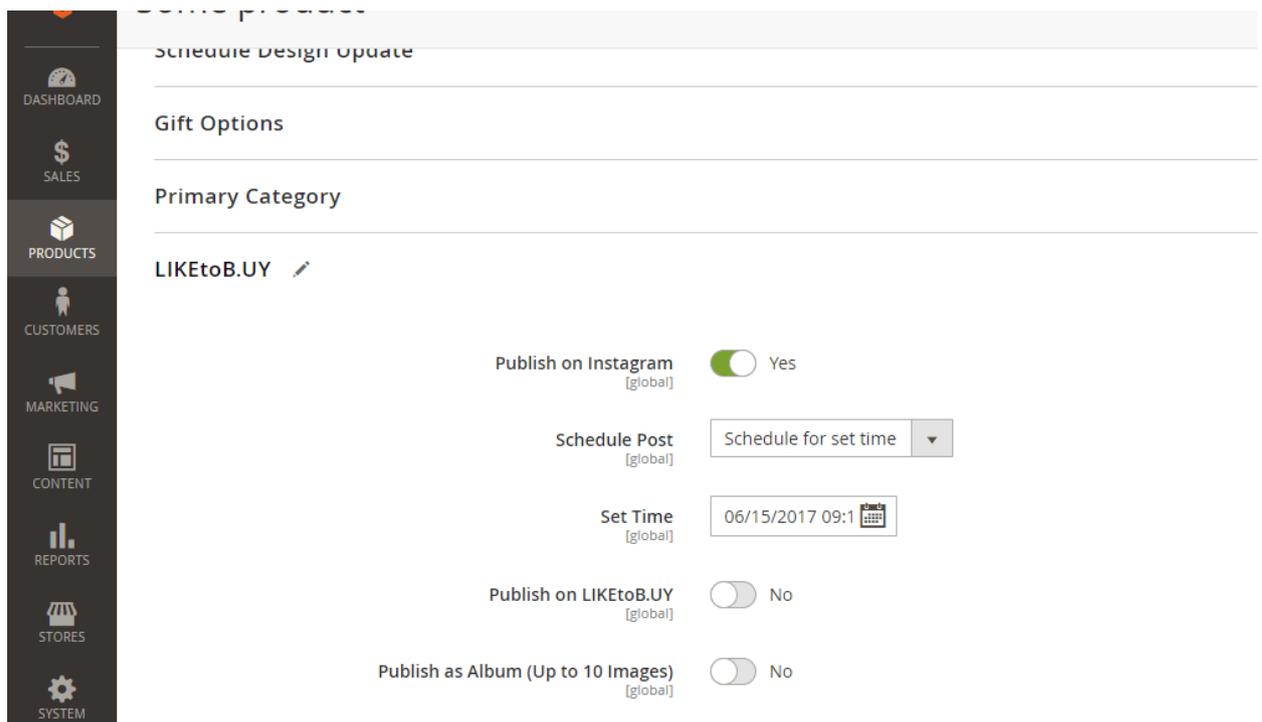

- Access Token**: [Empty field] (Note: This token is needed to collect likes from your posts. Please make sure you are **logged in** on Instagram first and then **Get Auth Token**)

At the bottom of the page, there is a copyright notice: Copyright © 2017 Magento, Inc. All rights reserved.

Module Configuration Screen

2. Creating Instagram Post

Every product type has a new tab called “**LIKEtoB.UY**” if the module is enabled from the configuration.

Product Edit/Create Screen

Module allows you to publish your product directly on Instagram and will send a notification email if your customers like the published post.

There are 5 settings available under this tab:

1. **Publish on Instagram** – Switches Instagram publishing on/off.
2. **Schedule Post** – allows you to choose the posting mode: either live or scheduled.
3. **Set Time** – if the previous setting is set to “Schedule for set time” then this option will allow you to set specific time for your post to be published.

4. **Publish on LIKEtoB.UY** – Flag controls whether your post will also be published on <http://liketob.uy> portal or not.
5. **Publish as Album (Up to 10 Images)** – If you have more than 1 image and you want your post to be published as album, then switch it to “Yes”.

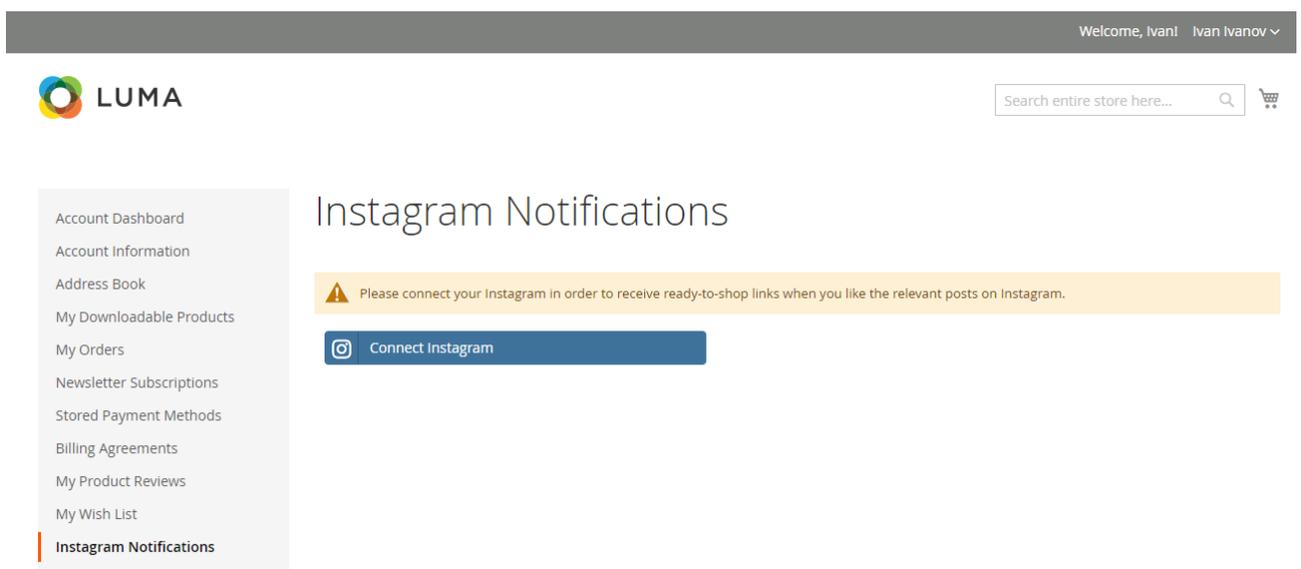

NOTE: Please make sure your images are publicly accessible otherwise they won't get published on Instagram.

3. Frontend Notification Settings & Instagram Linking

In order for your customers to receive ready-to-shop links when they like relevant posts on Instagram they would need to connect their Instagram account. They can do it directly from “**My Account -> Instagram Notificaitons**” menu.

Mageinn_Social module which is shipped with **LIKEtoB.UY** must be enabled and Instagram integration configured under “**Stores -> Configuration -> Mageinn -> Social Login -> Instagram**”.

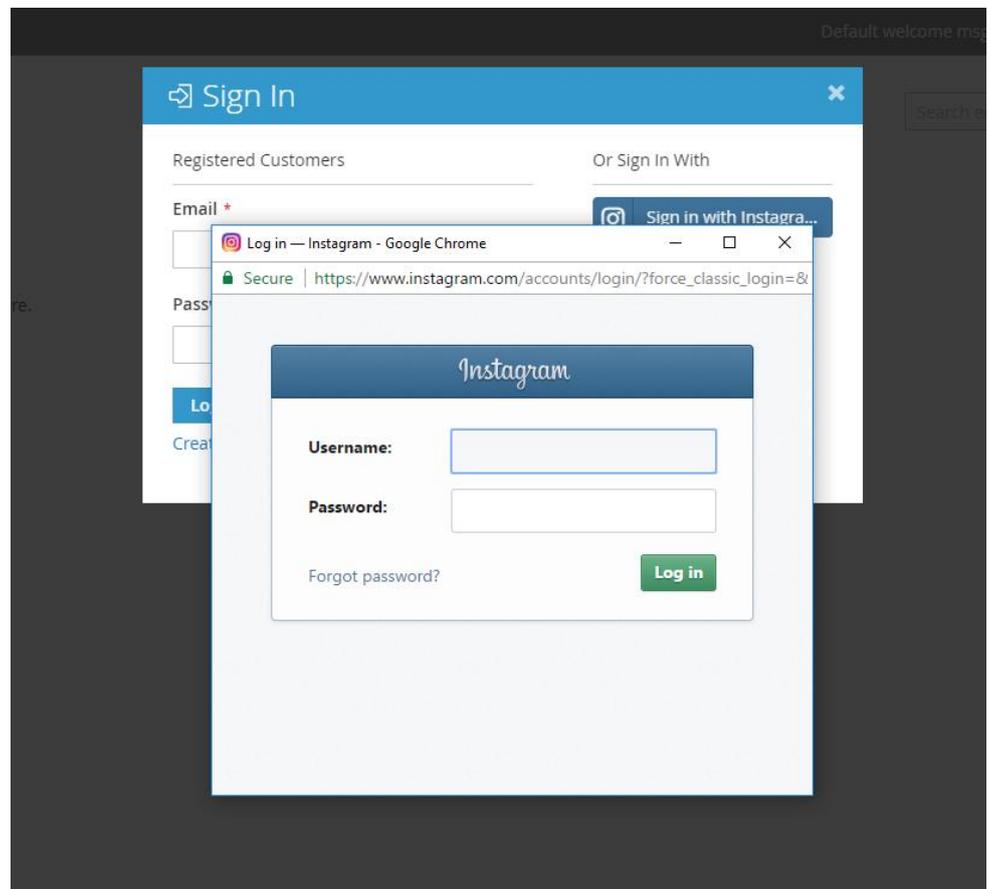

It is also possible to configure how often to receive notifications with posts liked on Instagram.

The screenshot shows the LUMA Customer Account interface. At the top right, it says "Welcome, Ivan! Ivan Ivanov". Below the LUMA logo is a search bar and a shopping cart icon. On the left is a navigation menu with items like "Account Dashboard", "Account Information", "Address Book", "My Downloadable Products", "My Orders", "Newsletter Subscriptions", "Stored Payment Methods", "Billing Agreements", "My Product Reviews", "My Wish List", and "Instagram Notifications" (which is highlighted). The main content area is titled "Instagram Notifications" and features a yellow warning banner that reads: "Please connect your Instagram in order to receive ready-to-shop links when you like the relevant posts on Instagram." Below the banner is a blue button with the Instagram logo and the text "Connect Instagram".

Customer Account Screen

Mageinn_Social will also allow your customers to login/register using social media accounts: **Instagram, Twitter, Facebook, VK** and others. We strongly recommend using this module with at least Instagram integration enabled.

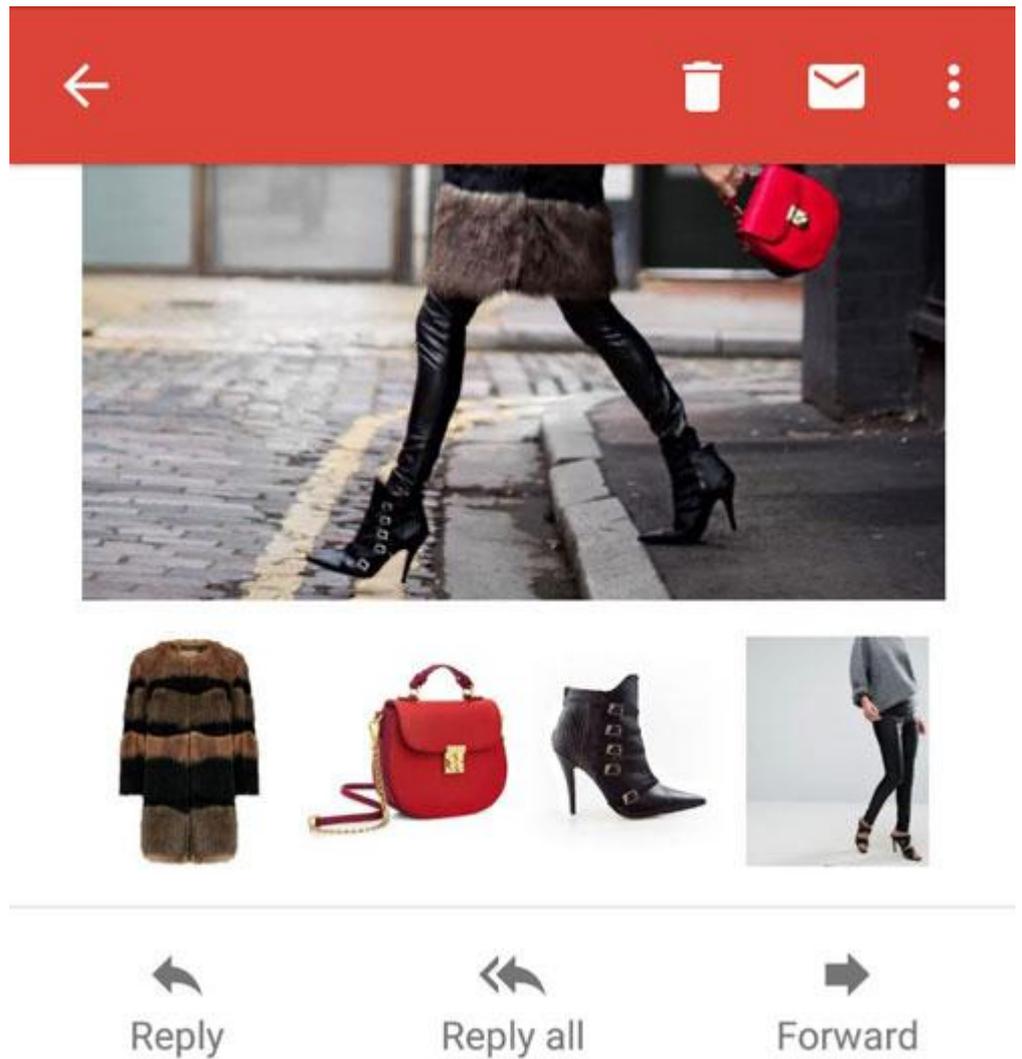

Social Login with Instagram

4. Notification E-mail

Since Instagram only gives you one clickable link, we created a feature called "**Like & Email**" that makes it easy to shop your Instagram feed & helps turn engaged customers into paying ones. It gives your community an immediate way to engage.

So, once your customers link their Instagram account they will start receiving email notifications with "ready-to-shop" links similar to the one on the screenshot below.

You can specify as many items as you want for your main product under either "Related Products" tab or "Associated Products" tab if you create a complex product, for example "Bundle Product".

Notification E-mail with product links

5. Enjoy It

If you have any issues with the configuration or the module itself please raise a support ticket [here](#).
