Introduction

Promotional codes are an effective way to boost your business in the revenue aspect and the marketing aspect. Coupon codes are also a common and affordable way to get new people on your website. And with new customers comes a boost in brand awareness, your coupons will also reach many more people who are your potential customers. Magenest Coupon Code Listing extension comes with interesting features, it allows you to control how long the deal lasts, limits the use of a coupon per code or per user... Let's boost your sales and give your business a good push.

Highlight Features

For Admin

- Filter attributes in cart price rules to display external coupon codes.
- Enable/Disable the coupon code list.
- Set up coupon information fields to be displayed on the storefront.

For Customer

- Show coupon code list at the view cart page and checkout on the storefront to save the customer from the effort of searching for a suitable coupon code
- Coupon code will be automatically disabled after it expires.
- Customers can use coupon codes without having to enter them manually.

System Requirements

Your store should be running on Magento 2 version 2.1.x; 2.2.x; 2.3.x.

Configuration

 In order to configure the Coupon Code module, go to **Store > Configuration > Magenest > Coupon Code**.

Coupon listing settings

- **Enable Coupon Listing:** Select **Yes** to enable the coupon code list at the checkout page for customers
- **Display Fields:** Select the coupon information fields to display on the storefront.

 **Note:** You should select at least two options: **Coupon Code** and **Description**.

Coupon rules settings

+ The coupon code listing is displayed based on the configuration that the Admin had set in the Cart Price Rules.

Note: The settings here are only applicable if the Coupon field in the Cart Price Rule setting was configured as in the image below

- **Coupon:** Specific Coupon
- **Coupon Code:** Enter your discount code. Please note that you **MUST NOT** select *Use Auto Generation*.

+ In the **Coupon rules** settings block

- **Website:** Choose **Yes** to enable the Coupon Code in the selected Websites.
- **Customer Group:** Choose **Yes** to enable the Coupon Code in the selected Customer Group in the Cart Price Rule. If disabled, the coupon codes will appear for other customer groups.
- **Active:** Choose **Yes** to show only active coupon codes at the checkout.
- **From Date:** Choose **Yes** to show only the active codes from the selected date. If disabled, all the codes, including the expired ones, will be shown in the coupon list.
- **To Date:** Choose **Yes** to show only the active codes to the selected date. If disabled, all the codes, including the program that hasn't started yet, will be shown in the coupon list.
 - **Note:** "From Date" and "To Date" Fields only appear for the Community Edition.
- **Uses Per Coupon:** Choose **Yes** to disable the coupon code if its redemption limit has been exceeded. If disabled, all the codes, including the ones that are no longer applicable, will be shown in the coupon list.
- **Uses Per Customer:** Choose **Yes** to disable the coupon code if its redemption limit per user has been exceeded. If disabled, all the codes, including the ones that are no longer applicable, will be shown in the coupon list.

SERVICES

ADVANCED

Coupon rules settings

The coupon code listing is displayed base on rules in cart price rules that are Active, Websites, Customer Group, Specific coupon, Use Auto Generation, Uses Per Coupon, Uses Per Customer, From Date and To Date attributes.
You can customize the external code display through the above attributes.
However, Attributes are applied by default: Specific coupon and Use Auto Generation (NOT Use).

Website (store view) Yes Use system value
If disable, this field will be display coupon codes from other websites

Customer Group (store view) Yes Use system value
If disable, this field will be display coupon codes from other customer group

Active (store view) Yes Use system value
If disable, this field will be display also inactive coupon codes

From Date (store view) Yes Use system value
If disable, this field will be display coupon codes which have not started yet

To Date (store view) Yes Use system value
If disable, this field will be display coupon codes which out of date

Uses Per Coupon (store view) Yes Use system value
If disable, this field will be display coupon codes which usage limit exceeded

Uses Per Customer (store view) Yes Use system value
If disable, this field will be display coupon codes which usage limit exceeded per customer

Manage Coupon Code

+ In order to set up a coupon code, go to **Marketing > Cart Price Rule > Add New Rule**.

- **Website:** Select the website to display the coupon.
- **Customer Groups:** Select multiple customer groups that can use the coupon.
- **Coupon:** Select Specific Coupon.
- **Coupon Code:** Enter the code. Remember, you **MUST NOT** select Use Auto Generation.
- **Uses per Coupon:** Enter the limit code redemption per coupon (E.g: 1 or 2).
- **Uses Per Customer:** Enter the limit code redemption per customer.
- **From - To:** Select the time range for your promotions. (This field on Magento EE is replaced by **Schedule New Update**, after creating new rules, you can add new schedules for them)
