

Amazon Sales Channel

Updated May 10, 2019

Before you start

All you need to get started is the [Amazon Sales Channel extension](#) installed on your Magento instance and an API Key. You will create all other accounts during onboarding. To integrate and start listing on Amazon, the onboarding process helps you create accounts, map data, and start selling.

Release Notes

We track all new features, fixes for resolved issues, and known issues for every extension release.

See the Magento DevDocs [Amazon Sales Channel](#) for complete release notes, install guide, and update instructions.

Install Guide

The install .zip file includes all modules and `composer.json` for installing to your Magento instance.

1. Log in with your Magento web account.
2. Click the **Marketplace** tab, then click **My Purchases**.
3. Locate and select Amazon Sales Channel.
4. On the extension page, select the version from the drop-down menu.
5. For the component name and version, click **Technical Details**.
6. Click **Download**.
7. Export the contents to your Magento root.
8. See [Install Amazon Sales Channel](#) to complete the install and add an API key for configuration.

User Guide

Learn more about Amazon Sales Channel in the Magento Admin User Guide:

- Magento [Open Source 2.3](#) and [Commerce 2.3](#)
- Magento [Open Source 2.2](#) and [Commerce 2.2](#)
