How to upgrade

Backup

- Backup your Magento code, database before upgrading.
- Remove ProductFeed folder
- In case of customization, you should backup the customized files and modify in newer version.
- Now you remove app/code/Mageplaza/ProductFeed folder. In this step, you can copy override ProductFeed folder but this may cause of compilation issue. That why you should remove it.
- Upload new version
- Upload this package to Magento root directory
- Run command line:

```
php bin/magento setup:upgrade
```

```
php bin/magento setup:static-content:deploy
```
