

Disable Email Notifications for Magento®2

Thank you for purchasing our extension! If you have any questions - feel free to email us magery.themes@gmail.com

Overview

This extension allows to disable specific email notifications in Magento 2 store. It supports both Magento Community and Enterprise Edition versions.

Installation

Unpack the archive. You will be able to find **src** directory in the root folder. Copy contents of the src directory to the root directory of your Magento installation.

Connect via SSH and run the following commands in the root folder:

1. `php bin/magento module:enable Magery_DisableEmails`
2. `php bin/magento setup:upgrade`
3. `php bin/magento cache:clean`

Now the module is enabled in the system and it is ready to be configured and used.

Configuration

In Magento admin navigate to *Stores* → *Configuration* → *Advanced* → *System*.

There you will see a new configuration section **Disable Email Notifications**.

This area contains list of all default email notifications in your Magento installation (see the list below containing the full list of email notification types).

Here you can change notification setting to *Disabled* in order to disable needed email notification type (by default, all notifications are enabled).

It is possible to change settings on different levels (*default/website/store*).

Each configuration field has additional information about notification:

- Default template file (HTML template)
- Module where notification is declared

- Area where email is used (*frontend* or *adminhtml*)
