  - 1.4. [Configure which products shouldn't be shown, if a product is out of stock or a product has no image.](#)
2. [Configuration](#)
3. [Advanced Price Settings](#)

## Key Features

### **Automatically adds/removes products with a currently active "special price"**

The products will be removed from the sale category automatically after the expiration date of the product's sale. You just need to set up a date when the sale ends in the configuration panel.

### **Simple configuration**

This module has a very simple configuration. No specific programming knowledge is required. Everything is easy to use and very understandable.

### **Don't need to add/remove products manually**

Imagine how much time you should spend if hundreds of products needed to be added/removed to/from the sale category every day. With our module Sale Category, you don't need anymore to do it manually. Everything will be done automatically. Install this excellent extension and save hours of your time.

### **Configure which products shouldn't be shown, if a product is out of stock or a product has no image.**

Install the Sale Category extension and the products will be automatically added to the Sale Category as they go on sale and will be removed when the sale ends.

## Configuration

- **Enabled** - to enable the Sale Category extension select "yes".
- **Sale Category** - select the sale category from the list.
- **Display Out of Stock Products** - to display products that are out of stock select "yes".
- **Display Products Only With Images** - to display products only with images select "yes".

### General

<b>Enabled</b> [store view]	Yes
<b>Sale Category</b> [store view]	Default Category / Test Sale
<b>Display Out of Stock Products</b> [store view]	No
<b>Display Products Only With Images</b> [store view]	Yes

## Advanced Price Settings

If you want to add a product into "Sale Category", you should go to the **Catalog Settings > Select a product > Click "Advanced Pricing" > Add Special Price (the Special Price should be lower than Regular Price).**

If you want to add a product to "Sale Category" the Special Price of the product should be lower than Regular Price. Then set up the date when the sale of the product begins and ends. The product will be removed from the Sale Category automatically when the date expires.

Mageside is a team of developers dedicated to Magento installation, support, extension creation and advanced customization. We are good at doing the heavy lifting, and there is no Magento project that is out of scope on a technical basis.

Mageside does full site conversions, Magento 2 upgrades, advanced extension development, deep systems integration and all the other fun stuff. Our code is incredibly clean, we are on first name basis with several of the core devs, and love every opportunity to create another fine expression of ecommerce. If you need the best, let us work on your next project.
