

Installation Guide

for Magento 2.x Extensions

1. [Download](#) the extension's package from your account
2. Log into your Magento server via SSH as a user that has enough permissions to write files in the Magento folders
3. Go to the Magento installation (root) folder:

```
cd <magento_root_folder>
```

4. Create folder 'app/code/MagestypApps/AdvancedBreadcrumbs':

```
mkdir app/code
```

```
mkdir app/code/MagestypApps
```

```
mkdir app/code/MagestypApps/AdvancedBreadcrumbs
```

5. Extract the package's content to the folder.
6. Enable the module with the command below:

```
php bin/magento module:enable MagestypApps_AdvancedBreadcrumbs
```

7. Update the database:

```
php bin/magento setup:upgrade
```

```
php bin/magento cache:flush
```

```
php bin/magento setup:static-content:deploy
```
