

Installation Guide

for Magento 2.x Extensions

1. Log into your Magento server as a user that has enough permissions to write files in the Magento folders.
2. [Download](#) the extension's package from your account on our website:
3. Extract the package's content to the root folder of your Magento setup.
4. Log into your Magento server via SSH.
5. Go to the Magento installation (root) folder:

```
cd <magento_root_folder>
```

6. Enable the module with the command below:

```
php bin/magento module:enable MagestyApps_AdvancedBreadcrumbs
```

7. Update the database:

```
php bin/magento setup:upgrade
```

```
php bin/magento cache:flush
```

```
php bin/magento setup:static-content:deploy
```
