

Flat Rate per Product

# 1. Extension description

**Flat Rate per Product** - extension which optimizing the shipping expenses and to keeping the buyers on your e-store.

A one of a more accurate solution it is the ability to set the flat rate per product. However, you need extended standard functions in Admin Panel. Also is some additional things. For example the ability to set flat rates for some products by default.

Flat Rate per Product extension by MageWorkshop include this functions and have other features.

## **The features Flat rates per Product extension:**

1. To specify a flat rate with shipping method for any products.
2. Compatible flat rates with the different product types.
3. Create flat rates tiers based upon the quantities products in the shopping cart.
4. Create high flat rate or high flat rate with configurable percent in the cart instead of the sum of all rates.
5. To charge the lowest rate instead of the sum of all rates in the shopping cart. To use a different approach to managing flat rates.
6. If flat rates do not specify for some products the extension will use the default.
7. To add multiple service levels (ground, expedited, next day air, etc.).
8. To create special flat rates for additional countries.
9. Ability to migrate from another shopping cart without having to change the way charge for shipping. If you have reasons to change platform further but need keep your shipping strategy.

## 2. Module settings

To configure available methods Admin should go to **Stores -> Configuration -> Sales -> Shipping Methods -> Flat Rate Per Product**

The screenshot shows the 'Configuration' page for the 'Flat Rate Per Product' shipping method. On the left is a navigation menu with categories: GENERAL, CATALOG, CUSTOMERS, SALES, SERVICES, and ADVANCED. The 'SALES' category is expanded to show 'Shipping Methods', which is selected. The main content area is titled 'Flat Rate Per Product' and includes a 'Save Config' button in the top right corner. The configuration fields are as follows:

- Enable:** A dropdown menu set to 'Yes'.
- Title:** A text input field containing 'Shipping Rates Per Product'.
- Rate Calculation:** A dropdown menu set to 'Lowest value'.
- Available Methods:** A table with columns: Country, State, Zip Code, Method Label, Method Code, Rate, and Action. It contains three rows: 'All', 'Afghanistan', and 'United States' (with 'California' selected in the State dropdown). An 'Add' button is located below the table.
- Displayed Error Message:** A text area containing the message: 'This shipping method is currently unavailable. If you would like to ship using this shipping method, please contact us.'
- Show method if not applicable:** A dropdown menu set to 'Yes'.
- Ship to Applicable Countries:** A dropdown menu set to 'Specific Countries'.
- Ship to Specific countries:** A list box containing a scrollable list of countries: Afghanistan, Åland Islands, Albania, Algeria, American Samoa, Andorra, Angola, Anguilla, Antarctica, and Antigua & Barbuda.
- Sort order:** A text input field containing '10'.

At the bottom of the configuration area, there is a 'Free Shipping' option with a radio button.

**Enable** – configuration to Enable or Disable module

**Title** – The title for the shipping method

**Rate Calculation** – The principle by which to choose what price to display on the checkout page.

**Available Methods** – To add shipment methods configured by Country/State/Zip Code

**Displayed Error Message** – If the customer is not eligible for this shipping method, he will see this message as an error

**Ship to Applicable Countries** – To only use this method in certain Countries, select them from the list below this option (**Ship to Specific countries** list)

**Sort Order** – This will change the display order of the shipping method if more than one can be selected (lower is higher with 0 being displayed at the top)

To add available methods to product Admin should go to **Products -> Catalog -> [Choose any product] -> Flat Rate Per Product**. On this page, Admin can add available shipping methods to product and configure them by quantity.

### 3. Testing

All extensions are supported and working properly in version Magento 2.1.7.  
Tested in a standard Magento 2 theme -- Luma.
