Important Notice

MageWorx reserves the right to make corrections, modifications, enhancements, improvements, and other changes to all its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing an order and should verify that this information is complete and up-to-date. All products are sold subject to MageWorx terms and conditions of sale supplied at the time of order acknowledgment.

MageWorx warrants performance of its products to the specifications applicable at the time of sale in accordance with the company's standard warranty. Testing and other quality control techniques are used to the extent MageWorx deems necessary to support this warranty.

MageWorx assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using MageWorx components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

MageWorx does not warrant or represent that any license, either express or implied, is granted under any MageWorx patent right, copyright, mask work right, or other MageWorx intellectual property rights relating to any combination, machine, or process in which MageWorx products or services are used.

Information published by MageWorx regarding third-party products or services does not constitute a license from MageWorx to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from MageWorx under the patents or other intellectual property of MageWorx.

Resale of MageWorx products or services with statements different from or beyond the parameters stated by MageWorx for that product or service voids all express and any implied warranties for the associated MageWorx product or service and is an unfair and deceptive business practice. MageWorx is not responsible or liable for any such statements.

1. Extension Description

Magento Currency Auto Switcher Extension adds the global flexibility to your Online Store. The extension allows you to automatically switch currency based on user location, convert prices to customers' local currencies and more.

GeoIP – automatically detects customers country and city in real time using *Max Mind* technology. The database can easily be updated from the back-end.

Currency Settings – allows to define Country-Currency relations.

Currency Switcher – automatically tracks customer's IP address and switches the default currency. Lets customers pre-select billing and shipping country during the checkout. Locks currency switching ability for certain countries, IP addresses or URLs.

Customer and Order Location Tracking – allows you to track customers geographical location and each orders' geographical origin in real-time.

Auto-Switching Disabling – lets you avoid switching currencies for certain User Agents or certain search engine spiders.

2. Extension Installation

To install the extension, please follow the steps below:

1. Disable the Compilation Mode (if enabled);
2. Log out from the Magento 2 Admin Panel (if logged in);
3. Unpack the content of the Extension folder (depending on your current Magento version) from the package file purchased from Mageworx to your Magento root folder;
4. Log in to the Magento 2 Admin Panel;
5. Go to System – Cache Management section, select Refresh under the All Cache drop-down menu and press the Save Cache Settings (if Cache Control is enabled in Magento);
6. Go to System – Configuration – MageWorx tab – Extensions & Support section. If you see Store & Currency Auto Switcher on the list of installed MageWorx extensions, the installation is done;
7. Re-run the Compilation Mode again (not enable it but re-run).

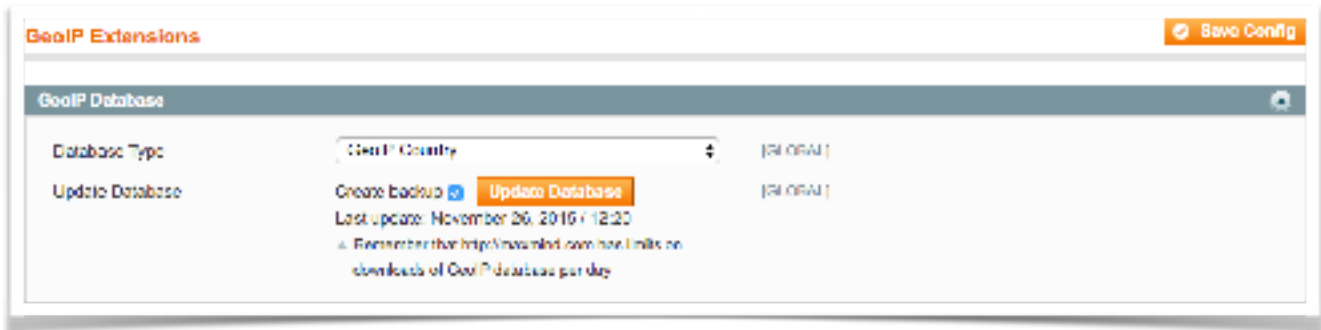

3. General Settings

To ensure the correct performance of the extension, the GeoIP module should be set up.

Jump to *System – Configuration* to start.

GeoIP Configuration

Select *Magento – GeoIP Extension* and open **GeoIP Database** tab:

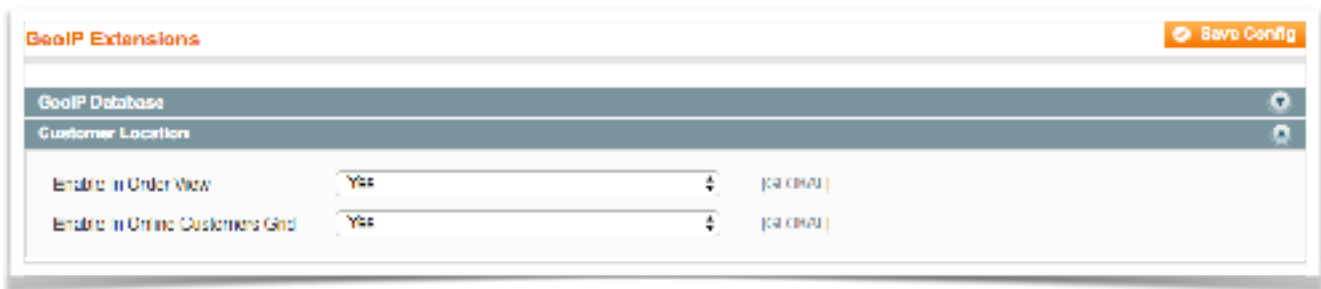

The extension supports two types of GeoIP database: *GeoIP Country* and *GeoIP City*.

Note! To use the City database you need to download it first from maxmind.com and upload to your server to the 'lib/GeoIP' folder.

Update Database – hit this button to update the current GeoIP database. Mark the checkbox *Create Backup* to create a backup before updating.

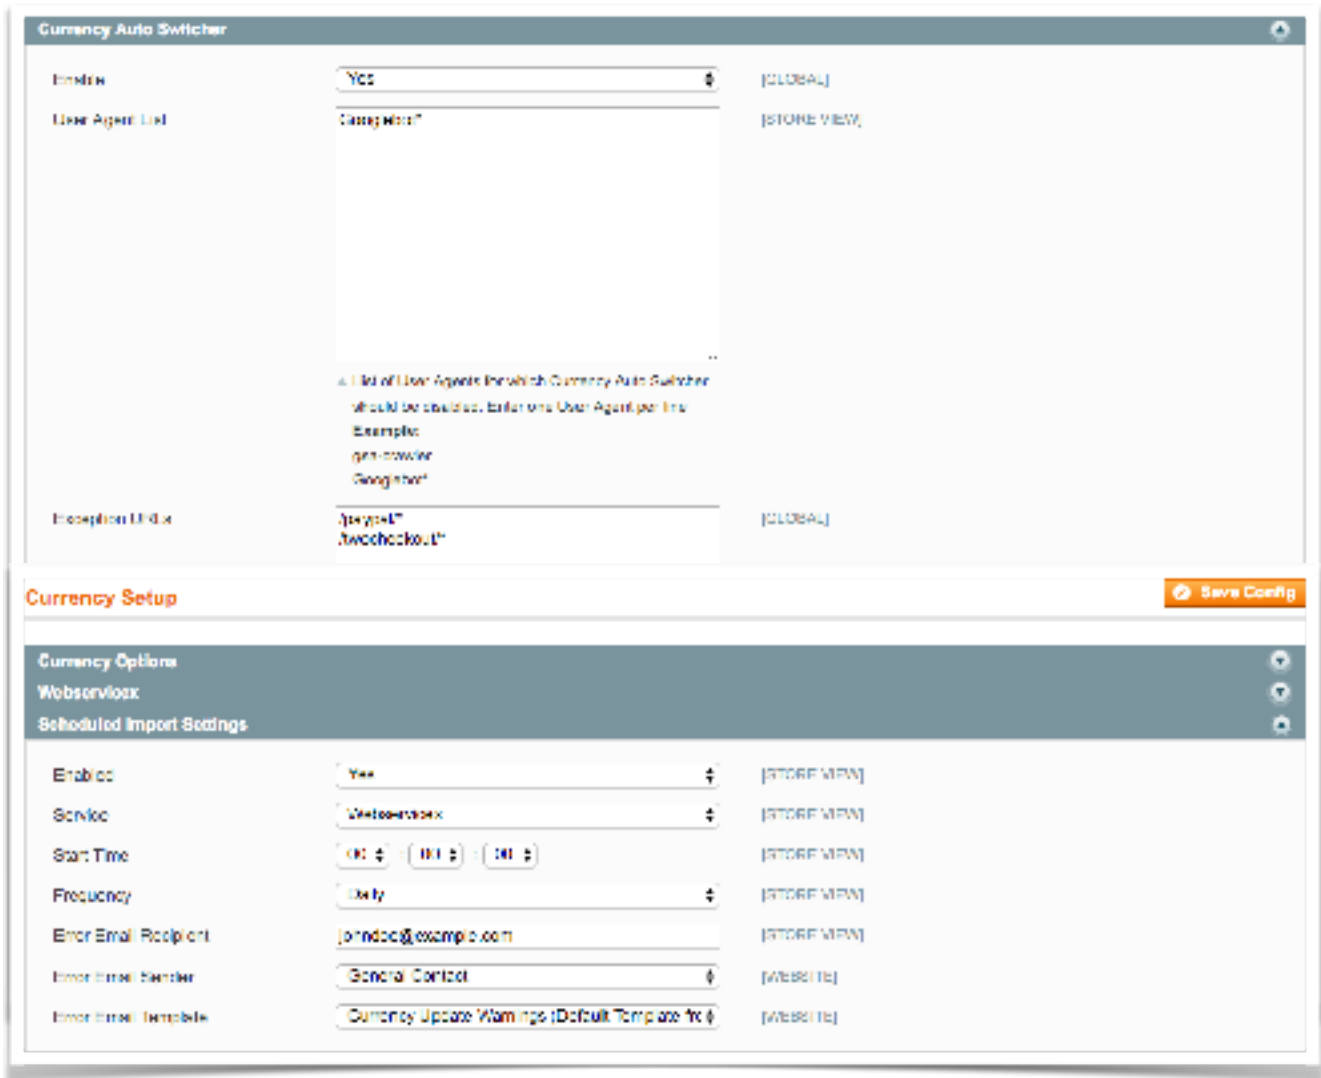

Open **Customer Location** tab:

Enable in Order View – enable or disable customers current location in the Order View.

Enable in Online Customers Grid – enable or disable customers current location in the Online Customers Grid.

Open **Currency Auto Switcher** tab:

Field	Value	Scope
Enable	Yes	[GLOBAL]
User Agent List	Googlebot*	[STORE VIEW]
Exception URLs	http://*.twocheckout.it	[GLOBAL]

Currency Setup Save Config

Currency Options

Websockets

Scheduled Import Settings

Enabled	Yes	[STORE VIEW]
Service	Webservices	[STORE VIEW]
Start Time	00:00:00	[STORE VIEW]
Frequency	Daily	[STORE VIEW]
Error Email Recipient	johndoe@example.com	[STORE VIEW]
Error Email Sender	General Control	[WEBSITE]
Error Email Template	Currency Update Warnings (Default Template)	[WEBSITE]

Enable – set *Yes* or *No* to enable or disable Currency Auto Switcher.

User Agent List – the list of user agents, the currency won't be switched for.

Exception URLs – the list of URLs, the currency switcher should be disabled for.

Currency Auto Switcher Configuration

Select *General* – **Currency Setup** and open **Currency Options** tab:

Base Currency – set currency to be used for all online transactions in your store.

Default Display Currency – set currency to display by default in your store.

Note! **Default Display Currency** doesn't affect the **Base Currency**. All the transactions will be held in the **Base Currency**.

Allowed Currencies – specify the list of the allowed currencies in your store.

Open **Scheduled Import Settings** tab:

Scheduled Import option allows to set up automatic database update for currency rates.

Enabled – set Yes or No to enable or disable scheduled database import.

Service – choose service provider for currency rates database.

Start Time – set a start time for database update.

Frequency – specify the frequency of database updates.
Error Email Recipient – set email recipient to be notified if the error occurred.
Error Email Sender – set email sender if the error occurred.
Error Email Template – set email template to be sent if the error occurred.

4. Currency Auto Switcher

The extension allows to specify Country-Currency functionality and switch them automatically based on shoppers location.

Currency Rates Configuration

Jump to *System – Manage Currency – Rates*.

USD	CAD	EUR	GBP	USD
1.0000	1.3694	1.6212	1.0000	

- In the field *Import Service* choose the appropriate provider for the currency rates.
- Then, hit the *Import* button to establish new exchange rates.
- Press *Save Currency Rates* button to finish the operation.

You can set currencies values ratio manually in relation to the base currency. Press *Save Currency Rates* button to confirm changes.

Currency Symbols Configuration

Jump to *System – Manage Currency – Symbols*.

The module allows you to use the default currency symbols or change them to the custom ones.

currency	symbol	
GBP (British Pound Sterling)	£	<input checked="" type="checkbox"/> Use Standard
CAD (Canadian Dollar)	CA\$	<input checked="" type="checkbox"/> Use Standard
EUR (Euro)	€	<input checked="" type="checkbox"/> Use Standard
USD (US Dollar)	\$	<input checked="" type="checkbox"/> Use Standard

Unmark the *Use Standard* field for the needed currency and change symbol manually.

Press *Save Currency Symbols* button to confirm changes.

Currency Relations Configuration

This section lets specify Country-Currency relations.

Jump to *System – Manage Currency – Relations*.

ID	Currency	Countries*	Reset
1	USD	US Change	<input type="checkbox"/>
2	CAD	CA Change	<input type="checkbox"/>
3	EUR	AD, AT, AX, BE, CY, DE, ES, FI, FR, GP, GR, IE, IT, LU, MC, MQ, MT, NL, PM, PT, RE, SI, SK, SM, TF, VA, YT, EU Change	<input type="checkbox"/>
4	JSD	AS, EC, FN, GU, HT, IC, MH, MP, PA, PR, PW, SV, TC, VN, JS, VS, V Change	<input type="checkbox"/>

Add a new currency and set a list of countries for which this currency should be applied.

After configuration hit the **Save Currency Relations** button.

Note! Currency Auto Switcher switches only the displayed currency. All the transactions will be processed in the *Base Currency*.

5. GeoIP Detection

The extension allows you to check geographical location for online customers. To do this jump to *Customers – Online Customers*.

IP Address – shows the latest users IP address.

IP Location – shows users last location based on the GeoIP database.

ID	First Name	Last Name	Email	IP Address	IP Location	Session Start Time	Last Activity	Type	Last Url
	n/a	Guest	n/a	75.119.214.227	US, United States, CA California, Brea, 92821	Oct 28, 2009 10:27:17 AM	Oct 28 2009 10:44:47 AM	Visitor	http://geoip.magendo.com/

Alternatively, jump to *Sales – Orders* and select any of the placed orders.

The screenshot displays an order details page for Order # 100000001, dated Jun 7, 2013 3:01:21 AM. The page includes navigation buttons for Back, Send Email, and Credit Memo. The order status is Complete, and it was purchased from the Main Website. The 'Placed from IP' block shows the IP address 208.76.55.198 and the location as US, United States. Account information for John Smith is shown, including his email address john.smith@smithcompany.com and that he is not logged in. Billing and shipping addresses are listed as identical for John Smith in Virginia, with zip code 12345.
