I) Introduction

Login & Registration Page for Magento 2 extension allows using drag & drop to build layout for login & registration pages without touching any line of code.

- Customize login & registration page layout with drag & drop
- 10+ elements
- Save time with pre-built templates
- Fully responsive
- 100% compatible with: Ultimo theme, Porto theme & [Magezon Page Builder](#).

NOTE: Login & Registration Page extension was developed on a core builder based on which we built all of our builder extensions. The core builder includes elements and settings that all builder extensions have in common. For a detailed guide, please refer to: https://magezon.com/pub/media/productfile/magezon-core-builder-user_guides.pdf.

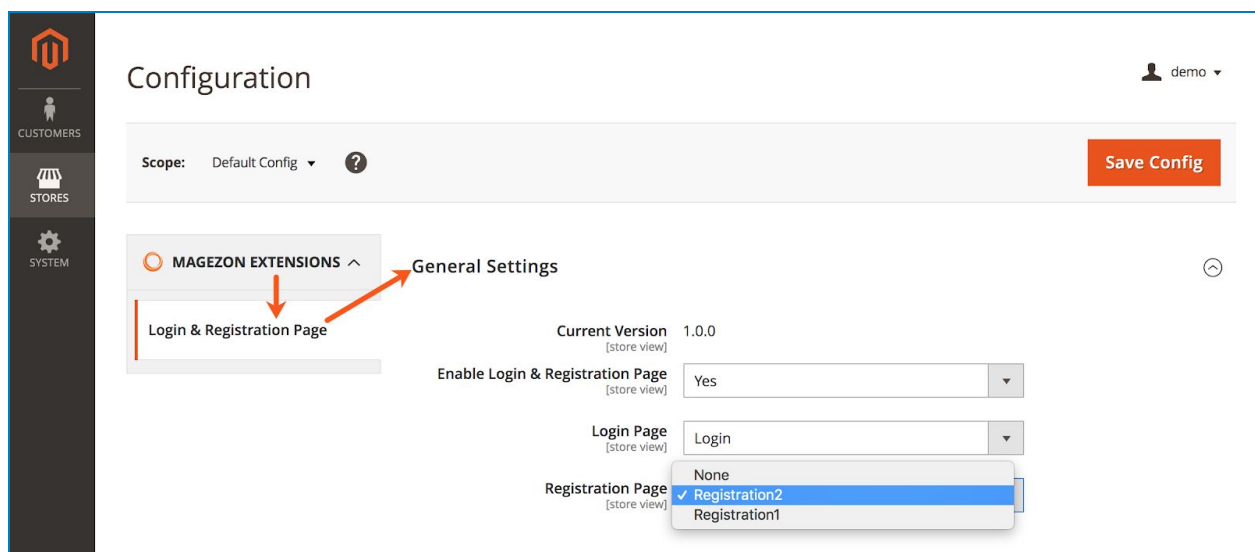

In this guide, we'll focus on elements and settings that are specific to **Login & Registration Page** extension.

II) Where to Find Extension

After installing the extension, navigate to **Store > Settings > Configuration**.

On the left panel, span **MAGEZON EXTENSIONS** and choose **Login & Registration Page**.

On the right section, you can see **General Settings** that include:

- **Current Version** of the extension.
- **Enable Login & Registration Page**: choose **Yes/No** to enable/disable the extension.
- **Login Page**: select a layout that's applied to the login page on frontend. Choose None to keep the default layout.
- **Registration Page**: select a layout that's applied to the registration page on frontend. Choose None to keep the default layout.

III) Create Layouts

Navigate to **Customers > Login & Registration Pages** to land on the page where you can create a new layout and manage all layouts you created.

The screenshot shows the 'Login & Registration Pages' management interface. The sidebar on the left has a dark theme with icons for 'CUSTOMERS', 'STORES', and 'SYSTEM'. The 'CUSTOMERS' menu is expanded, showing 'Login & Registration Pages' with a red arrow pointing to it. The main content area has a light theme and includes a search bar, a search icon, a 'Filters' button, a 'Default View' dropdown, and a 'Columns' dropdown. Below these are pagination controls showing '20 per page' and '1 of 1'. A table lists the existing layouts:

			Type	Layout	Created	Modified	Action
<input type="checkbox"/>	1	Login	Login	1 column	Mar 3, 2020 2:57:55 AM	Mar 3, 2020 2:57:55 AM	Select
<input type="checkbox"/>	2	Registration1	Registration	1 column	Mar 3, 2020 2:59:32 AM	Mar 3, 2020 2:59:32 AM	Select
<input type="checkbox"/>	6	Registration2	Registration	1 column	Mar 3, 2020 2:59:32 AM	Mar 3, 2020 2:59:32 AM	Select

An 'Add New Page' button is visible in the top right corner of the main content area.

Page Information ⊕

What To Display ⊕

1. Page Information

Page Information ✎ ⌵

Page Name *

Type * ▼

Layout ▼

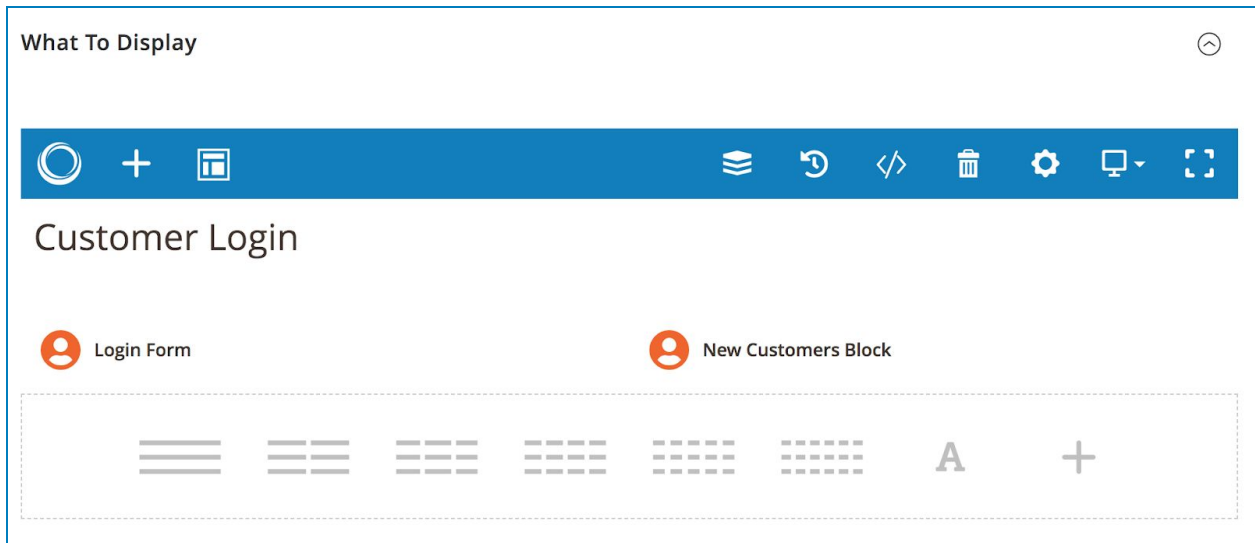

- ✓ Empty
- 1 column
- 2 columns with left bar
- 2 columns with right bar
- 3 columns
- 1 column Full Width

What To Display ⌵

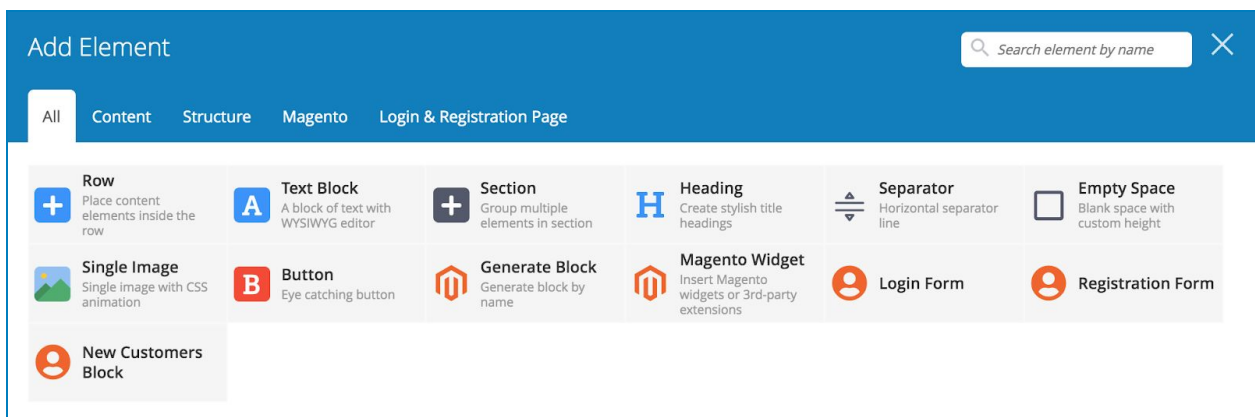

- **Page Name:** enter layout name.
- **Type:** choose page type to apply the layout with 2 options: Login or Registration. E.g. If you choose Login, the login page on frontend will be displayed in this layout.
- **Layout:** Choose layout type from 6 options:
 - Empty
 - 1 column
 - 2 columns with left bar
 - 2 columns with right bar
 - 3 columns
 - 1 column full width (this layout is available only after the extension is installed).

2. What to Display

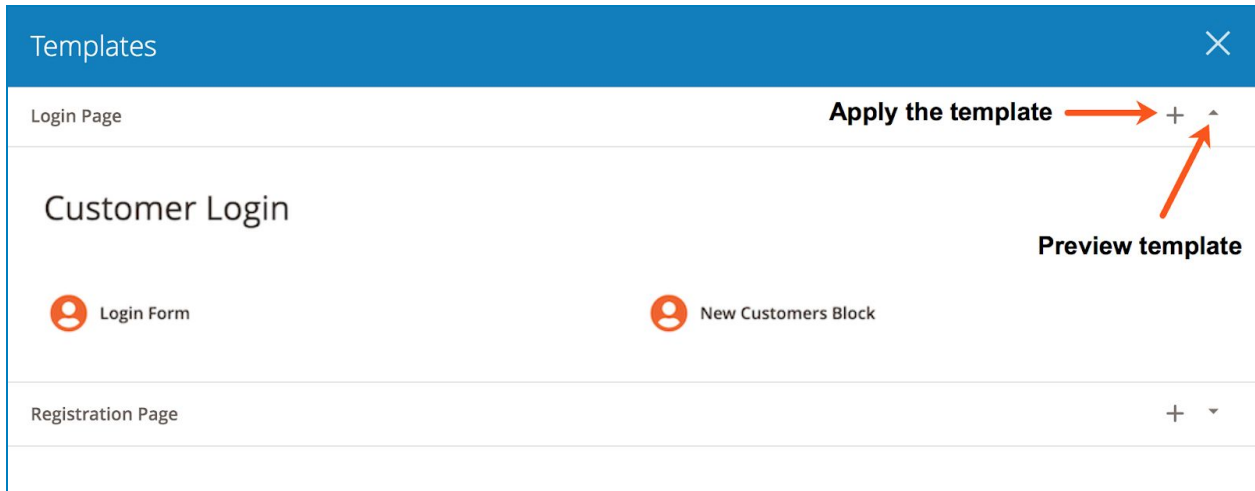

Where you create and customize layout for login/registration pages using drag & drop interface.

- Click the plus icon on the top bar to add elements from a popup:

- Click the icon next to plus icon to view and select a pre-built template.

IV) Elements

NOTE: Here we only list elements that are specific to **Login & Registration Page** extension and mention settings that are specific to these elements. For other elements and settings, you can look at [Magezon Core Builder](#) guide.

1. Login Form

Used to display Magento 2 default login form:

Login Form

General Design Options

CSS Animation

None

Select type of animation for element to be animated when it "enters" the browsers viewport (Note: works only in modern browsers).

Disable Element **Hide on Page Load** **Hide on**

Element ID **Z-Index**

Enter element ID (Note: make sure it is unique and valid according to [w3c specification](#))

Element Class Attribute **Element Inner Class Attribute**

Style particular content element differently - add a class name and refer to it in custom CSS.

Style particular content element differently - add a class name and refer to it in custom CSS.

Enter element ID (Note: make sure it is unique and valid according to [w3c specification](#))

Element Class Attribute **Element Inner Class Attribute**

Style particular content element differently - add a class name and refer to it in custom CSS.

Style particular content element differently - add a class name and refer to it in custom CSS.

>> Registration Form element on frontend:

The screenshot shows the LUMA website's registration page. At the top left is the LUMA logo. To the right is a search bar with the text "Search entire store here..." and a magnifying glass icon. Below the search bar is a navigation menu with links: "What's New", "Women", "Men", "Gear", "Training", and "Sale". The main heading is "Create New Customer Account". The registration form is enclosed in a red border and contains the following sections:

- Personal Information**
 - First Name *
 - Last Name *
 - Sign Up for Newsletter
- Sign-in Information**
 - Email *
 - Password *
 - Password Strength: No Password
 - Confirm Password *

At the bottom left of the form is a blue button labeled "Create an Account". A legend at the bottom left of the form indicates that fields with an asterisk are required.

3. New Customers Block

Used to display new customers block:

New Customers Block

General Design Options

CSS Animation

None

Select type of animation for element to be animated when it "enters" the browsers viewport (Note: works only in modern browsers).

Disable Element **Hide on Page Load** **Hide on**

Display Content on Hover

- **Image Source:** add image from Media library or use External link.

>> If you set Image Source as Media library, you'll add **Image** and **Hover Image** (the image that is displayed when you hover over the main **Image**).

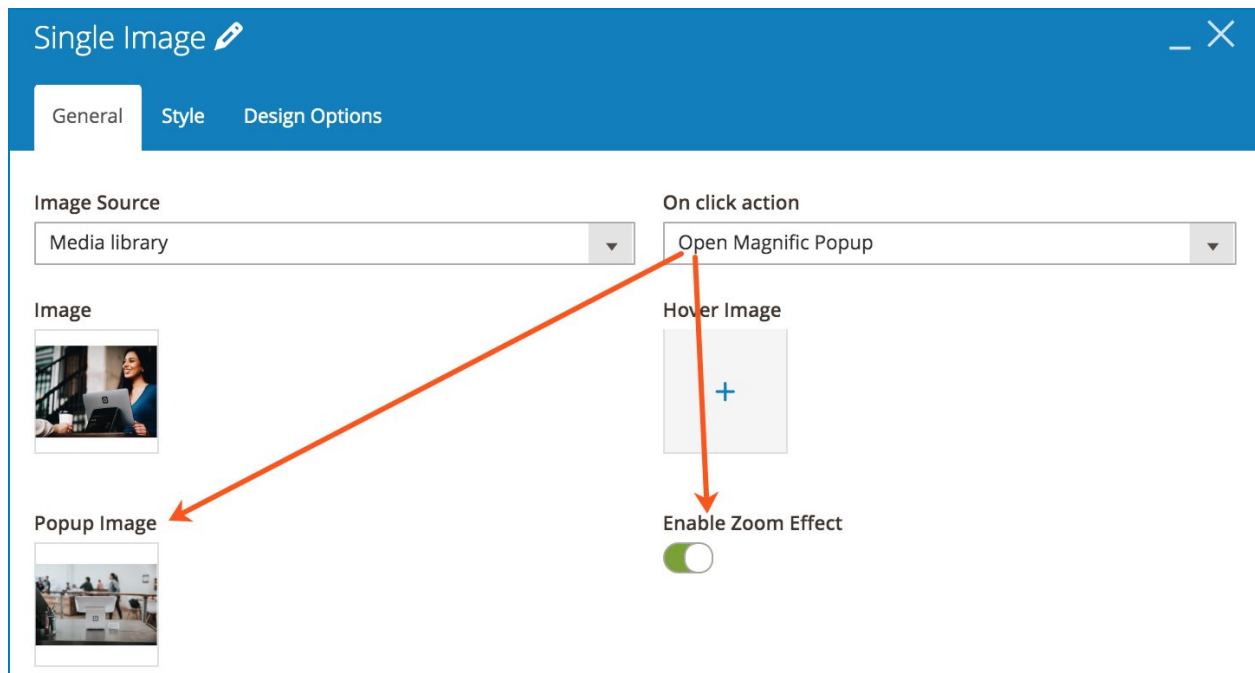

>> If you set Image Source as External link, you'll add image address in **External link** field.

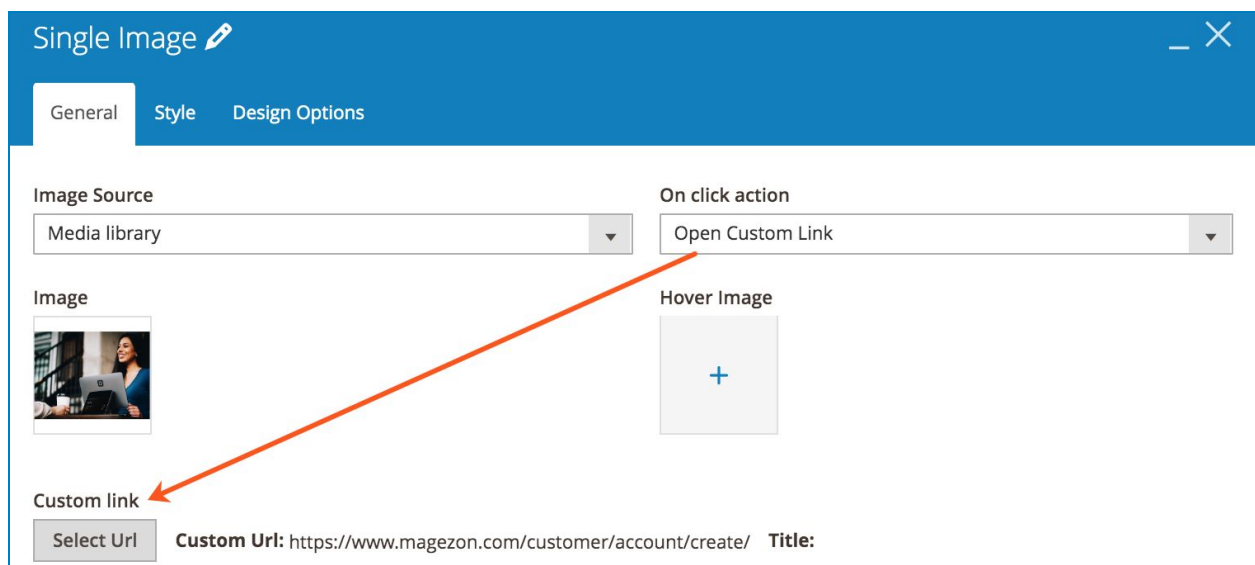

- **On click action:** specify what will happen when the image is clicked. You can:

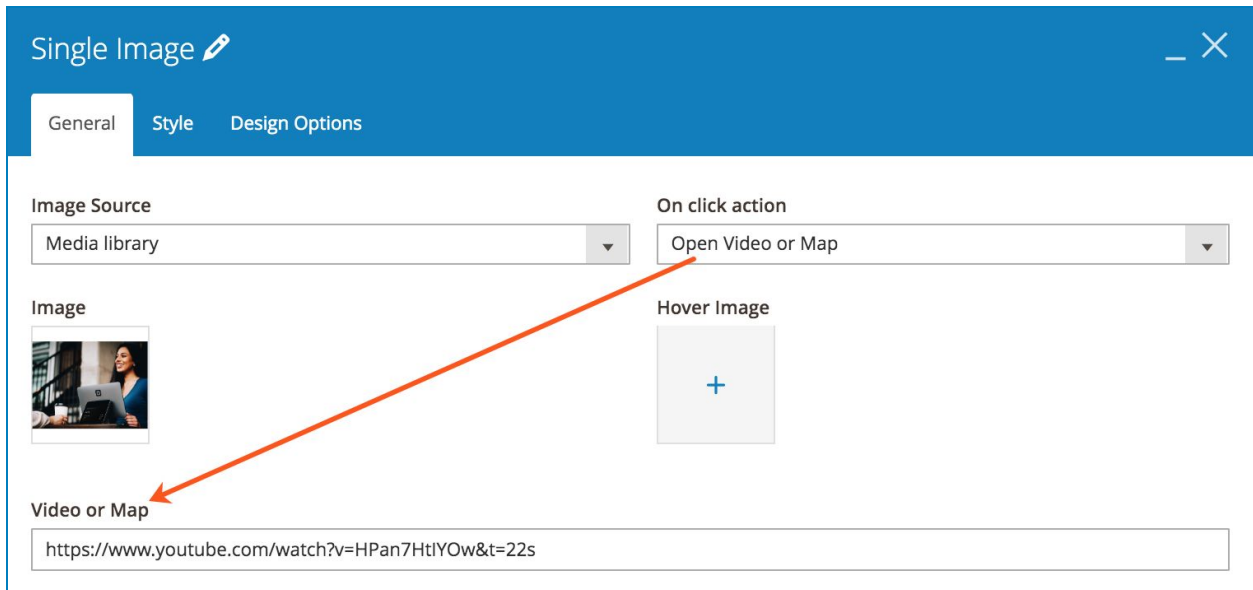

>> Open the image in a Magnific Popup:

>> Open Custom Link:

>> Open Video or Map:

- Set **Image Style** as Default, Outline, Shadow1, Shadow2 or 3D Shadow.
- Set **Image Hover Effect** as Zoom In, Lift Up or Zoom Out.
- Customize **Image Width** and **Image Height**.
- Enter image **Alternative Text** & **Image ID**.
- Enter image **Title** and **Description**.
- **Content Position**: choose position for image content (Title & Description).
- Set **Content Alignment** as Left, Right or Center.
- **Display Content on Hover**: if enabled, image Title and Description is only displayed on hover.

- Style tab:

Single Image 

General **Style** Design Options

Content Padding: 20px

Content Fullwidth:

Content: **Normal** Hover

Text Color: #007dbd

Background Color: rgba(255, 255, 255, 0.62)

Title Font Size: 24px

Title Font Weight: 600

Description Font Size: 14

Description Font Weight: 400

Border Radius: 5

Border Width: 1

Border Style: Solid

Border Color: #ff5501

Overlay Color: rgba(0, 0, 0, 0.37)

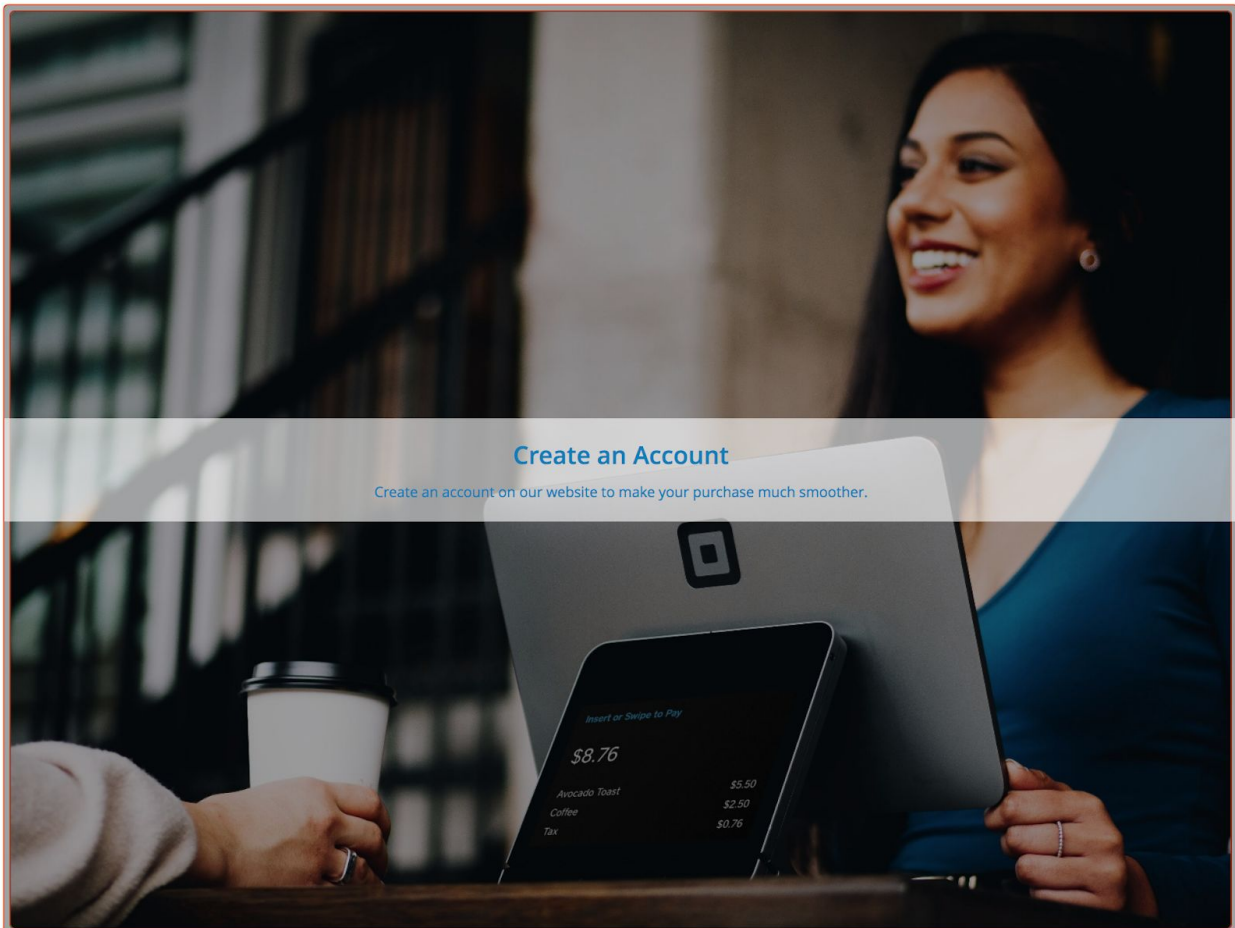

Hover Overlay Color: 

Replace with Close Save

- **Content Padding:** set padding between content (Title & Description) and the container.
- **Content Fullwidth:** set the content to cover full width of the image.
- Set **Text Color** (color for title & description) and **Background Color** of the text.
- Specify **Title Font Size**, **Title Font Weight**, **Description Font Size** and **Description Font Weight**.

- Set **Border Radius, Border Width, Border Style & Border Color** (border that surrounds the image).
- **Overlay Color:** choose color that covers the image.
- **Hover Overlay Color:** choose overlay color on hover (you need to set **Overlay Color** so that this hover overlay color works).

>> Single Image element on frontend:

V) Multi-Store & Language Support

Login & Registration Page extension supports multiple stores and languages. It means you can apply different layouts for login & registration pages on different store views.

Please follow these steps to set layout for each store view.

* Suppose that your website has 2 store views: English & France. And you created 2 layouts for the login page, one for English store view and the other for France store view. Similarly, you have 2 layouts for the registration page, one for English store view and the other for France store view.

The screenshot shows the 'Login & Registration Pages' configuration page in the Magezon Admin Panel. The page includes a search bar, a table with 4 records, and various control elements like 'Add New Page', 'Filters', 'Default View', and 'Columns'.

ID	Name	Type	Layout	Created	Modified	Action
1	Login - French	Login	1 column	Mar 3, 2020 2:57:55 AM	Mar 3, 2020 2:57:55 AM	Select
2	Registration - French	Registration	1 column	Mar 3, 2020 2:59:32 AM	Mar 3, 2020 2:59:32 AM	Select
6	Registration - English	Registration	1 column	Mar 3, 2020 2:59:32 AM	Mar 3, 2020 2:59:32 AM	Select
7	Login - English	Login	1 column	Mar 3, 2020 2:57:55 AM	Mar 3, 2020 2:57:55 AM	Select

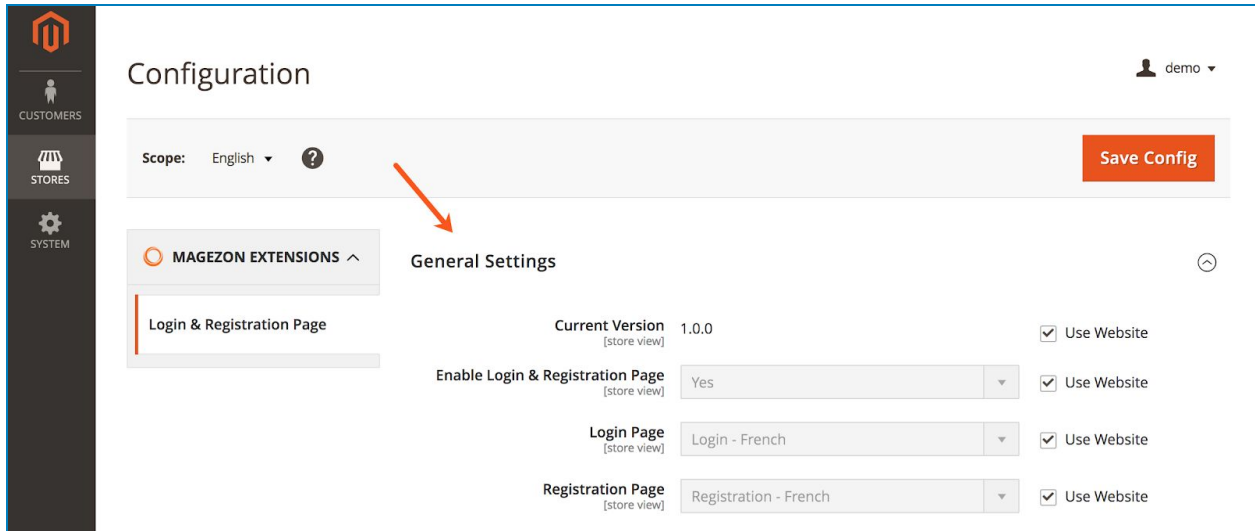

Step 1: Go to **Store > Settings > Configuration**. On the left panel, span **MAGEZON EXTENSIONS** and choose **Login & Registration Page**.

The screenshot shows the Magezon Configuration interface. On the left is a sidebar with icons for CUSTOMERS, STORES, and SYSTEM. The main content area is titled 'Configuration' and shows a 'Scope' dropdown set to 'Default Config'. Below this is a 'MAGEZON EXTENSIONS' section with 'Login & Registration Page' selected. The 'General Settings' for this extension include: 'Current Version' (1.0.0), 'Enable Login & Registration Page' (Yes), 'Login Page' (Login - French), and 'Registration Page' (Registration - French). A 'Save Config' button is visible in the top right. The footer contains copyright information for Magento Commerce Inc. and links for Privacy Policy, Account Activity, and Report an Issue.

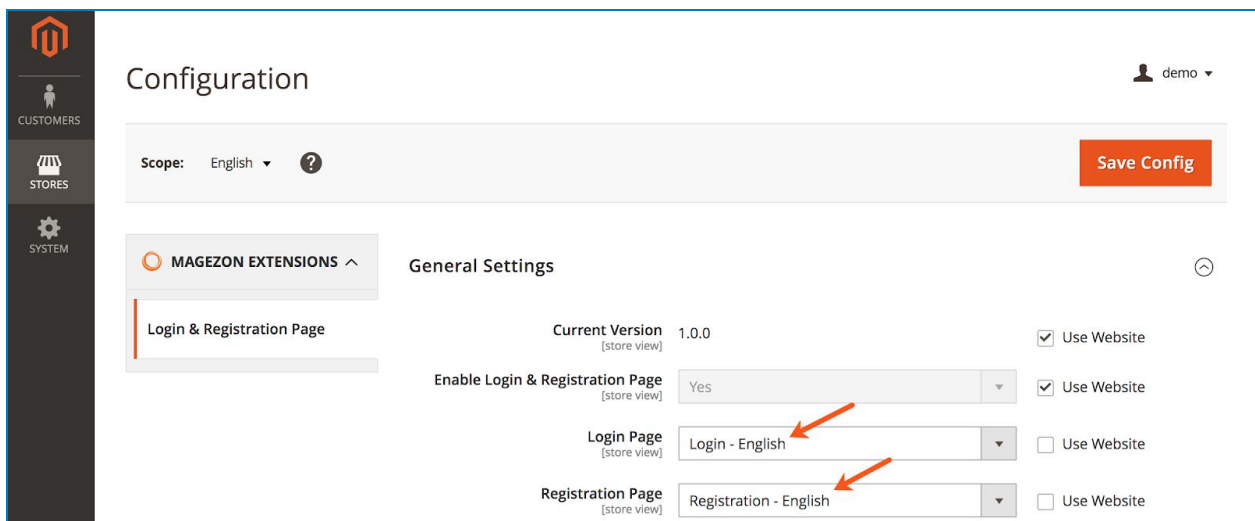

Step 2: Click the drop-down icon next to Default Config and choose one specific store view. For example, we choose English.

This screenshot is identical to the previous one, but with the 'Scope' dropdown menu open. The menu lists 'Default Config', 'Main Website', 'Main Website (store)', 'English', and 'France'. A red arrow points to the 'English' option, indicating the selection process.

Step 3: After you choose a specific store view, **General Settings** section will be like this:

Untick **Use Website** checkbox next to Login Page and Registration Page fields to be able to edit. In this case, we choose **Login - English** layout for Login Page and **Registration - English** for Registration Page.

Take similar steps for France store view. Remember to **Save Config** after making changes.

>> Login page in English store view:

The screenshot shows the English store view of the login page. At the top right, there is a navigation bar with the text "Default welcome msg! Sign In or Create an Account English". An orange arrow points to the "English" dropdown menu. Below the navigation bar is the LUMA logo and a search bar with the placeholder text "Search entire store here...". A secondary navigation bar contains links for "What's New", "Women", "Men", "Gear", "Training", and "Sale". An orange arrow points to the "Gear" dropdown menu. Below this is a yellow warning banner that reads: "This page was built with Login - English. Click here to change its structure." The main content area is titled "Customer Login" and is split into two columns. The left column is for "Registered Customers" and contains the text "If you have an account, sign in with your email address." followed by "Email *" and a text input field, "Password *" and another text input field, and a "Sign In" button with a link for "Forgot Your Password?". The right column is for "New Customers" and contains the text "Creating an account has many benefits: check out faster, keep more than one address, track orders and more." followed by a blue "Create an Account" button.

- Login page in France store view:

The screenshot shows the France store view of the login page. At the top right, there is a navigation bar with the text "Default welcome msg! Sign In or Create an Account France". An orange arrow points to the "France" dropdown menu. Below the navigation bar is the LUMA logo and a search bar with the placeholder text "Search entire store here...". A secondary navigation bar contains links for "What's New", "Women", "Men", "Gear", "Training", and "Sale". An orange arrow points to the "Gear" dropdown menu. Below this is a yellow warning banner that reads: "This page was built with Login - French. Click here to change its structure." The main content area is titled "Customer Login" and is split into two columns. The left column is for "Registered Customers" and contains the text "If you have an account, sign in with your email address." followed by "Email *" and a text input field, "Password *" and another text input field, and a "Sign In" button with a link for "Forgot Your Password?". The right column is for "New Customers" and contains the text "Creating an account has many benefits: check out faster, keep more than one address, track orders and more." followed by a blue "Create an Account" button.
