

MAGHOS

PDF Fonts

Welcome to our PDF Fonts extension guide which will walk you briefly through several steps to set the feature up.

What does the extension do

“PDF Fonts extension allow replacing of default fonts used in PDFs for own ones.”

Extension set up steps

1. Install extension module
2. Managing fonts
3. Invoice PDF examples

1. Install extension module

To install the module into Magento system, please follow our [Module installation guide](#) which will walk you through the whole installation in several simple steps.

After installation, module configuration appears in the admin area.

The screenshot shows the Magento Admin Configuration interface. On the left is a vertical sidebar with navigation icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stores, and System. The main content area is titled 'Configuration' and shows 'Store View: Default Config' with a dropdown arrow and a help icon. A red 'Save Config' button is in the top right. Below this is a list of configuration sections: GENERAL, CATALOG, CUSTOMERS, SALES, DOTMAILER, MAGHOS, and PDF fonts. The 'PDF fonts' section is highlighted with a red box. To the right of the 'MAGHOS' section, the 'TTF fonts' configuration is visible, showing three rows: 'Regular font', 'Bold font', and 'Italic font'. Each row has a dropdown menu set to 'Vybrat soubor' and a text field containing 'Soubor nevybrán'.

2. Managing fonts

The setup window viewd on the previous page is the only settings of this extension.

Upload

It is only need to pick up the TTF font you would like the default font replace with and upload it by clicking on the Save Config button.

Fonts generation

All PDF documents will be generated with new fonts immediately after they are saved.

Removing

When removing fonts, it is necessary to check the box at the Delete file title and save the configuration.

3. Invoice PDF examples

Default / New fonts invoice example

Payment Method	Shipping Method:
