

MAGIC 360

INSTALLATION:

1. Unzip the Magic 360 extension for Magento 2.0.
2. Upload the 'app' folder to your Magento directory.
3. Login to the Magento Admin as an administrator.
4. Click [System > Web Setup Wizard] in the menu.
5. Click the [Component Manager] link.
6. Find the Magic 360 extension in the list and select the [Enable] action.
7. Follow the instructions in the wizard until the process is complete (you will see 'Success' message).
8. Adjust the Magic 360 settings to suit your needs - go to the [Magic Toolbox > Magic 360] menu in the Magento admin panel.
9. Magic 360 extension is installed.

Next, setup a 360 spin...

10. Open the product which you'd like to spin and click Magic360 Images at the bottom of the left navigation.
11. Browse your computer for your set of images and click 'Upload' images.
12. The 'Multi row spin' section at top of the page will automatically update. The 'Number of images on X-axis' shows how many images are in your spin. The 'Number of images on Y-axis' shows if your spin moves up/down. '1' means one row only. If your spin has multiple rows, click 'Multi-row spin' and enter the number of columns and rows in Number of images on X-axis and Number of images on Y-axis.
