

Magento 1[®] Guide

Channable

Channable

Thank you for choosing a Magmodules extension for your Magento® store. Easily integrate the extension in your Magento store and generate a complete product feed for every Store View used. This extension can be used with a multistore setup with unlimited Store Views.

Channable Product Feed

This extension creates a product feed, which can easily be transferred to Channable. All product information from your Magento store will be imported into the tool. Once the product feed is optimised in the tool, you can export your products to any export channel you like.

If you do not wish to process your orders within Channable (e.g. for Bol.com or Beslist) it is possible to use the feed extension without the Order&Item extension.

Channable Item / Order connection

With the Order API you can handle the orders from Channable to Magento. In this way you can easily import the orders from for example Beslist.nl and/or Bol.com to your Magento store. You can easily configure if you want to import the customers and/or specify which shipping method need to be calculated and used.

Together with the Order API you can activate the Item API to make sure all the product data with the external platforms outside Channable are well updated and have the latest price and or stock information.

Download the extension here: <https://www.magmodules.eu/channable-order-api.html>

Installation

There are 3 different ways to install the extension:

1. [Installation through the Magento Marketplace](#)
2. [Installation through FTP](#)

Knowledge Base

In our knowledge Base we add the most frequently asked questions from this Magento® extension and we setup a clear guide to help you with the installation and configuration. Please feel free to ask any further questions so we can complete this knowledge base for the benefits of all as this knowledge base is designed to offer a complete support option in self-service.

It allows you to search for the frequently requested actions or have a peek in the configuration settings to get the most out of the extensions

You can find the Knowledge Base for this extension here;
