

Magento 2® Guide

Beslist Winkelwagen

Beslist Winkelwagen

Thank you for choosing a Magmodules extension for your Magento® store. In cooperation with Beslist.nl we launched this new extension with support for the newly launched Beslist.nl Shopping Cart. This extension includes all the options which are needed to be able to make use of the new cart. Connect your webshop to the Beslist.nl cart and receive direct orders from Beslist.nl. The extension supports the ShopItem API, the OrderXML/Shoppingcart API and the specified Product Feed for Beslist.

This new Shopping Cart functies has a cost per sale (CPS) model. So you only pay when you receive orders via Beslist.nl. With this extension, it is possible to connect the Magento® store with the function of Beslist.nl. Through this method, a certain commission calculated on the product sold, this commission is then visible in the order list within Magento.

ShopItem API

Certainly the Item Shop API ensures that the necessary product information is updated in real time, unlike the XML feed, the prices and stock values and lead times realtime updated through the API. This way Beslist.nl always have the latest price, delivery and inventory.

Order XML

The API for XML Order / shoppingcart is then responsible for the smooth processing of orders which are placed via Beslist.nl. The order with Beslist.nl is then loaded in the connected Magento store with the appropriate customer data to which it can be further processed.

Product Feed

To export the products the right way to export to Beslist.nl there is a complete feed required per the requirements of Beslist.nl, the Feed function in this extension has been tested in collaboration with Beslist.nl so the values given are completely focused on the values which need Beslist.nl. This allows the generation of a complete feed very user-friendly.

Installation

There are 2 different ways to install the extension:

1. [Installation through the Magento Marketplace](#)
2. [Installation through FTP](#)

Knowledge Base

In our knowledge Base we add the most frequently asked questions from this Magento® extension and we setup a clear guide to help you with the installation and configuration.
