

Magento 2[®] Guide

Digitec Galaxus

Digitec Galaxus

This plugin facilitates the technical integration to Digitec Galaxus for Magento users. In order to sell products on this platform, a preliminary merchant registration is necessary. To ensure the correct configuration of the plugin, please get in touch via haendlerprogramm@digitecgalaxus.ch.

The merchant programme – we’ve got the platform, you’ve got the products – seize new opportunities for your business

Become a part of Switzerland’s largest online warehouse – benefit from a strong sales channel, an excellent reputation, a large number of daily visitors and a vast and active customer base!

Our attractive online shop is a chance to tap into a new sales channel. With the merchant programme via the Galaxus online shop, you can sell your products under your own name and branding, but to our customers. Within the scope of the merchant programme, the sales agreement is concluded directly between merchants and end customers, while Galaxus only acts as facilitator and manages the product data, orders and the entire payment process. Order details are forwarded to you; you ship the product directly to the end customer and earn money. It’s as easy as that.

Developed for Digitec Galaxus

Digitec Galaxus AG is the biggest online retailer in Switzerland. It operates the digitec and Galaxus online shops as well as ten stores in the German- and French-speaking parts of Switzerland.
