magento/module-product-links-sample-data	Module	100.3.0	Magento	Select

8. When done, you'll see all your **New Updates and Extensions** (one of which is Cart2Cart plugin)

9. Find **Cart2Cart: Migration from X-Cart** extension and press the Install button.

The screenshot shows the 'Extension Manager' interface with the title 'Ready to Install'. It displays a list of 50 extensions. The extension 'magneticone/cart2cart-migration-from-woocommerce' is highlighted with a red border. The table below shows the details of the extensions:

Extension Name	Type	Vendor	Latest version	Action
yotpo/magento2-module-yotpo-reviews-bundle-edge	Metapackage	Yotpo	Version 3.0.0	Install
vertex/product-magento-module-edge	Metapackage	Vertex	Version 3.2.0	Install
temando/module-shipping-edge	Metapackage	Temando	Version 1.6.1	Install
shopialfb/facebook-module	Module	Shopialfb	Version 2.2.1	Install
magneticone/cart2cart-migration-from-woocommerce	Module	Magneticone	Version 1.0.6	Install
magento/module-data-services	Module	Magento	Version 3.0.2	Install
magento/module-services-id	Module	Magento	Version 1.1.0	Install
magento/google-shopping-ads-bundle-edge	Metapackage	Magento	Version 3.0.1	Install
magento/google-shopping-ads-bundle	Metapackage	Magento	Version 3.0.1	Install
magento/magento-cloud-components	Module	Magento	Version 1.0.1	Install
magento/services-connector	Module	Magento	Version 1.0.3	Install
magento/module-shared-catalog	Module	Magento	Version 100.1.3	Install
magento/module-cms-sample-data	Module	Magento	Version 100.3.3	Install
magento/module-tax-sample-data	Module	Magento	Version 100.3.3	Install

10. Once ready, launch the three extension installation stages (Readiness Check, Create Back-Up, Component Install) one by one. In case an error occurs during Readiness Check - make sure your [cron jobs](#) are set up properly.

The screenshot shows the installation progress bar with three steps: 'Readiness Check', 'Create Backup', and 'Component Install'. The 'Readiness Check' step is currently active. Below the progress bar, the text reads 'Step 1: Readiness Check' and 'Let's check your environment for the correct PHP version, PHP extensions, file permissions and compatibility.' A red button labeled 'Start Readiness Check' is visible.

11. That's it! **Cart2Cart: Migration from X-Cart module** is successfully installed.

How to use the Cart2Cart: Migration from X-Cart extension once it is installed?

1. If your Cart2Cart installation was done properly, you should see the Cart2Cart Wizard menu on the bottom of the page - open it.
2. Log in to your **Cart2Cart account** if you are registered. If not - create one, or use your Facebook (Google Plus) account.
3. Provide your X-Cart store URL, **download the Connection Bridge**, unzip and upload it to your current store root folder.
4. For your new Magento store, simply press the **“Install Connection Bridge”** button.
5. **Choose entities** you wish to migrate and, optionally, some additional options to expand your migration possibilities.
6. **Launch free Demo Migration**, and a limited number of entities will be moved to your new live Magento store in 30 minutes.
7. Once the procedure is done, select **Migration Insurance Plan**, if needed. After that launch Full Migration by clicking on the **“Start Migration”** button.
8. When done, you'll get redirected to Cart2Cart's official website to complete the payment and finalize the transfer.
