How to Install Cart2Cart: Migration from Zen Cart Extension

www.shopping-cart-migration.com

Cart2Cart: Migration from Zen Cart extension allows to automatically transfer eCommerce data like products, customers, orders, etc. to Magento 2 (Adobe Commerce) without affecting the performance or speed of the current store. Via its intuitive interface, you'll be able to provide your current and new stores' details (to enable data exchange between them), choose the data types to transfer - and the Cart2Cart: Migration from Zen Cart extension will handle the migration.

The automated 3-step migration setup is non-techie friendly and requires no complex manipulations. There is a Free Demo available to see how your store data will look on the new store before proceeding with the Full migration.

Installing via the command line interface

Note: *you can use this installation method for all Magento versions*

* = in production please use the `--keep-generated` option

Type 1: Zip file

- Unzip the zip file in **app/code/Cart2Cart/MigrationFromZenCart**
- Enable the module by running **php bin/magento module:enable Cart2Cart_MigrationFromZenCart**
- Apply database updates by running **php bin/magento setup:upgrade**
- Flush the cache by running **php bin/magento cache:flush**
- **php -f bin/magento setup:di:compile** (*this command may require increasing memory_limit php directive*)

Type 2: Composer

- Make the module available in a composer repository for example:
 - private repository `repo.magento.com`
 - public repository `packagist.org`
 - public GitHub repository as VCS
- Add the composer repository to the configuration by running **composer config repositories.repo.magento.com composer https://repo.magento.com/**
- Install the module composer by running **composer require magneticone/cart2cart-migration-from-zencart**
- Enable the module by running **php bin/magento module:enable Cart2Cart_MigrationFromZenCart**
- apply database updates by running **php bin/magento setup:upgrade**
- Flush the cache by running **php bin/magento cache:flush**

- **php -f bin/magento setup:di:compile** (*this command may require increasing memory_limit php directive*)

How to use the Cart2Cart: Migration from Zen Cart extension once it is installed?

1. If your Cart2Cart installation was done properly, you should see the **Cart2Cart: Migration from Zen Cart** menu on the bottom of the page - open it.
2. Log in to your **Cart2Cart account** if you are registered. If not - create one, or use your Facebook account.
3. Provide your OpenCart store access details.
4. **Choose entities** you wish to migrate and, optionally, some additional options to expand your migration possibilities.
5. **Launch free Demo Migration**, and a limited number of entities will be moved to your new live Magento store in 30 minutes.
6. Once the procedure is done, select **Migration Insurance Plan**, if needed. After that, launch Full Migration by clicking on the **“Start Migration”** button.
7. When done, you’ll get redirected to Cart2Cart’s official website to complete the payment and finalize the transfer.
