

Installation guide

M2 Module Magtunisia_OneStepCheckout

Main Functionalities:

Magento 2 One Step Checkout extension helps reduce the abandonment rate as well as increase the conversion rate dramatically. Ignore the back and forth that are the redundant motions when standing on your site.

Installation:

For information about a module installation in Magento 2, see Enable or disable modules.

* = in production please use the --keep-generated option

Use Zip file:

Unzip the zip file in app/code/Magtunisia

Enable the module by running `php bin/magento module:enable`

`Magtunisia_OneStepCheckout`

Apply database updates by running `php bin/magento setup:upgrade*`

Apply generate class `php bin/magento setup:di:compile*`

Apply indexer class `php bin/magento index:reindex*`

Apply deployment static content `php bin/magento setup:static-content:deploy*`

Flush the cache by running `php bin/magento cache:flush`

Configuration:

If your installation is complete you can navigate to your Administration Panel. Go to:

Store > MAGTUNISIA > One Step Checkout

Here you will find a new tab called “**Enable One Page Checkout**”.

In case you are not seeing the tabs, please flush your cache and relogin to the Adminpanel.

(System > Cache Management > Flush Magento Cache)

Configuration settings In this tab you can setup the OneStepCheckout module with these options:

- Enable One Page Checkout: Enable or disable the One Page Checkout.
- Title: Change the title page.
