

Thanks for buying the Ajax Layered Extension for Magento2.

Installation Steps:

1. Download the extension and upload it to your Magento directory.
2. The extension files will be under `app/code/Mango/Ajaxlayerednavigation`, the following paths should be present:

```
app/code/Mango/Ajaxlayerednavigation/Block  
app/code/Mango/Ajaxlayerednavigation/Controller  
app/code/Mango/Ajaxlayerednavigation/etc  
app/code/Mango/Ajaxlayerednavigation/Helper  
app/code/Mango/Ajaxlayerednavigation/Model  
app/code/Mango/Ajaxlayerednavigation/Plugin  
app/code/Mango/Ajaxlayerednavigation/view  
app/code/Mango/Ajaxlayerednavigation/composer.json  
app/code/Mango/Ajaxlayerednavigation/registration.php
```

3. SSH to your server and run the following command in your Magento directory:

```
php bin/magento setup:upgrade
```

4. If the system is in default or production mode:

```
php bin/magento setup:static-content:deploy
```

5. After that, go to the admin section, and you will find the extension options under Stores > Configuration > Catalog > Ajax Layered Navigation
