

Thanks for buying the Low Order Fee Extension for Magento2.

1. After the installation is complete, go to the admin section, and you will find the extension options under Stores > Configuration > Sales > Sales > Minimum Order Amount and Low Order Fee
2. You need to enable minimum-order-amount first, so the low order fee can be applied.
3. There are 3 fee calculation methods: fixed fee , percentage or difference (minimum order amount - subtotal).
4. You can enable the low order fee for selected customer groups or selected shipping methods.
5. In case of using multiple ranges for the low order fee, for example Ranges for Low Order Fee. e.g : up to \$50 : fixed \$10 | up to \$80 : percentage, 10% of the subtotal | Up to \$100 : the difference (100-subtotal) , use the following format:

amount,type,loworderfee:

For example:
28,fixed,6
34,difference,0
50,percentage,6

In the case of "difference", use 0 as the loworderfee value.

Important: The last value should be equal to the minimum order amount.

6. We tried to make the options as self explanatory as possible, let us know if you find some of them unclear.

If any doubt or comment, please do not hesitate to contact us.
