

Integration with Magento 2

Input Intercom App ID to start using.

Stores > Configuration > Maurisource > Intercom

Configuration

The screenshot shows the Magento 2 configuration interface. At the top, there is a header bar with "Store View: Default Config" and a help icon. Below this, a sidebar on the left shows a tree view with "MAURISOURCE" expanded and "Intercom" selected. The main content area is titled "General Configuration" and contains a field for "App ID [store view]" with the value "tdfmw4dq". Below the field, it says "Your Intercom APP ID."

Flush cache and reload frontend page.

You will see the chat widget on your Magento 2 store frontend.
