

## TrustedSite Installation Guide

1. Add the TrustedSite extension as a dependency by adding the following line to Magento's base `composer.json` file located under your Magento root folder (e.g. `/var/www/magento`).

```
"mcafeesecure/module-mcafeesecure": "~0.0.9",
```

Your `composer.json` should look something like this:

```
{
    "name": "magento/project-community-edition",
    "description": "eCommerce Platform for Growth (Community Edition)",
    "type": "project",
    "version": "2.3.3",
    "license": [
        "OSL-3.0",
        "AFL-3.0"
    ],
    "repositories": [
        {
            "type": "composer",
            "url": "https://repo.magento.com/"
        }
    ],
    "require": {
        "mcafeesecure/module-mcafeesecure": "~0.0.9",
```

2. Run `composer update`

3. Enable the TrustedSite extension by adding the following line to `app/etc/config.php` located under your Magento root folder

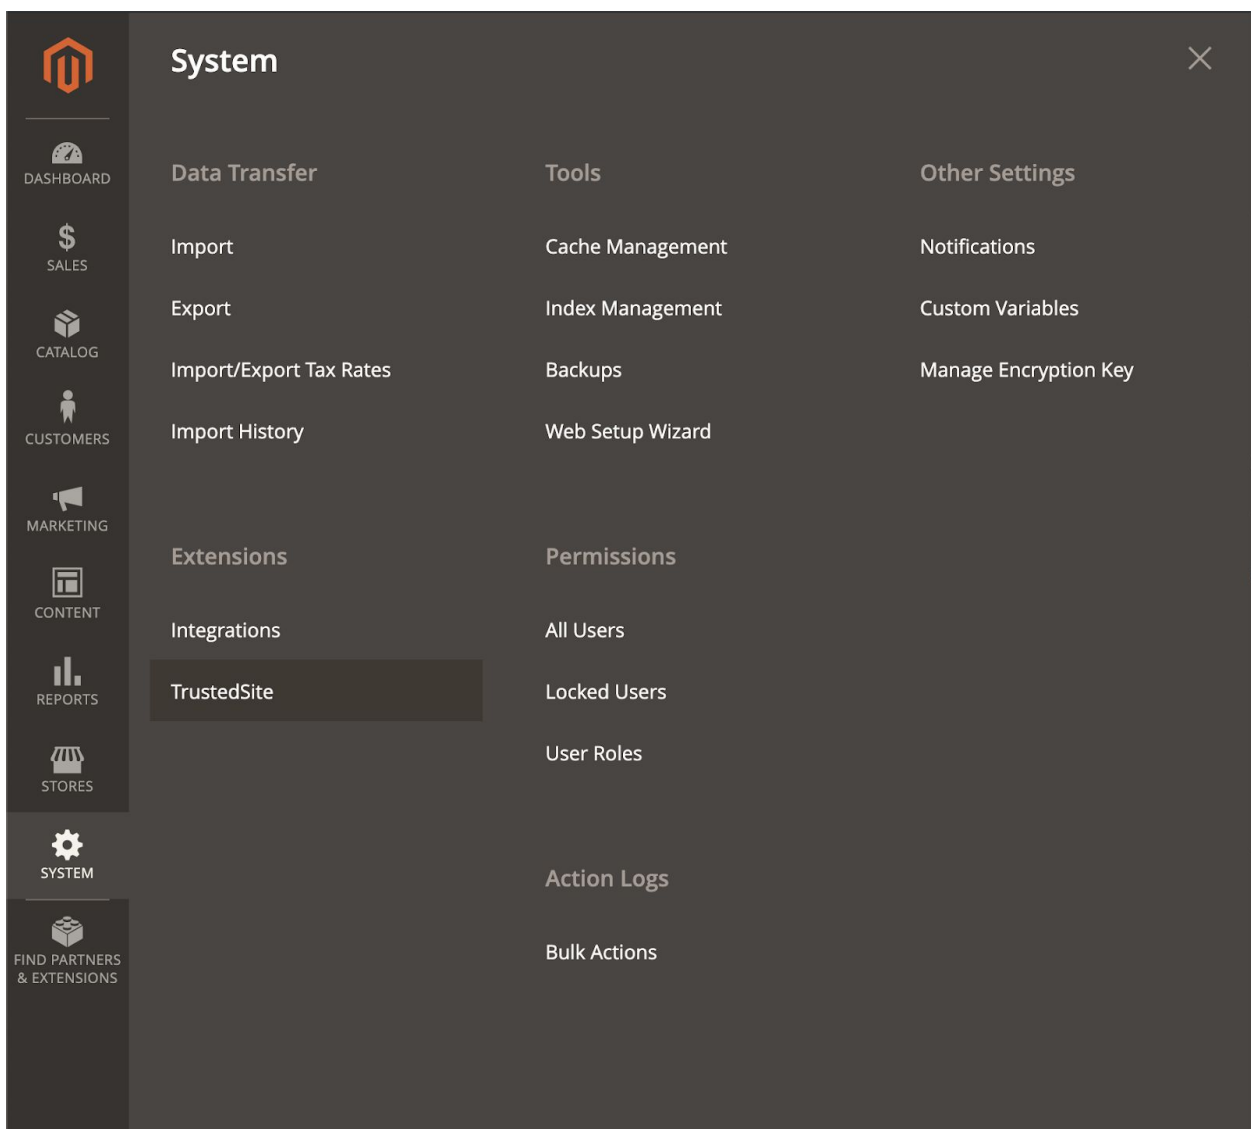

```
'McAfeeSecure_McAfeeSecure' => 1,
```

Your `config.php` should now look like this:

```
98 'Magento_Version' => 1,  
99 'Magento_Webapi' => 1,  
100 'Magento_Weee' => 1,  
101 'Magento_CatalogWidget' => 1,  
102 'Magento_Wishlist' => 1,  
103 'McAfeeSecure_McAfeeSecure' => 1,  
104 ),  
105 );
```

4. Run `bin/magento setup:upgrade`

5. Once this process is complete and the extension is enabled, visit your Magento admin backend and select TrustedSite, found under the System header, to activate and manage your TrustedSite account.

The screenshot shows the Magento Admin System menu. The left sidebar contains navigation icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stores, System, and Find Partners & Extensions. The main content area is titled 'System' and contains a grid of menu items. The 'TrustedSite' item is highlighted under the 'Extensions' section.

6. Within a few minutes of setting up your account, the TrustedSite floating trustmark should appear on your store layouts. TrustedSite Pro users gain access to additional functionality:

- They can enable and customize Shopper Identity Protection in their admin dashboard, which will give shoppers the option to sign up for their free identity protection insurance after completing the checkout process.
- They can add TrustedSite and McAfee SECURE inline engagement trustmarks to their pages and layouts. For more information on this feature, visit the TrustedSite user dashboard.
