[Advance Ajax Login Extension for Magento® 2](#)

This is the Advance Ajax Login Extension user guideline for Magento® 2. This guide is here to help you in setting the extension in your Magento® based store.

The user guide includes introduction to the Advance Ajax Login Extension and configuration steps of the basic settings for your store. It is not only created for the use of developers but the store owners, business and others can also get to know about this extension for Magento® 2 and take the advantage of its features.

If you have a specific question on an element within Magento®, you can always contact M-Connect Media's developer team and we will provide with the customization solution and Support to answer your questions.

About Advance Ajax Login Extension

Are your customers are tired of waiting for login page or registration page to open? Is the login or create account page takes so long to reload or redirect? Do you want to eliminate this reload and redirect thing while login and registration? It is possible to do this with Advance Ajax Login Extension for Magento® 2.

Advance Ajax Login is the new extension developed for Magento® 2 based eCommerce stores. With this extension, the users can login and visitors can register from the page they are on without being redirected to other pages or page reload.

The login, register, forgot password form and logout confirmation appears in a pop up on the current page. The forms can be of two types: pop up in the center of the page or slide from right side of the screen. You can also set a page to which the users will be redirected once they are logged in, registered or logged out from your site.

Updates, Comments and Suggestions

We at M-Connect Media with the team of Magento® Certified Developers believe that it is the right of every customer to get the right Magento® solutions to their problems. We try to address every possible query asked by our customers along with taking a note of their suggestions.

For more information on our Magento® and eCommerce services, you can anytime contact us at support.mconnectmedia.com

Features of the Extension

The '**Advance Ajax Login Extension**' supports the following features:

- ❖ Two animated forms for Login and registration.
- ❖ Fast login and register without the page redirection or reload.
- ❖ The customer can be redirected to a defined page after login, register and logout.
- ❖ Easy to install and manage.
- ❖ The customer can login or register from any page of the website.
- ❖ Eliminates the default login and registration process of Magento.
- ❖ Can be customized as per the needs from the admin panel.

Benefits of Extension

- ❖ You can change the form type as per your need.
- ❖ The customers do not have to go to homepage for login or creating account.
- ❖ Saves the time as it eliminates the reload and redirected pages for login.
- ❖ The admin can set a page to which the customers will be redirected after login, registration or logout.

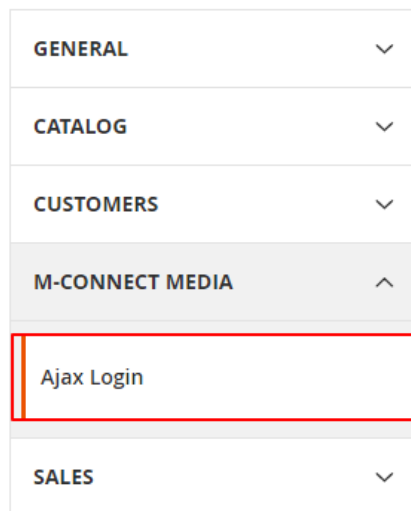

Configuration

To know how to install the 'Advance Ajax Login' extension visit our **video** section or you can also read our **installation guide**.

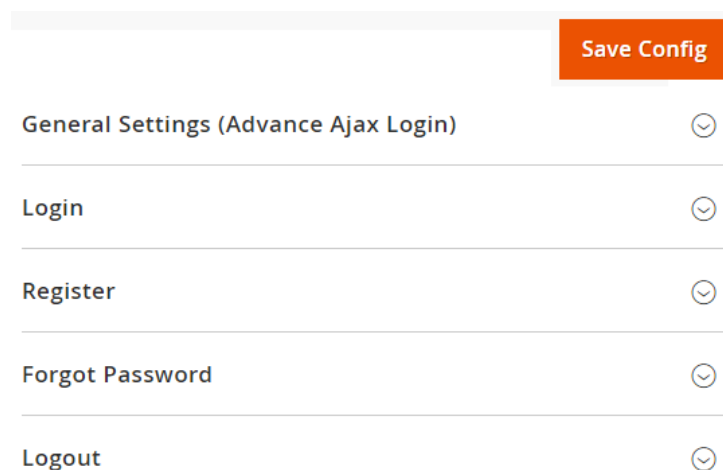

Before you proceed with using the extension, you need to do the configuration of the extension as shown below:

1. Navigate to **Stores > Configuration > MConnect Media > Ajax Login** in your Magento® Admin Panel.

Configuration

2. **Settings** Screen opens.

3. Here, you will be able to configure different forms for your store.

General Settings

General Settings (Advance Ajax Login)

Frontend Ui [store view]

- ❖ **Frontend Ui:** Select the type of form on the front end from 'Pop up' or 'Slide from Right'.

Login

Login

Enable [store view]

Redirect [store view]

Set redirect page after login

Success Message Text [store view]

Login Failed Message Text [store view]

- ❖ **Enable:** Select yes to enable this extension on your store front.
- ❖ **Redirect:** You can set the page where the user will be redirected after being logged into their accounts. You can redirect them to pages: **Same page**, **Dashboard**, **Homepage** or a **custom URL** page.
- ❖ **Success Message text:** Enter the message which you want to display after a user is successfully logged in their accounts.
- ❖ **Login Failed Message text:** Mention a text or message which appears whenever the user failed to login.

Register

Register

Enable <small>[store view]</small>	Yes	▼
Register Form Title <small>[store view]</small>	Register <small>(default Register)</small>	
Redirect <small>[store view]</small>	Customer Dashboard	▼
	<small>Set redirect page after register</small>

Redirect <small>[store view]</small>	Home Page	▼
	<small>Set redirect page after forgot password</small>	

- ❖ **Enable:** Choose to enable or disable this feature/form for the users who forget their login password.
- ❖ **Redirect:** You can redirect them to the **same page** from where they requested forgot password form, **home page** or a **custom URL page**.

Logout

Logout

Enable <small>[store view]</small>	Yes	▼
Redirect <small>[store view]</small>	Home Page	▼
Set redirect page after logout		
Logout Message Text <small>[store view]</small>	You are successfully logged out	

- ❖ **Enable:** Select to enable or disable this feature on your frontend.
- ❖ **Redirect:** You can redirect them to the **same page** from where they requested forgot password form, **home page** or a **custom URL page**.
- ❖ **Logout Message text:** Enter a message which will appear once the user is logged out from their account.

4. Click on '**Save Config**' to save the configuration settings.

Please enable default Magento® cache to get working extension.

Take a look of the extension effects at the storefront:

A screenshot of a Magento 2 storefront with a 'Login' pop-up form. The form has a title 'Login' and a close button 'X'. It contains two input fields: 'Email *' and 'Password *'. Below the fields are two buttons: 'Login' and 'Forgot Your Password?'. The background shows a blurred storefront image with text like 'Se', 'uma', 'fit a', and 'season'.

The login form pop up, appears on the same page from where your users clicked on Sign In.

Forget Password pop up appears when you click on 'forgot your password' link on the login pop up.

A screenshot of a Magento 2 storefront with a 'Forget Password' pop-up form. The form has a title 'Forget Password' and a close button 'X'. It contains a message: 'Please enter your email address below to receive a password reset link.' Below the message is an 'Email *' input field. At the bottom is a 'Reset My Password' button. The background shows a blurred storefront image with text like 'Default welcome', 'Se', 'Search', 'tion', and 'Get fit and look fab seasonal styles'.

A screenshot of a Magento 2 storefront with a 'Register' pop-up form. The form has a title 'Register' and a close button 'X'. It contains four input fields: 'First Name *', 'Last Name *', 'Email *', and 'Password *'. Below the 'Password *' field is a 'Password Strength: No Password' indicator. Below the 'Email *' field is a 'Confirm Password *' input field. At the bottom is a 'Create an Account' button. The background shows a blurred storefront image with text like 'Default welcome', 'Se', 'Search', 'tion', 't fab', and 'Ever'.

Your new visitors can register to your online store, when they click on 'Create an Account' option from the top right corner.

Apart from the pop up forms, you can also set these forms to 'slide from right' when the users click request to log in, register, forget password or logout.

The screenshot shows a 'Login' pop-up form with a close button (X) in the top right corner. It contains two input fields: 'Email *' and 'Password *'. Below the password field is a blue 'Login' button and a link that says 'Forgot Your Password?'. The background shows a blurred view of a website with text like 'New Luma Yoga Co', 'Get fit and lo', 'seasonal styl', and a 'Shop New Yoga' button.

The screenshot shows a 'Logout' pop-up form with a close button (X) in the top right corner. It displays a green checkmark icon and the text 'You are successfully logged out'. The background shows a blurred view of a website with the word 'shboard' visible.

This is the logout form pop up which appears when the users are successfully logged out from their accounts.
