Advanced FAQs Extension for Magento® 2 - User Guideline

This is the Advanced FAQs Extension user guideline for Magento® 2. This guide is here to help you in setting the extension in your Magento® based store.

The user guide includes introduction to the Advanced FAQs Extension and configuration steps of the basic settings for your store. It is not only created for the use of developers but the store owners, business and others can also get to know about this extension for Magento® 2 and take the advantage of its features.

If you have a specific question on an element within Magento®, you can always contact M-Connect Media's developer team and we will provide with the customization solution and Support to answer your questions.

About Advanced FAQs Extension

Do you think that most of your customers have some of the same queries or questions about your products and services? And are you tired of answering the same question again and again?

Advanced FAQs extension for Magento® 2 is the solution for this. It helps you create the most common or particular questions and their answers effectively and arrange them in a category. This make customers to search for the answers to their questions more effectively.

This gives a quick access to the customer's questions and their answers without much efforts.

Updates, Comments and Suggestions

We at M-Connect Media with the team of Magento® Certified Developers believe that it is the right of every customer to get the right Magento® solutions to their problems. We try to address every possible query asked by our customers along with taking a note of their suggestions.

For more information on our Magento® and eCommerce services, you can anytime contact us at support.mconnectmedia.com

Features of the Extension

The '**Advanced FAQs Extension**' supports the following features:

- ❖ Offers a category for the questions in the FAQ section.
- ❖ Mobile Friendly design
- ❖ Answers for questions related to products, services and policies.
- ❖ Set the number of questions per page.
- ❖ Show the questions and answers in a collapsible panel.
- ❖ Eliminates the loading of page when you select a FAQ category.
- ❖ Search any particular question within the FAQ page with the search box
- ❖ Choose to show the FAQ for products
- ❖ Option to set the FAQ toggle speed in milliseconds.

Benefits of Extension

- ❖ Easy to install and manage the extension from the backend.
- ❖ Customers can search the answers as per the category of questions.
- ❖ Saves the time for navigation and search.
- ❖ Customers can also search the questions with answers through the popular tags under the category on FAQ page

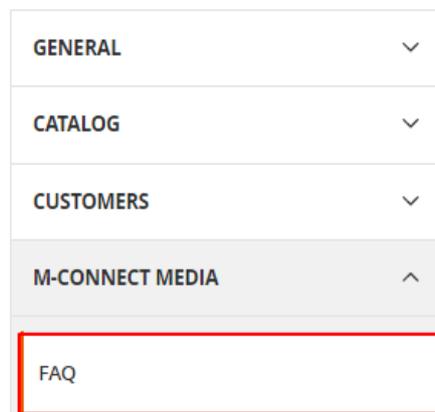

Configuration

To know how to install the 'FAQ' extension visit our **video** section or you can also read our **installation guide**.

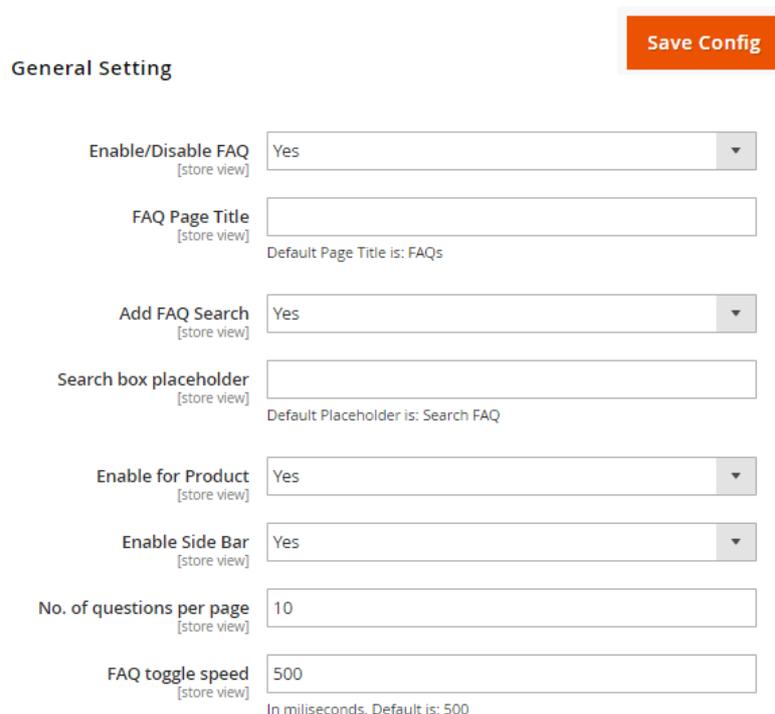

Before you proceed with using the extension, you need to do the configuration of the extension as shown below:

1. Navigate to **Stores > Configuration > M-Connect Media > FAQ** in your Magento® 2 Admin Panel.

Configuration

2. **Settings** Screen opens. Here, you will be able to configure different forms for your store.

A screenshot of the 'General Setting' configuration screen for the FAQ extension. The screen has a 'Save Config' button in the top right corner. The settings are as follows:

- Enable/Disable FAQ** [store view]: Yes
- FAQ Page Title** [store view]: (empty field, Default Page Title is: FAQs)
- Add FAQ Search** [store view]: Yes
- Search box placeholder** [store view]: (empty field, Default Placeholder is: Search FAQ)
- Enable for Product** [store view]: Yes
- Enable Side Bar** [store view]: Yes
- No. of questions per page** [store view]: 10
- FAQ toggle speed** [store view]: 500 (In milliseconds. Default is: 500)

- ❖ **Enable/Disable FAQ:** Select yes to enable this extension on your store front.
- ❖ **FAQ Page Title:** You can give a title to the page for FAQs from this field of the settings. The default title for the page will be FAQs, if this field is left blank.
- ❖ **Add FAQ search:** Enable or disable the search option on your FAQ pages. Your customers can find the answers by typing the specific keywords or the whole question in the search box.
- ❖ **Search box placeholder:** You can give the search box a statement which will appear inside the search box. The default placeholder is **Search FAQ**.
- ❖ **Enable for Product:** Select yes to activate the FAQ page for the products of your store.
- ❖ **Enable Side bar:** Select yes to enable the side bar on the FAQ page.
- ❖ **No. of questions per page:** Define the number of questions to appear on each page of FAQ section.
- ❖ **FAQ toggle speed:** Set the toggle speed in milliseconds for the FAQ page from this field. The default toggle speed is 500 milliseconds.

3. Click on '**Save Config**' to save the configuration settings.

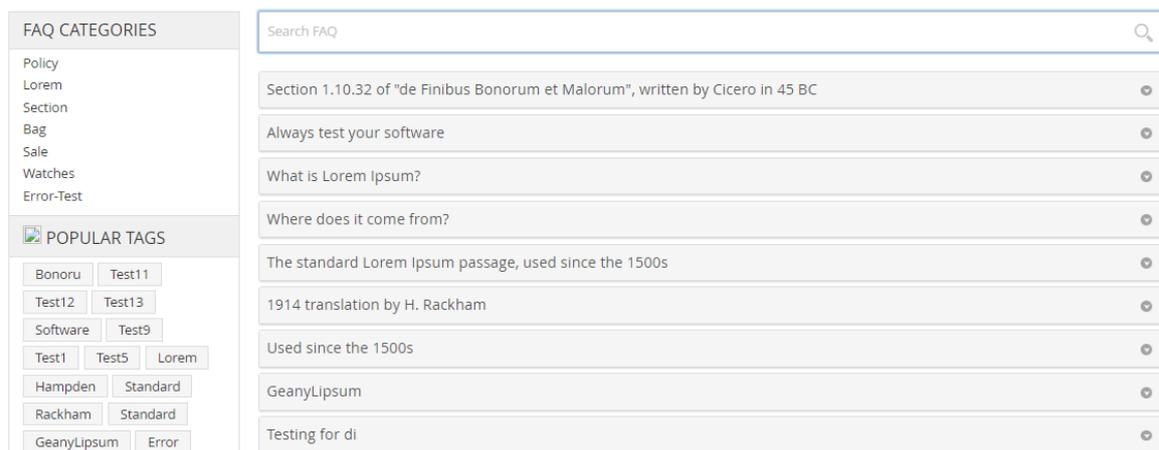

Take a look of the extension effects at the storefront:

You can find the FAQ page option at the bottom of every webpage:

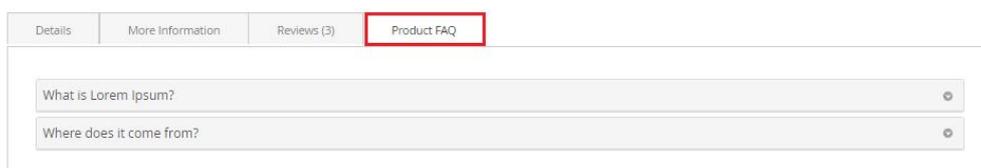

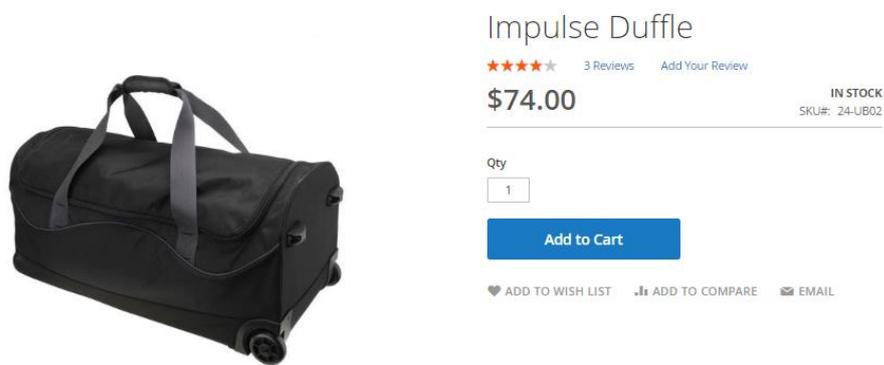

FAQ page opens once you click on the above FAQ option from any of your webpage. It shows category, tags, search box and defined number of questions on every FAQ page.
