1. [Extension Installation Guide](#)
2. [Configuration](#)
3. [Google One Tap Sign-in Prompt in Frontend](#)
4. [Customer Account Auto Creation in Backend](#)

1. Extension Installation

- Create a folder structure in Magento root as app/code/Meetanshi/OneTap
- Download and extract the zip folder and upload our extension files to the app/code/Meetanshi/OneTap via FTP.
- Login to your SSH and run below commands step by step:
 - php bin/magento setup:upgrade
 - For Magento version 2.0.x to 2.1.x - php bin/magento setup:static-content:deploy
 - For Magento version 2.2.x & above - php bin/magento setup:static-content:deploy -f
 - php bin/magento cache:flush

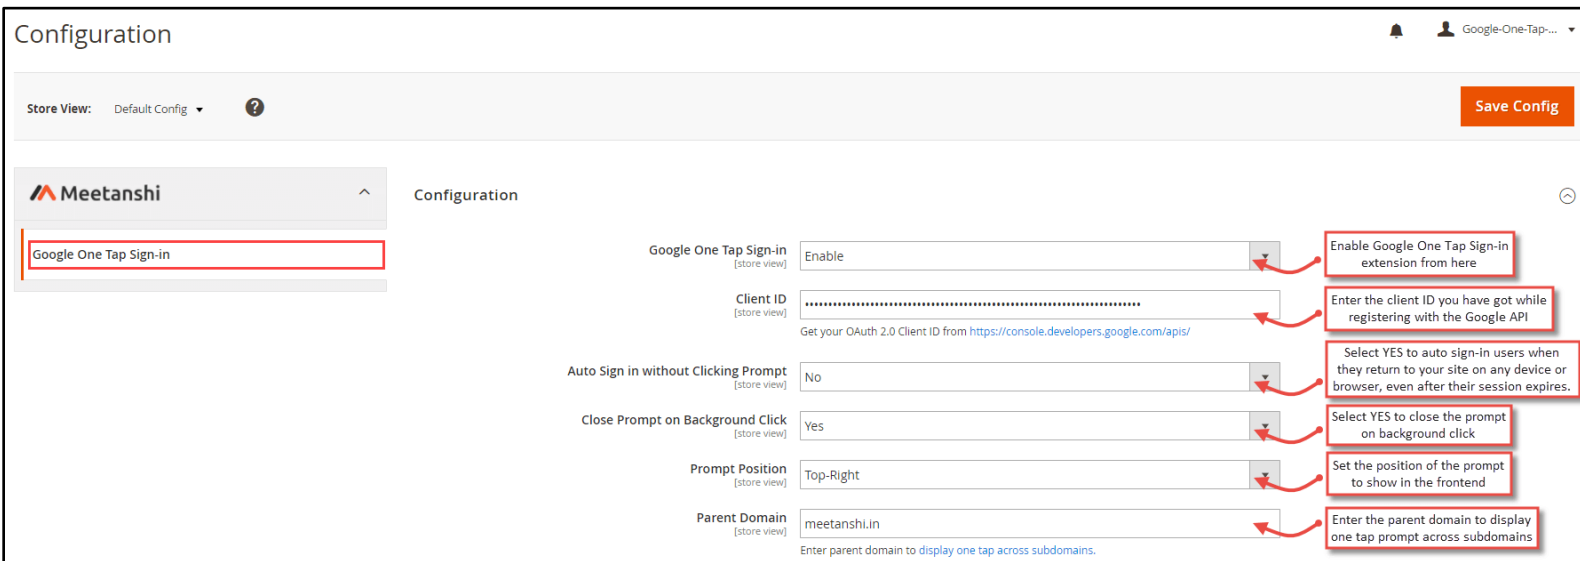

2. Configuration

To configure the extension, login to Magento 2 backend, move to **Stores → Configuration → Meetanshi → Google One Tap Sign-in** where you can find various settings to configure the extension.

- **Google One Tap Sign-in:** Enable or disable the extension from here.
- **Client ID:** Get your client ID from <https://console.developers.google.com/apis>. Follow the steps to [get your Google API client ID](#). Don't forget to [configure OAuth consent screen](#) to show privacy policy and terms of service links in Google one tap sign-in prompt.
- **Auto Sign-in Without Clicking Prompt:** Select YES to auto sign-in users when they return to your site even after their session expires.
- **Close Prompt on Background Click:** Select YES to close the Google one tap prompt on background click.
- **Prompt Position:** Set one of the preferred Google one tap prompt positions.

Note: As mentioned in <https://developers.google.com/identity/gsi/web/guides/change-position>, `data-prompt_parent_id` attribute is ignored on mobile web browsers and thus, the position you set above will not affect the prompt position in the mobile devices.

- **Parent Domain:** Enter parent domain to [display one tap across subdomains](#).

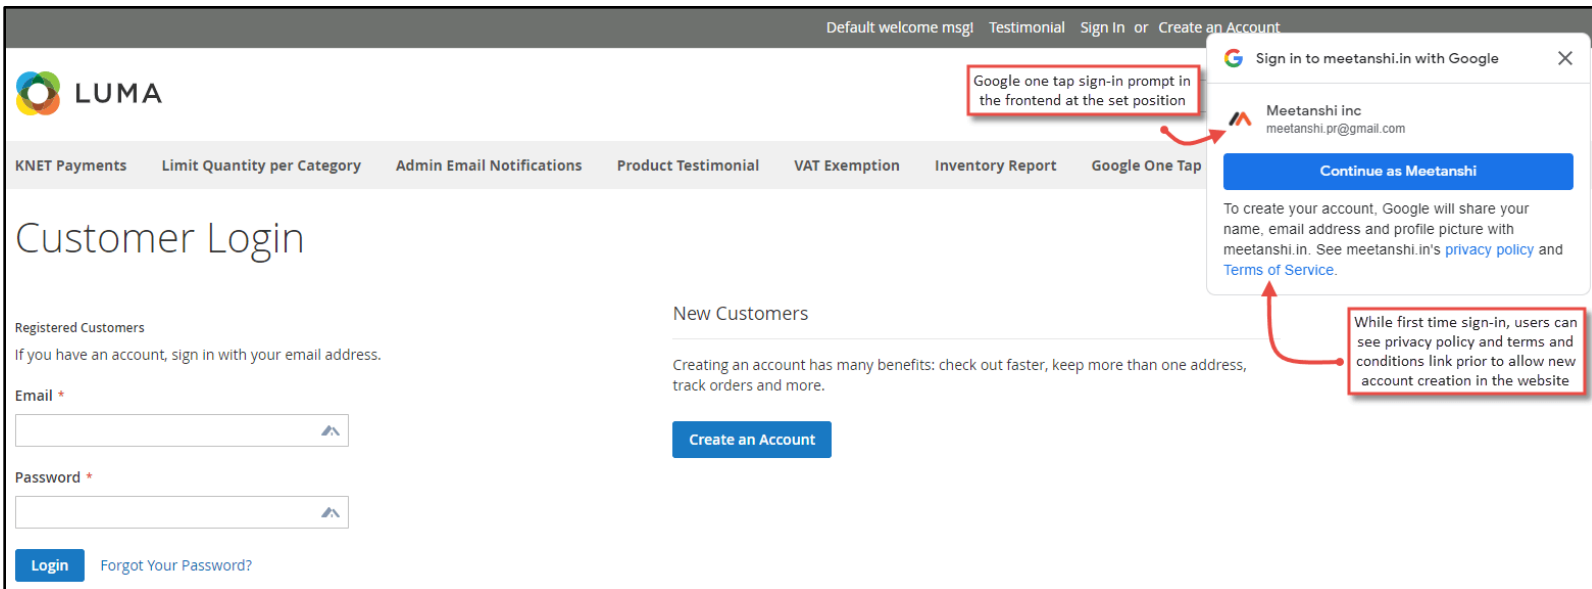

The screenshot shows the 'Configuration' page for the 'Google One Tap Sign-in' extension. The settings are as follows:

- Google One Tap Sign-in:** Set to 'Enable'. A red box highlights this dropdown, with an arrow pointing to a text box: 'Enable Google One Tap Sign-in extension from here'.
- Client ID:** A text field containing a client ID. A red box highlights this field, with an arrow pointing to a text box: 'Enter the client ID you have got while registering with the Google API'. Below the field is the text: 'Get your OAuth 2.0 Client ID from <https://console.developers.google.com/apis/>'.
- Auto Sign in without Clicking Prompt:** Set to 'No'. A red box highlights this dropdown, with an arrow pointing to a text box: 'Select YES to auto sign-in users when they return to your site on any device or browser, even after their session expires.'
- Close Prompt on Background Click:** Set to 'Yes'. A red box highlights this dropdown, with an arrow pointing to a text box: 'Select YES to close the prompt on background click'.
- Prompt Position:** Set to 'Top-Right'. A red box highlights this dropdown, with an arrow pointing to a text box: 'Set the position of the prompt to show in the frontend'.
- Parent Domain:** Set to 'meetanshi.in'. A red box highlights this text field, with an arrow pointing to a text box: 'Enter the parent domain to display one tap prompt across subdomains'. Below the field is the text: 'Enter parent domain to [display one tap across subdomains](#)'.

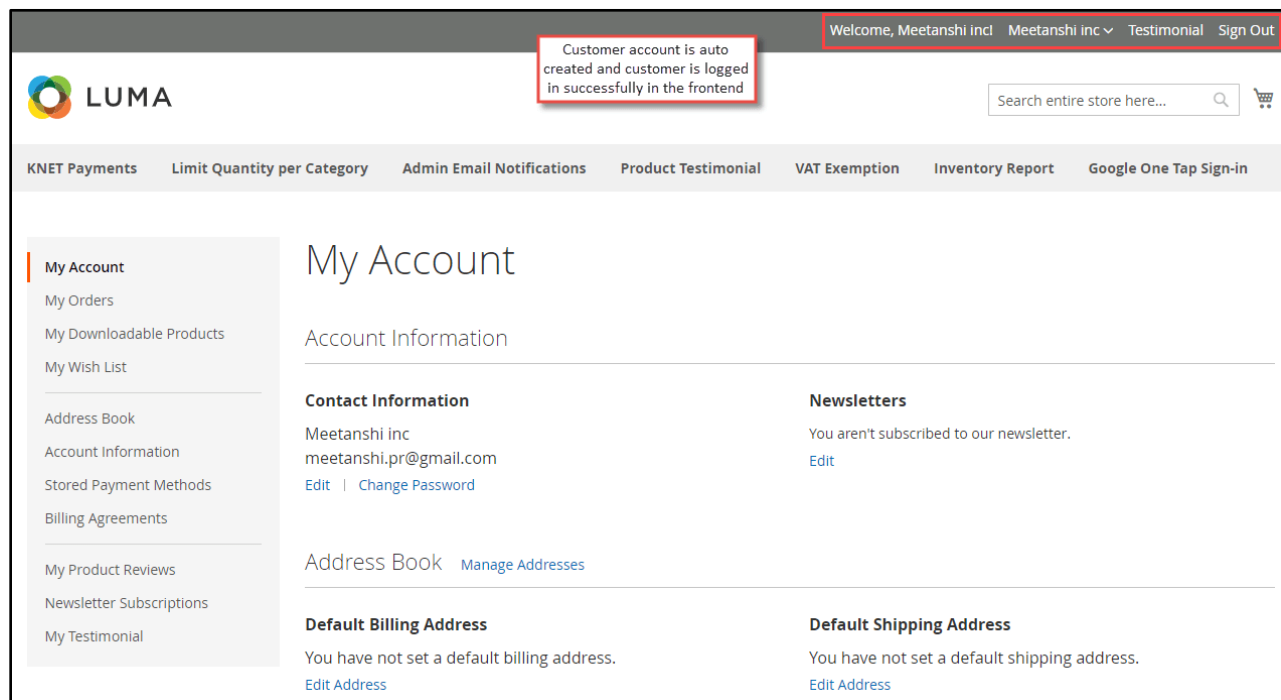

3. Google One Tap Sign-in Prompt in Frontend

Once you have configured the extension successfully, if the user is logged in to the Google account in a browser, he/she can see Google One Tap Sign-in prompt on the [Magento 2 Sign-in](#) page in the set position. The Google one tap sign-in prompt contains a link to privacy policy and terms of service if added during [configuration of the OAuth consent screen](#) while getting the [client ID](#). Also, it contains a button to continue sign-up or sign-in with the preferred Google account.

• Google One Tap Login Successful

Immediately after the user selects a Google account to sign-up or login, if the user is new, he will be logged in and redirected to the My Account page and a new customer account is auto created in the Magento 2 backend. If the customer is a returning one, he'll be auto logged in on clicking prompt.

4. Customer Account Auto Creation in Backend

If the user is new while using the Google one tap sign-in prompt, the customer account is auto created in the Magento 2 admin panel. The admin can see a new customer created under **Customers > All Customers** grid.

Customers admin

The admin can see new customer account is auto created in the backend after successful one tap sign-up
