2. [Configuration](#)
3. [Setting Custom Price for Products](#)
4. [Custom Price in Frontend](#)

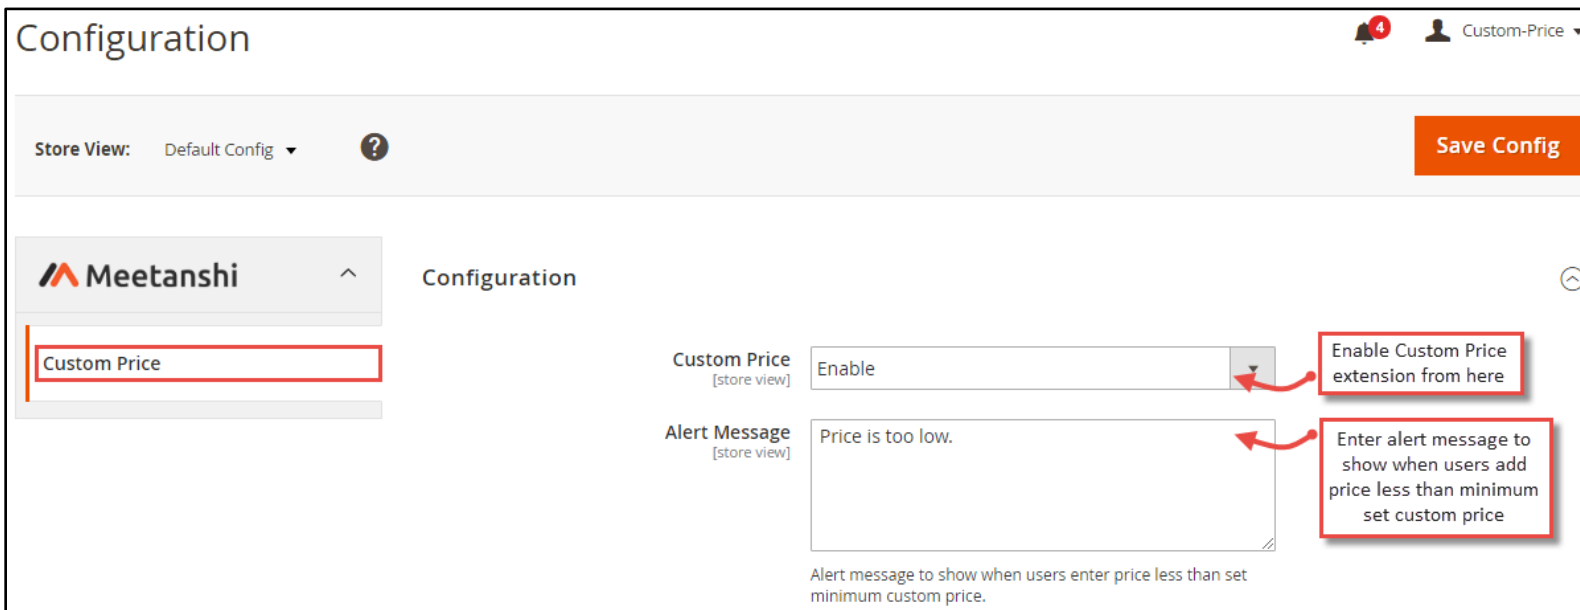

1. Extension Installation

- Create a folder structure in Magento root as app/code/Meetanshi/CustomPrice
- Download and extract the zip folder and upload our extension files to the app/code/Meetanshi/CustomPrice via FTP.
- Login to your SSH and run below commands step by step:
 - php bin/magento setup:upgrade
 - For Magento version 2.0.x to 2.1.x - php bin/magento setup:static-content:deploy
 - For Magento version 2.2.x & above - php bin/magento setup:static-content:deploy -f
 - php bin/magento cache:flush

2. Configuration

For configuring the extension, login to Magento 2, move to **Stores** → **Configuration** → **Custom Price** where you can find various settings to enable the extension.

- **Custom Price:** Enable or disable the Custom Price extension from here.
- **Alert Message:** Enter alert message to show when users add lesser price than added minimum custom price.

Custom Price [store view] Enable

Alert Message [store view] Price is too low.

Alert message to show when users enter price less than set minimum custom price.

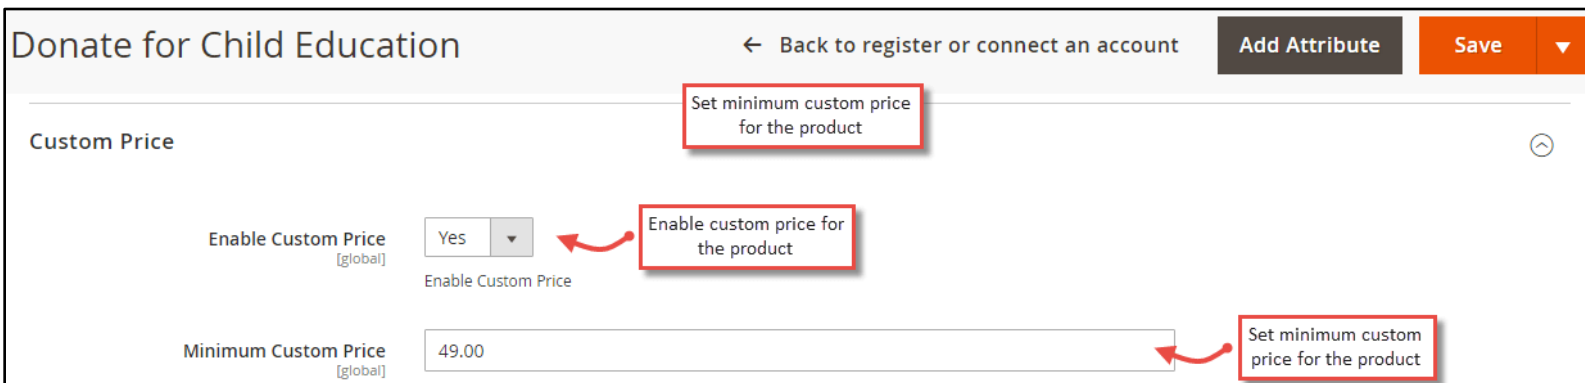

Enable Custom Price extension from here

Enter alert message to show when users add price less than minimum set custom price

3. Setting Custom Price for Products

Once you enable the extension, you need to enable custom price for products you want to allow. Navigate to **Catalog** → **Products** and select the product for which you want to enable custom price. **Edit** product and find **Custom Price** tab under which you can make necessary settings.

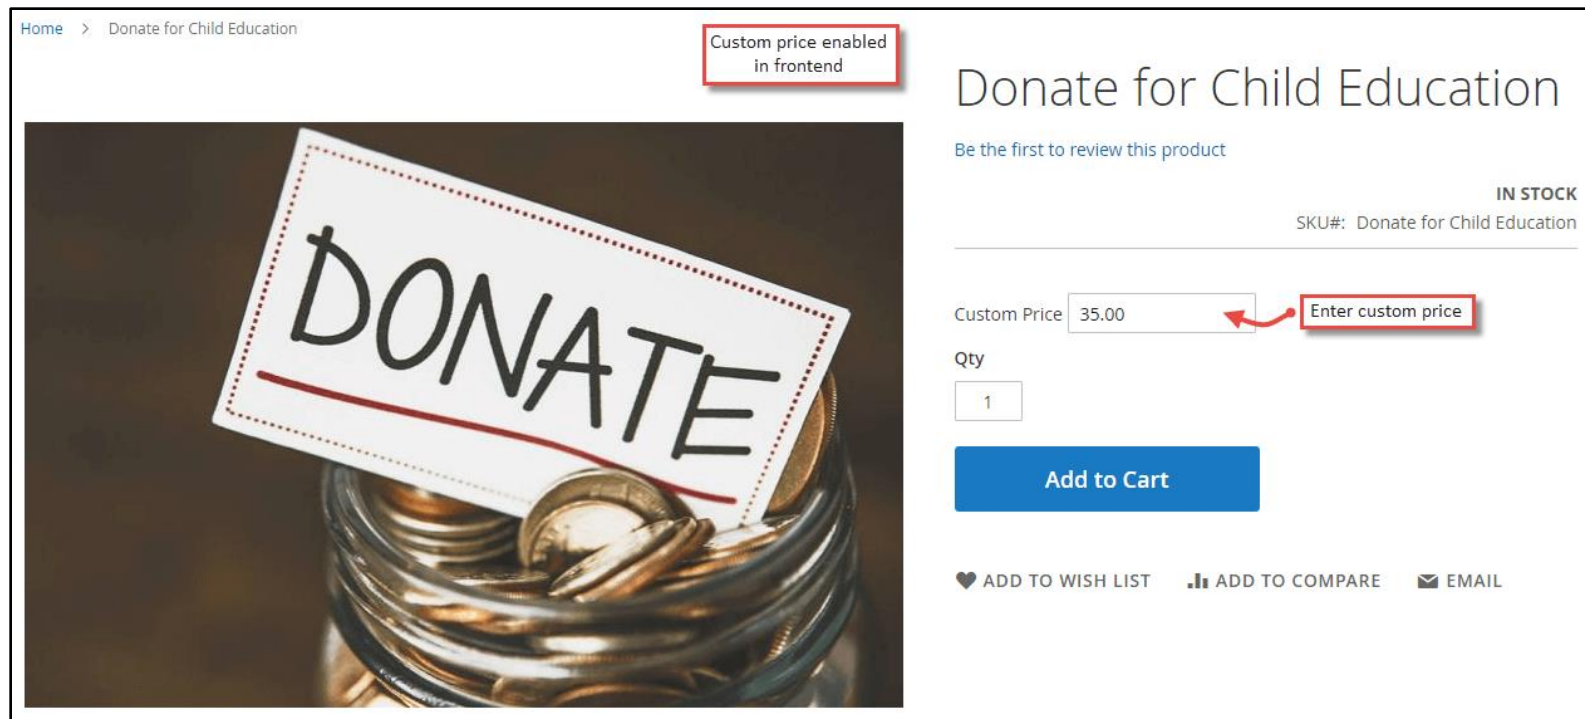

- **Enable Custom Price:** Set YES to enable custom price for the selected product.
- **Minimum Custom Price:** Set minimum price for the product to allow checkout as custom price in frontend.

The screenshot shows the 'Custom Price' configuration for the product 'Donate for Child Education'. The 'Enable Custom Price' dropdown is set to 'Yes'. The 'Minimum Custom Price' is set to '49.00'. Red boxes and arrows highlight the 'Set minimum custom price for the product' label above the minimum price field and the 'Enable custom price for the product' label next to the 'Yes' dropdown.

4. Custom Price in Frontend

Once you have configured the extension successfully, whenever users add products with custom price into the shopping cart, it checks for the minimum price set and then allows checkout.

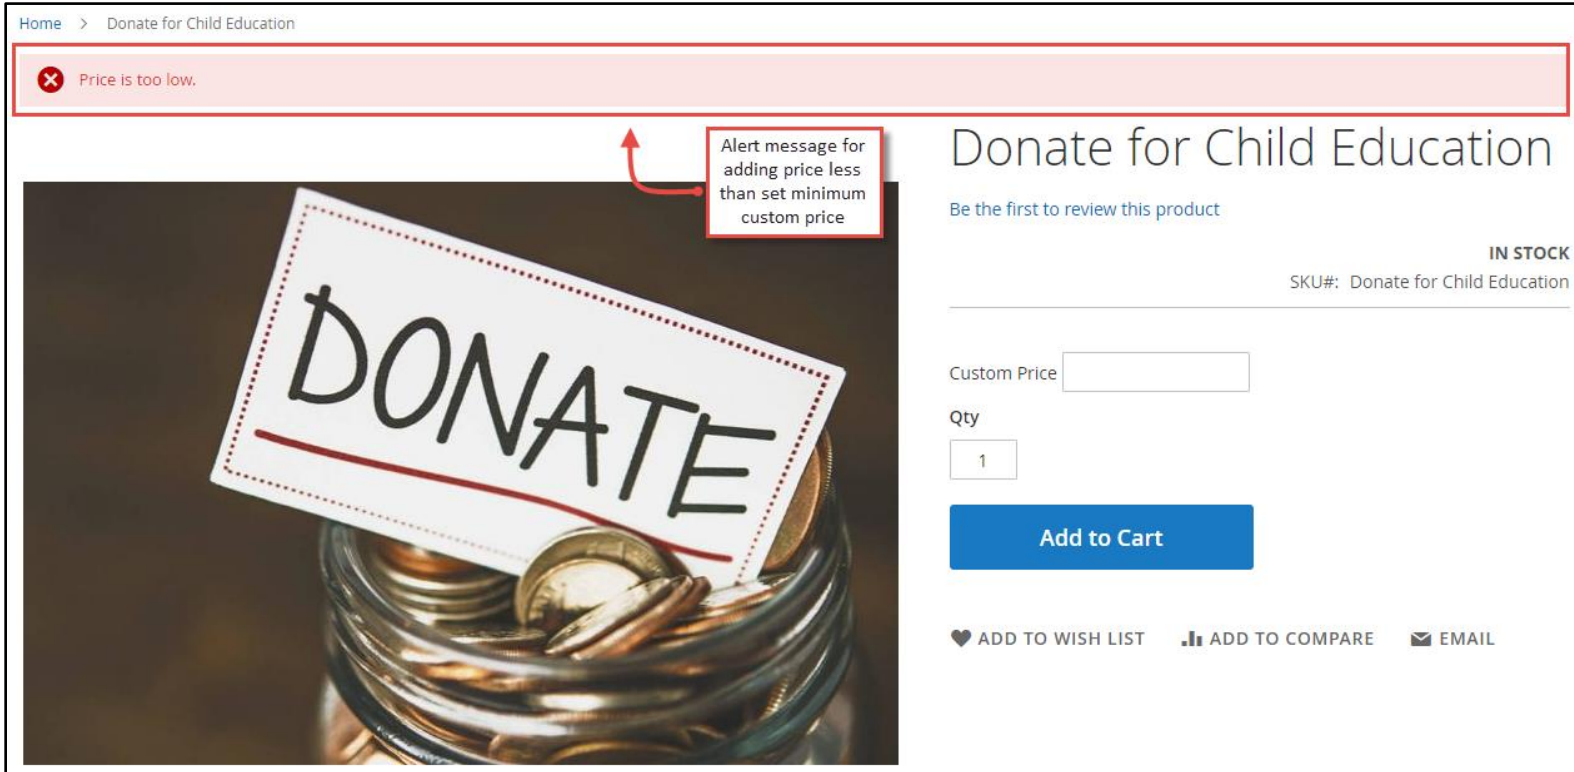

The screenshot shows the product page for 'Donate for Child Education' in the frontend. A 'DONATE' sign is placed on a jar of coins. The product is 'IN STOCK' with SKU# 'Donate for Child Education'. The 'Custom Price' is set to '35.00', and a red box highlights the 'Enter custom price' label next to the input field. The 'Add to Cart' button is visible, along with 'ADD TO WISH LIST', 'ADD TO COMPARE', and 'EMAIL' options. A red box also highlights 'Custom price enabled in frontend' in the top right corner.

- **Alert Message**

If customers add custom price less than set minimum price, they get an alert message as set from the backend.

Home > Donate for Child Education

 Price is too low.
