

# Duplicate CMS Page & Block for Magento 2

## User Guide

### Table of Content

1. [Extension Installation Guide](#)
2. [Duplicate CMS Page](#)
3. [Duplicate CMS Block](#)

## 1. Extension Installation

- Create a folder structure in Magento root as app/code/Meetanshi/DupPageBlock
- Download and extract the zip folder and upload our extension files to the app/code/Meetanshi/DupPageBlock via FTP.
- Login to your SSH and run below commands step by step:
  - php bin/magento setup:upgrade
  - For Magento version 2.0.x to 2.1.x - php bin/magento setup:static-content:deploy
  - For Magento version 2.2.x & above - php bin/magento setup:static-content:deploy -f
  - php bin/magento cache:flush

## 2. Duplicate CMS Page

Login to Magento 2, move to **Content** → **Pages** where you can find a grid with the pages.

- **Duplicate Individual Page from the Grid**

The grid has the list of pages with the action column. On click of “Select” action you can find the “Duplicate” action for the page.

- **Duplicate Page Creation Success Message**

Once you click the button to create a duplicate page, the extension auto duplicates the CMS page and redirects you to the newly duplicated page set with the disabled status. Also, the page is assigned with a different URL key for the uniqueness.

The screenshot displays the Magento CMS page editor interface. At the top, the page title is "Home page". A notification box in the top right corner states "Duplicate page creation success message". Below the notification, a toolbar contains buttons for "Back", "Delete Page", "Duplicate Page", and "Save". A yellow success message banner reads "✓ The duplicate page is created". The "Enable Page" section shows a toggle switch set to "No", with a callout box stating: "After the duplication of the page, the user gets redirected to the duplicated page and by default, the page status is set to disabled". The "Page Title" field contains "Home page". The "Content" section is collapsed. The "Search Engine Optimization" section is expanded, showing the "URL Key" field with the value "home-1548826910" and a callout box stating: "Unique URL key is assigned to the newly created page". The "Meta Title" and "Meta Keywords" fields are empty.

### 3. Duplicate CMS Block

To duplicate CMS blocks, move to **Content** → **Blocks** where you can find a grid with the blocks.

- **Duplicate Individual Block from the Grid**

The grid has the list of blocks with the action column. On click of “Select” action you can find the “Duplicate” action for the block.

Test Block for CMS Page.

- **Duplicate Block Creation Success Message**

Once you click the button to create a duplicate block, the extension auto duplicates the block and redirects you to the newly duplicated CMS block set with the disabled status. Also, the block is assigned with a different identifier for the uniqueness.

The screenshot displays the Magento CMS block editor interface. At the top, a success message "Duplicate block creation success message" is highlighted in a red box. Below this, a yellow banner confirms "The duplicate block is created". The block configuration section includes:

- Enable Block:** A toggle switch is set to "No". A red arrow points to this toggle with the text: "After the duplication of the block, the user gets redirected to the duplicated block and by default, the block status is set to disabled".
- Block Title:** A text input field containing "Test".
- Identifier:** A text input field containing "test-1548825542". A red arrow points to this field with the text: "Unique identifier is assigned to the newly created block".
- Store View:** A dropdown menu showing "All Store Views", "Main Website", "Main Website Store", and "Default Store View".

At the bottom, there is a "Show / Hide Editor" button and a rich text editor toolbar. The content area below the toolbar contains the text "Test Block for CMS Page."
