

Force Login for Magento 2

User Guide

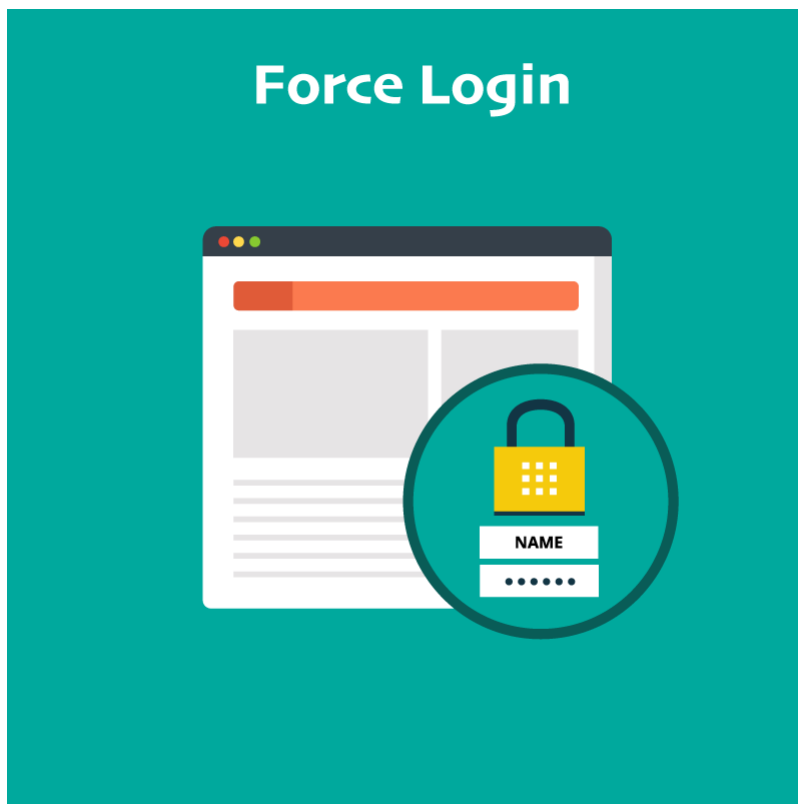

Table of Content

1. [Extension Installation Guide](#)
2. [Configuration](#)
3. [Force Login in Frontend](#)

1. Extension Installation

- Create a folder structure in Magento root as app/code/Meetanshi/ForceLogin
- Download and extract the zip folder and upload our extension files to the app/code/Meetanshi/ForceLogin via FTP.
- Login to your SSH and run below commands step by step:
 - php bin/magento setup:upgrade
 - For Magento version 2.0.x to 2.1.x - php bin/magento setup:static-content:deploy
 - For Magento version 2.2.x & above - php bin/magento setup:static-content:deploy -f
 - php bin/magento cache:flush

2. Configuration

For configuring the extension, login to Magento 2, move to **Stores → Configuration → Force Login** where you can find various settings to enable the extension.

- **Force Login:** Enable the Force Login extension from here.
- **Alert Message:** Enter the alert message to show when the force login is enabled.
- **Select Pages:** Select pages to enable force login for.
- **Enable Force Login on Other Pages:** Select YES to enable force login on other pages.
- **Enable Force Login on CMS Pages:** Select YES to enable force login on CMS pages.
- **Select CMS Pages:** Select CMS pages to enable force login for.
- **Redirect After Login:** Select a page or URL to redirect customers after login.

Previous URL

Select page or URL to redirect users after login

Select to redirect users after login.

3. Force Login in Frontend

Once the extension is enabled, whenever a user go to the page for which force login is enabled, he gets automatically redirected to the login page with alert message to enter credentials and login to view the page.

The screenshot shows the LUMA Customer Login page. At the top right, there is a navigation bar with the text "Default welcome msg! Sign In or Create an Account". The LUMA logo is on the top left. A search bar with the placeholder "Search entire store here..." and a shopping cart icon is on the top right. The main heading is "Customer Login". A red alert message box at the top of the login area says "Please log in to view this page!". A red box highlights the text "Users are automatically redirected to the login page when they go to the pages enabled for force login". A red arrow points from this box to the alert message. The page is divided into two columns: "Registered Customers" and "New Customers". The "Registered Customers" section has a heading "Registered Customers" and the text "If you have an account, sign in with your email address." Below this are input fields for "Email *" and "Password *", and a "Sign In" button. A link "Forgot Your Password?" is next to the "Sign In" button. The "New Customers" section has a heading "New Customers" and the text "Creating an account has many benefits: check out faster, keep more than one address, track orders and more." Below this is a "Create an Account" button. At the bottom left, there is a note "* Required Fields".

- **Redirection After Login**

Once the user adds credentials and log in, he automatically gets redirected to the page or URL set from the backend.

Welcome, John Doe! John Doe ▾

After login, customers are automatically redirected to the set page or URL

Search entire store here...
