## 1. Extension Installation

- Extract the zip folder and upload our extension to the root of your Magento 2 directory via FTP.
- Login to your SSH and run below commands step by step:
  - php bin/magento setup:upgrade
  - For Magento version 2.0.x to 2.1.x - php bin/magento setup:static-content:deploy
  - For Magento version 2.2.x & above - php bin/magento setup:static-content:deploy -f
  - php bin/magento cache:flush
- That's it.

## 2. Configuration

For configuring the extension, log in to Magento 2, move to **Stores → Configuration → Maintenance Page** where you can find various settings to enable the extension.

- **Maintenance Page:** Enable or disable Maintenance Page extension from here.
- **Whitelist IPs:** Enter comma separated IPs to be whitelisted.
- **Allowed URLs:** Enter URLs you want to allow access from the frontend.
- **Redirect to Page:** Select the maintenance page to which you want to redirect visitors.
- **Select Page Template:** Select the template for the maintenance page.
