4. [Quantity Dropdown in Frontend](#)

1. Extension Installation

- Find the Composer name and version of the extension in the extension's composer.json file.
- Login to your SSH and run:
 - `composer require meetanshi/magento2-quantity-dropdown`
- Enter your [authentication keys](#). Your public key is your username; your private key is your password.
- Wait for Composer to finish updating your project dependencies and make sure there aren't any errors.
- To verify that the extension installed properly, run the command:
 - `php bin/magento module:status Meetanshi_QuantityDropdown`
- By default, the extension is probably disabled.
- Enable the extension and clear static view files:
 - `php bin/magento module:enable Meetanshi_QuantityDropdown --clear-static-content`
 - `php bin/magento setup:upgrade`
 - For Magento version 2.0.x to 2.1.x - `php bin/magento setup:static-content:deploy`
 - For Magento version 2.2.x & above - `php bin/magento setup:static-content:deploy -f`
 - `php bin/magento cache:flush`

2. Configuration

To configure the extension, login to Magento 2 backend, move to **Stores → Configuration → Quantity Dropdown** where you can find various settings to configure the extension.

- **Quantity Dropdown:** Enable the Quantity Dropdown extension from here.
- **Dropdown Type:** Select the dropdown type.
- **Max Quantity Value:** Set quantity value to show maximum product quantity in the dropdown for increment type.
- **Custom Value:** Add comma separated custom product quantity values for custom value dropdown type.
- **Show Price in Dropdown:** Select how you want to show product prices in the dropdown.
- **Hide Quantity Value Which is Larger Than Stock Quantity:** Select how to show quantity when value is larger than stock.

Configuration

Store View: Default Config ?

Save Config

Meetanshi Configuration

3. Product Specific Quantity Dropdown Settings

Follow the below steps to configure specific settings for each or some products in the store.

- **Quantity Dropdown Type:** Set the quantity dropdown type particularly for the selected product.
- **Custom Value:** Set the custom value if the quantity dropdown type is set to custom value.

The screenshot shows the 'Test' product configuration page in Magento 2. At the top right, there are buttons for 'Back to register or connect an account', 'Add Attribute', and 'Save'. A red box highlights the 'Product specific Quantity Dropdown settings' section. The form includes the following fields:

- Product Name** [store view]: Test
- SKU** [global]: Test
- Price** [global]: \$ 100.00 (with a link to 'Advanced Pricing')
- Tax Class** [website]: Taxable Goods
- Quantity Dropdown Type** [store view]: Custom Value (with a red box and arrow pointing to the dropdown menu and a callout: 'Select quantity dropdown for this product')
- Custom Value (x,y,z)** [store view]: 1,7,8,10,15,25,75,100,130,150 (with a red box and arrow pointing to the input field and a callout: 'Add custom value to show in quantity dropdown')
- Quantity** [global]: 100 (with a link to 'Advanced Inventory')

4. Quantity Dropdown in Frontend

Once the extension is configured, the Quantity Dropdown is seen enabled on the product pages.

- **Quantity Dropdown Increment Value Type**

As per the general configuration, the increment value type quantity dropdown is enabled on product page.

- 16 for total \$800
- 17 for total \$850

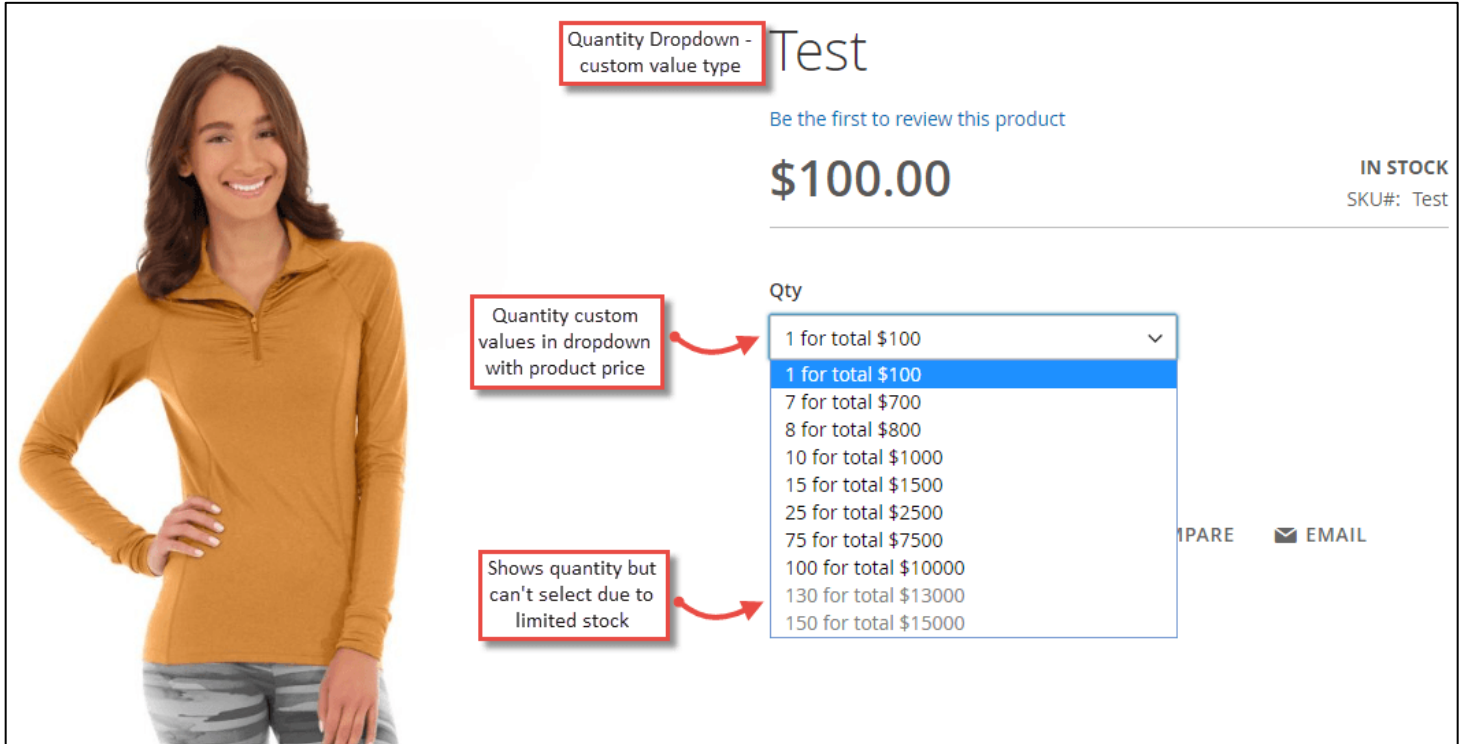

Quantity increment values in dropdown with product price

Shows quantity but can't select due to limited stock

COMPARE EMAIL

- **Quantity Dropdown Custom Value Type**

As we have set custom value type dropdown for this particular product, it overrides the general configuration for it and shows dropdown accordingly.

- **Quantity Dropdown for Grouped Product Type**

The quantity dropdown is compatible with grouped product type as well. The admin has to set quantity dropdown for each child product and it gets shown in the frontend.
