

User Guide - Mercado Pago for Magento

Credentials	2
Order Management	3
Custom Checkout - Credit and Debit Card	4
Custom Checkout - Offline Payment Methods (Ticket)	5
Checkout Pro	6

Credentials

This process will explain how to configure the module to accept payments with Mercado Pago.

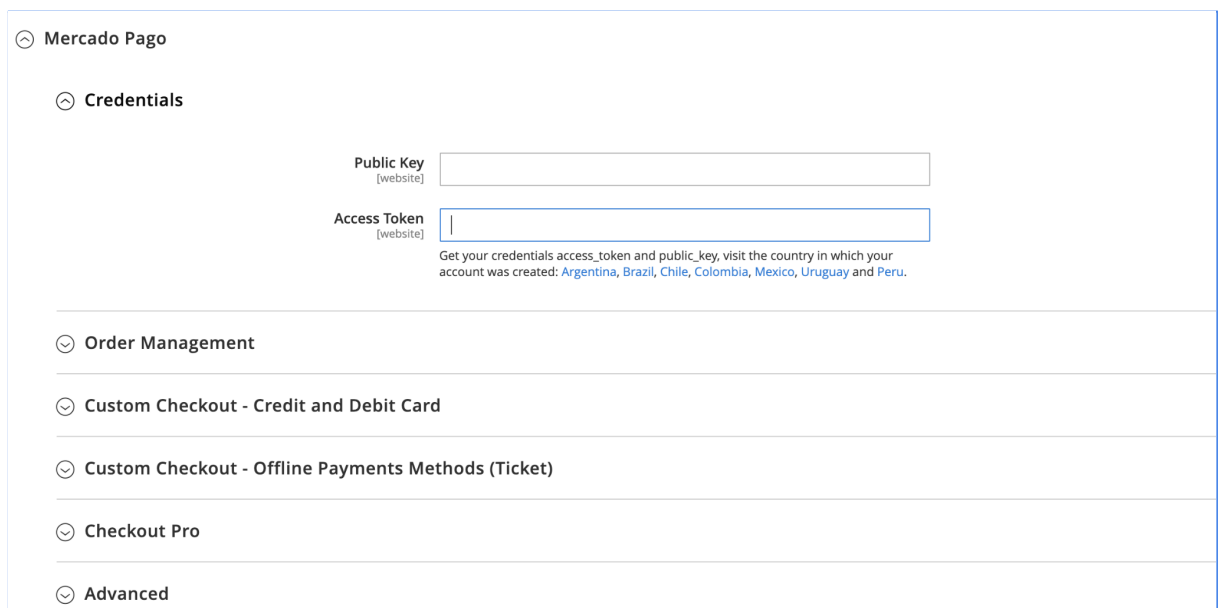

1. Go to Stores > Configuration > Sales > Payment Methods.
2. To set up the credentials go to Mercado Pago > Credentials, you will see the field Public Key and Access Token. Get your credentials in the Credentials section.

There are two types of credentials:

- **Trial credentials:** The credentials in this way are used for testing.

Public Key **TEST-c601e877-8fe7-4daa-9720-fa54d9b412e3**
Access Token **TEST-2292075335436703-090319-4b85e43a92ca593857ff9a29bcf965f9-667884398**

- **Productive credentials:** The credentials in this way are used to receive payments in production. To use the credentials of the production mode you must activate your credentials.

The screenshot shows the 'Mercado Pago' configuration page with the 'Credentials' section expanded. It contains two input fields: 'Public Key [website]' and 'Access Token [website]'. Below the fields is a note: 'Get your credentials access_token and public_key, visit the country in which your account was created: [Argentina](#), [Brazil](#), [Chile](#), [Colombia](#), [Mexico](#), [Uruguay](#) and [Peru](#).' The left sidebar shows a list of menu items: 'Mercado Pago', 'Credentials', 'Order Management', 'Custom Checkout - Credit and Debit Card', 'Custom Checkout - Offline Payments Methods (Ticket)', 'Checkout Pro', and 'Advanced'.

3. With your credentials filled, you need to enable payment methods, check the next steps

Order Management

This process will explain how to configure update of order status in Magento according to Mercado Pago.

1. In Payment Methods > Mercado Pago > Order Management: For each payment status you can choose an order status, as soon as your store receives the payment notification the module will automatically update the order to the chosen status.

Obs: The module is prepared to receive payment notifications automatically, that is, without the need to configure your Mercado Pago account or module.

Custom Checkout - Credit and Debit Card

This process will explain how to configure the module to accept payments with Custom Checkout.

1. In Payment Methods > Mercado Pago > Custom Checkout - Credit and Debit Card
2. Enable payment methods. Click and check Enable as Yes.
3. The other fields have a description with their functionalities.

⊖ Mercado Pago

⊖ Credentials

⊖ Order Management

⊖ Custom Checkout - Credit and Debit Card

Enabled
[website] Yes

It is a requirement that you have a SSL certificate, and the payment form to be provided under an HTTPS page. During the sandbox mode tests, you can operate over HTTP, but for homologation you'll need to acquire the certificate in case you don't have it.

Payment Title
[store view] Credit Card - Mercado Pago

Statement Descriptor
[store view]

Text that will identify the payment on the credit card invoice, this functionality is limited to some countries.

Binary Mode
[website] No

This functionality will mark the payment to approve or reject at the time it is created, there will be no intermediate status pending.

Banner Checkout
[website]

By default the module of Mercado Pago will configure a banner with the methods available according to your country, in case you want to customize it simply change the url of the image.

Checkout Position
[store view] -4

This setting will be the position in which the payment method will be available to the buyer.

4. Very good! The Checkout Pro has been configured and enabled successfully!

Custom Checkout - Offline Payment Methods (Ticket)

This process will explain how to configure the module to accept payments with Custom Checkout - Offline.

1. In Payment Methods > Mercado Pago > Custom Checkout - Offline Payment Methods (Ticket)
2. Enable payment methods. Click and check Enable as Yes.
3. The other fields have a description with their functionalities.

⊖ Mercado Pago

- ⊖ Credentials
