

Display Discount

From

Mage Extensions Shop

Display discount extension admin settings

In admin go to **Stores -> Configuration -> Display Discount (Left menu under MES tab)**. You will have following screen.

Display Discount: Yes for enable extension

Select Display Type: Display in amount or Display in percentage. If select display in amount then it display discount difference in amount. (eg. Price \$50, Special price \$25 then it display 25) In case of display discount percentage it will display 50%.

Add Text: You can set custom text from admin. It will display near discounted amount.

Select Display Position: You can choose display before or display after. In case of display before <Your text> discount. In case of display after discount <Your text>.

Text Color: You can select any color from color picker. Whole text and discount display in selected color.
