

Installation guide

Before installation it is recommended take backup of your website.

Disable compilation and cache.

Extract zip file.

Create following directory structure

Magento root/app/code/MES/MachineSearch

Upload content of MachineSearch folder content at above path.

For enable module open command line in folder root of your magento

Run following command

```
php bin/magento module:enable MES_MachineSearch
```

OR

You can add 'MES_MachineSearch' => 1, at app/etc/config.php

```
<?php
return array (
  'modules' =>
  array (
    'MES_MachineSearch' => 1,
    'Magento_Store' => 1,
    'Magento_Directory' => 1,
    'Magento_AdvancedPricingImportExport' => 1,
    'Magento_Backend' => 1,
    'Magento_Eav' => 1,
    'Magento_Authorization' => 1,
    'Magento_Backup' => 1,
    'Magento_Theme' => 1,
    'Magento_Customer' => 1,
    'Magento_BundleImportExport' => 1,
    'Magento_CacheInvalidate' => 1,
    'Magento_AdminNotification' => 1,
    'Magento_Indexer' => 1,
    'Magento_CatalogImportExport' => 1,
    'Magento_Cms' => 1,
    'Magento_Rule' => 1,
    'Magento_Catalog' => 1,
    'Magento_Search' => 1,
    'Magento_CatalogUrlRewrite' => 1,
    'Magento_Widget' => 1,
    'Magento_Quote' => 1,
    'Magento_CheckoutAgreements' => 1,
    'Magento_SalesSequence' => 1,
    'Magento_CmsUrlRewrite' => 1,
    'Magento_Config' => 1,
    'Magento_ConfigurableImportExport' => 1,
    ...
  )
)
```

Now run following command

```
php bin/magento setup:upgrade
```

Done.
