

## Multiple Coupons – MAGENTO 1

### USER GUIDE – version 1.0.0

#### 1. Introduction

Multiple Coupons extension allows customers apply multiple coupon codes for one order. Working well with tax functionality, the extension will build a better shopping experience, increase customer loyalty and sales.

By default, Magento does not allow customer to apply more than one coupon per order. It's a problem for merchants, who want to run multiple sales campaigns. Besides, we all know that customers want the best price.

#### 2. Highlight Features

- Allow many coupons to be used in one order
- Display applied coupons on cart and checkout page
- Limit numbers of coupons can be used together
- Able to define unique coupons ( which can't be used with others )
- Compatible with Magento Tax functionality
- Percent and Fixed discount coupons can be used together
- Allow to use multiple coupons on both frontend and backend

#### 3. How to use

- Upload our module package to your Magento root directory then flush cache storage.
- Create and configure coupon codes as you like in Promotion -> Shopping Cart Rules
- Go to Promotion -> Multiple Coupons Configuration to configure the module settings.
- Test again on frontend to make sure the function is working before starting your campaign.
