

AGE VERIFIER

AGE VERIFIER For Magento 2

Overview

Age Verifier extension equip websites to carry out an adult verification check on the visitors. The extension locks the web-store with a Pop-Up screen asking User to verify their age before allowing them to browse the website. Underage users are unable to browse the website, while Users who have given consent of appropriate age could browse the website until the expiration of the pre-set Cookie defined by the Website Administrator. The extension also provides flexibility for the Website Administrator to select pages where Pop-Up is required. The content of the Enter and Exit Pop-Up buttons could be changed and managed from the Magento Back-end system.

Why Age Verifier?

Age Verifier is a much-needed application if you sell items which are restricted for under aged individuals. This includes Cigarettes, Alcohol, Adult content and other items which are age-restricted. Age Verifier App deters an under aged individual from accessing your site.

A customer when lands on your site are asked to verify his age by entering his birth date. He is to declare that he is of legal age to access your site's content and product. By declaring himself of the legal age, the customer can thus access your website and you can safely conduct your business with him.

We have also updated this age verifier app by bringing some new and important features. Introducing new dashboard appearance for products/pages that are also shown separately on other search engine results apart from main website page content.

Similarly many sites pages also feature separately on search engines apart from the main website. They also required to be restricted for under age visitors. The new dashboard feature will make you choose whether to put an age verifier banner on that page or not.

How to setup?

Follow below steps to have this extension setup on your store:

1. Install extension from the Magento Marketplace
