

MexBS Multi Inventory User Guide

Welcome to the MexBs family, and thank you for purchasing the "Multi Inventory" magento extension! In this document we will show you how to use and get the maximum from your extension.

We assume that you've installed your extension using our "MexBS Multi Inventory Installation Guide" and now you are ready to try it out.

Trying out the extension

In this tutorial we will set a **quantity of 200** to "Overnight Duffle" product in the **Main Website** and **quantity of 300** for "Overnight Duffle" product in the **French Website**. (The website names (Main Website/French Website) and the name of the product (Overnight Duffle) are used just for an example purpose).

Step 1: Go to the product backend view

Go to the Admin panel → Products → Catalog, and click "edit" in the line of the "Overnight Duffle" product.

The screenshot shows the Magento Admin Catalog page. The table lists products with columns for ID, Thumbnail, Name, Type, Attribute Set, SKU, Price, Quantity, Visibility, Status, Websites, and Action. The 'Overnight Duffle' product (ID 13) is highlighted, and a red arrow points to its 'Edit' link.

ID	Thumbnail	Name	Type	Attribute Set	SKU	Price	Quantity	Visibility	Status	Websites	Action
12		Driven Backpack	Simple Product	Bag	24-WB03	\$36.00	100.0000	Catalog, Search	Enabled	Main Website, French Website	Edit
13		Overnight Duffle	Simple Product	Bag	24-WB07	\$45.00	100.0000	Catalog, Search	Enabled	Main Website, French Website	Edit
14		Push It Messenger Bag	Simple Product	Bag	24-WB08	\$45.00	100.0000	Catalog, Search	Enabled	Main Website, French Website	Edit

Step 2: Setting a quantity of 200 for "Overnight Duffle" in the "Main Website"

Inside the product view, switch to any store view of "Main Website". In our case we will switch to "Default Store View"

Now that you switched to “Default Store View”, click on the “Advanced Inventory” link. In the pop up that has opened up, you should see the following –

Since we don’t want to inherit the default quantity, choose “No” in “Use Default Values”. The following fields should show up –

Insert “200” into the “Qty” field. Click “Done” and save the product.

Step 3: setting quantity of 300 for “Overnight Duffle” in “French Website”

Inside the product view, switch to any store view of “French Website”. In our case we switch to “French Store View”.

Now that you switched to “French Store View”, click on the “Advanced Inventory” link. In the pop up that has opened up, you should see the following –

Since we don’t want to inherit the default quantity, choose “No” in “Use Default Values”. The following fields should show up –

Advanced Inventory

Done

Use Default Values [website] No

Manage Stock [website] Yes

Use Config Settings

Qty [website] 100

Out-of-Stock Threshold [website] 6

Use Config Settings

Minimum Qty Allowed in Shopping 1

Insert “300” into the “Qty” field. Click “Done” and save the product.

You are done!!!

Now if you will buy the “Overnight Duffle” in the “Main Website”, its quantity will decrease to 199. And if you will buy it in the “French Website” its quantity will decrease to 299.

Other Inventory Fields

Not only is the quantity field now manageable per website. All of the other inventory fields that are available in the “Advanced Inventory” popup are manageable per website as well.

Inheriting From Default

When “Use Default Values” is set to “Yes” inside the “Advanced Inventory” popup, the code will use the inventory values that are set in the default level.

Get Support!

We are here and we will do our best to help. Contact us on support@mexbs.com and we will get back to you ASAP with help!

Free software updates

From time to time we are going to release some cool updates for your extension. And you will get those updates for free! Currently we are working on upgrading our website, in order to make the software updates appear directly in your customer account. But for now, you will get the software updates by email on demand (because we don’t want to spam you), or every time there is new release (if it’s ok for you to be

spammed by good software ;)).

Don't forget to send your feedback!

Every feedback is good for us! Please send us your feedback to support@mexbs.com or write it directly in the reviews section on the product page. It will be a pleasure for us to hear your opinion!

Enjoy your extension!

MexBS Team
