

- Create directory name **MGS** at **your_magento_root/app/code/**
- Unzip file you have downloaded and you can see some files and folders: Block, Controller, data, etc, Helper...
- Copy them to **your_magento_root/app/code/MGS/Acm**

Now structure of folders will be:

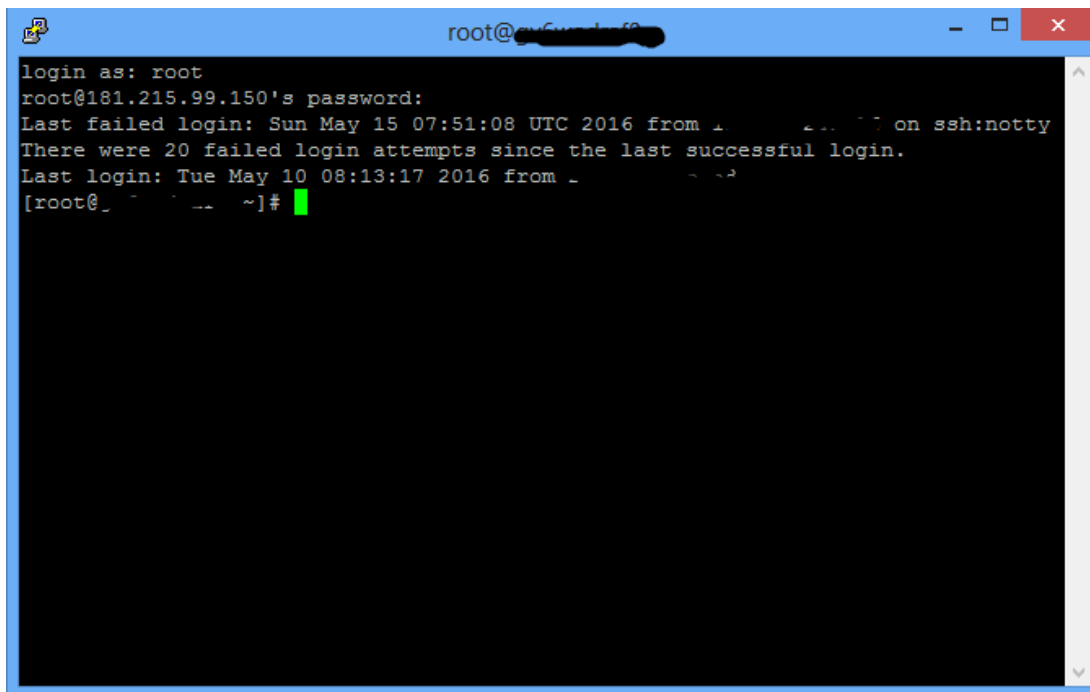

your_magento_root/app/code/MGS/Acm/Block

your_magento_root/app/code/MGS/Controller

your_magento_root/app/code/MGS/data

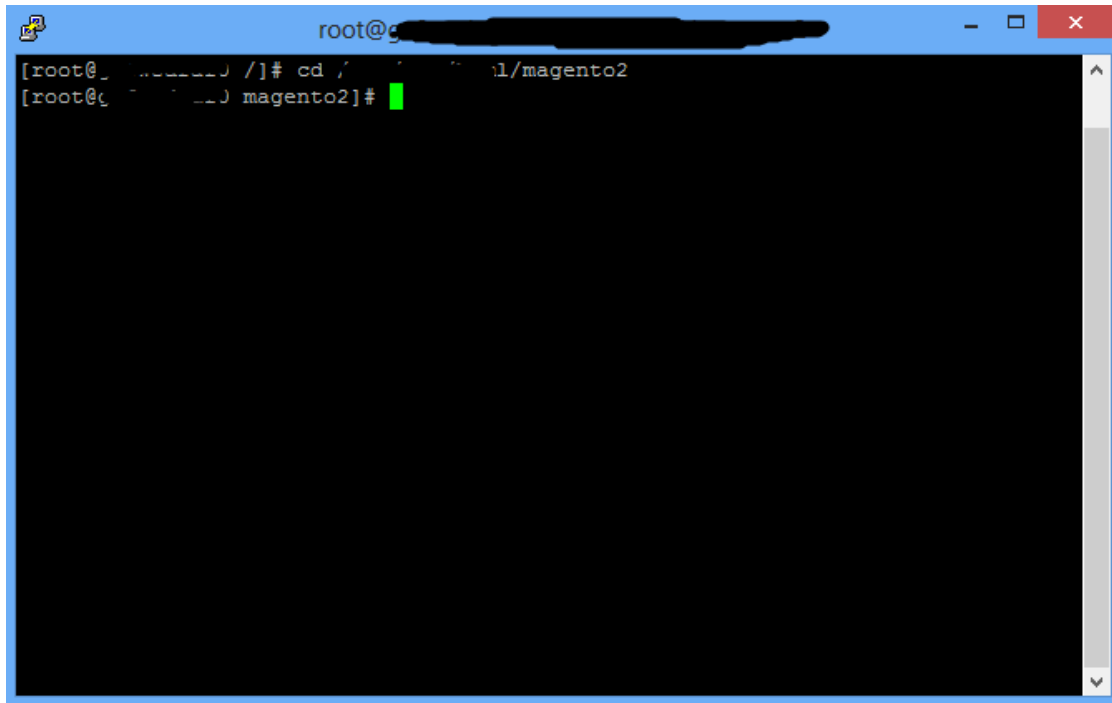

...

- Login to SSH root account

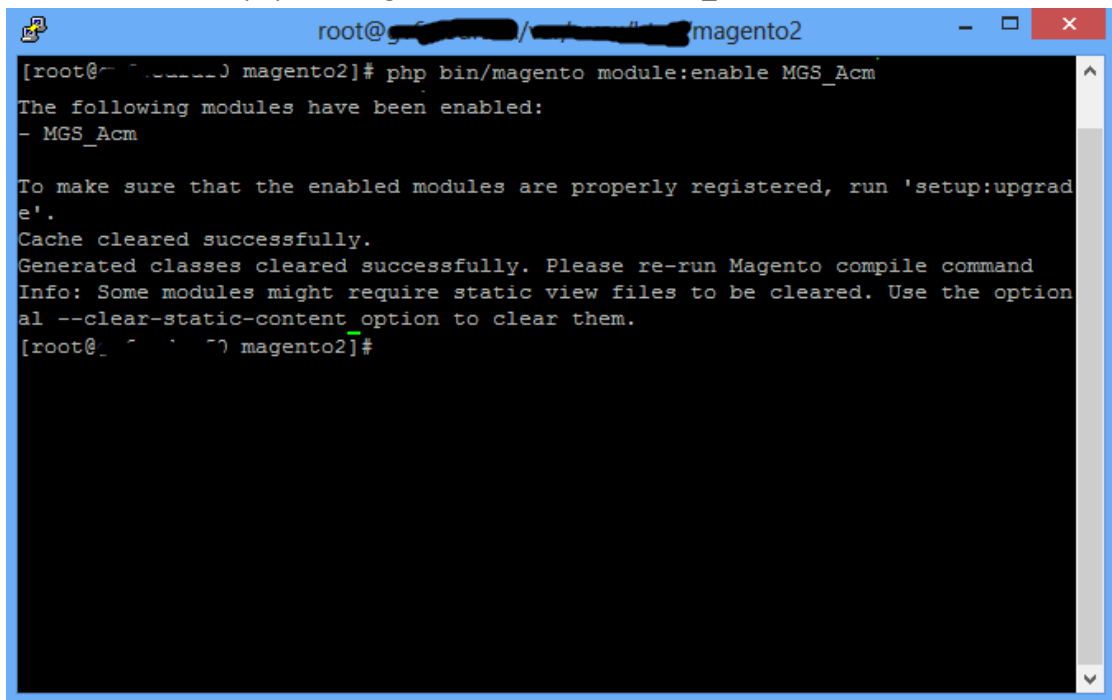

```
root@...  
login as: root  
root@181.215.99.150's password:  
Last failed login: Sun May 15 07:51:08 UTC 2016 from ... on ssh:notty  
There were 20 failed login attempts since the last successful login.  
Last login: Tue May 10 08:13:17 2016 from ...  
[root@_ ... ~]#
```

- Move to your Magento root folder

```
root@g... [root@... /]# cd /.../magento2
[root@... magento2]#
```

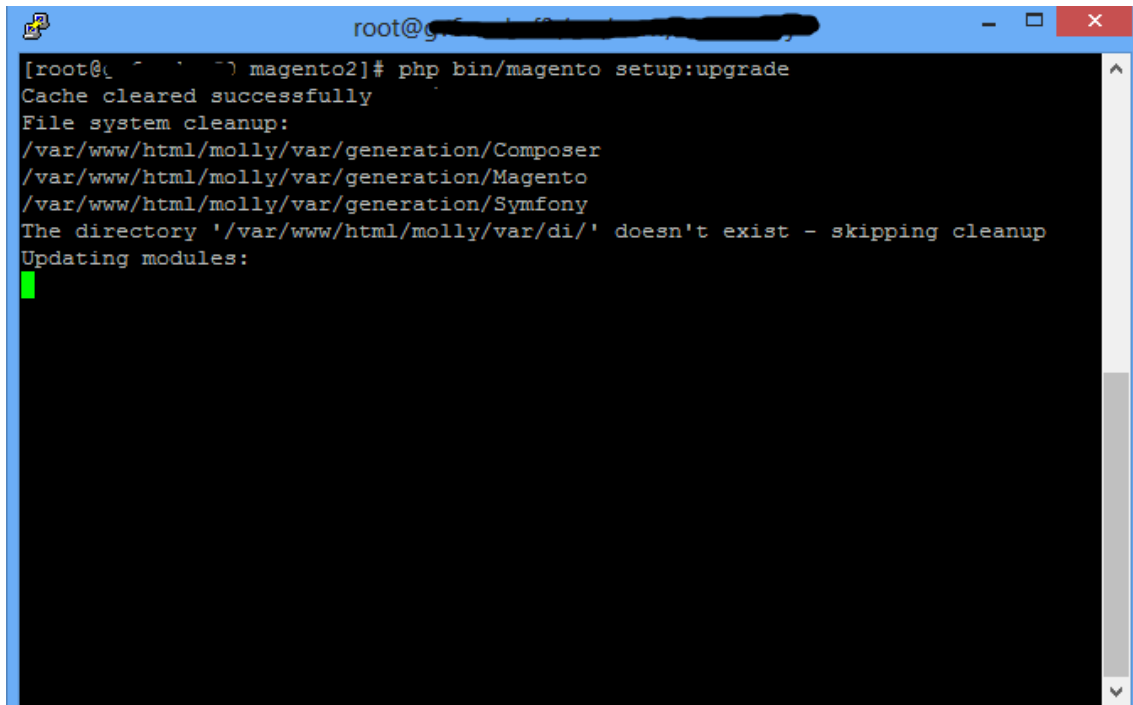

- Run command line: `php bin/magento module:enable MGS_Acm`

```
root@g.../.../magento2
[root@... magento2]# php bin/magento module:enable MGS_Acm
The following modules have been enabled:
- MGS_Acm

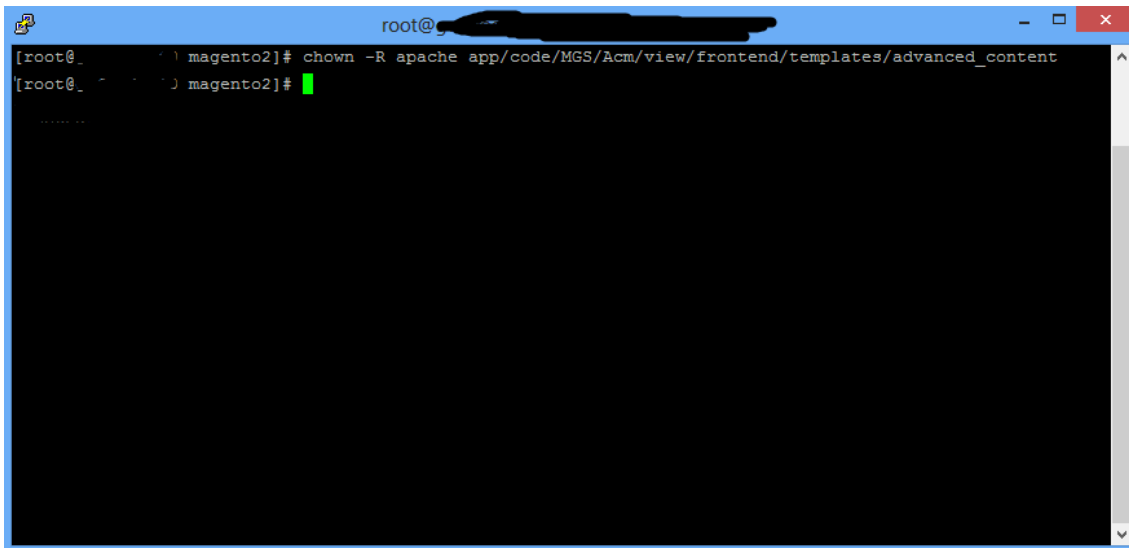

To make sure that the enabled modules are properly registered, run 'setup:upgrade'.
Cache cleared successfully.
Generated classes cleared successfully. Please re-run Magento compile command
Info: Some modules might require static view files to be cleared. Use the optional --clear-static-content option to clear them.
[root@... magento2]#
```

- Run command line: `php bin/magento setup:upgrade`

```
root@... magento2]# php bin/magento setup:upgrade
Cache cleared successfully
File system cleanup:
/var/www/html/molly/var/generation/Composer
/var/www/html/molly/var/generation/Magento
/var/www/html/molly/var/generation/Symfony
The directory '/var/www/html/molly/var/di/' doesn't exist - skipping cleanup
Updating modules:
```

- Set permission for apache group allow write to folder `app/code/MGS/Acm/view/frontend/templates/advanced_content` (`chown -R apache app/code/MGS/Acm/view/frontend/templates/advanced_content`)

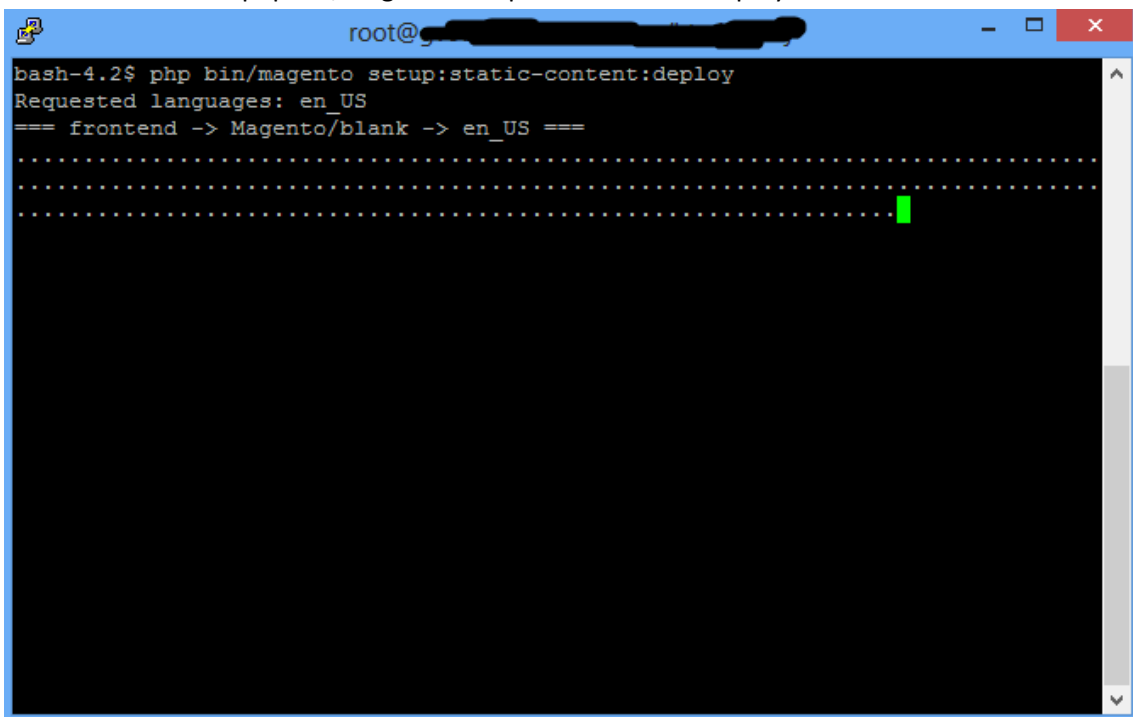

```
root@... magento2]# chown -R apache app/code/MGS/Acm/view/frontend/templates/advanced_content
root@... magento2]#
```

(depending on the server, this command may different)

- remove `var/cache` (`rm -rf var/cache`)
- remove `var/composer_home` (`rm -rf var/composer`)
- remove `var/generation` (`rm -rf var/generation`)
- remove `var/page_cache` (`rm -rf var/page_cache`)
- remove `var/view_preprocessed` (`rm -rf var/view_preprocessed`)

- remove pub/static (rm -rf pub/static)
- switch to apache user
- Run command line: php bin/magento setup:static-content:deploy

```
root@j...  
bash-4.2$ php bin/magento setup:static-content:deploy  
Requested languages: en_US  
=== frontend -> Magento/blank -> en_US ===  
.....  
.....  
.....
```
