Support: sales@m-integration.com

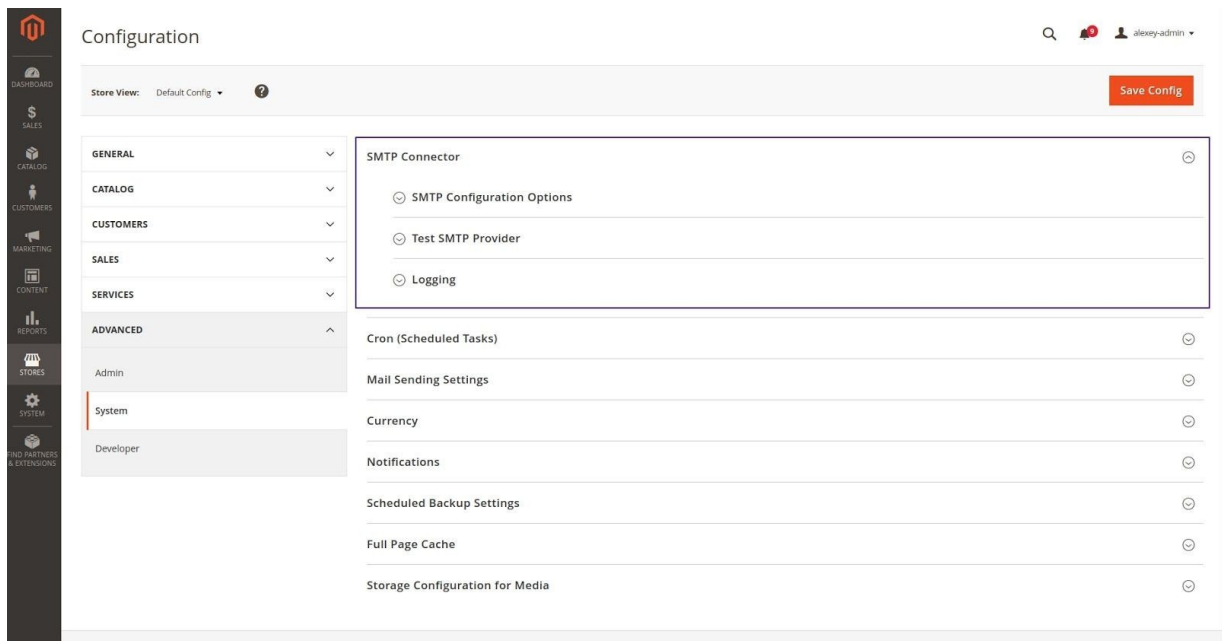

Install with Magento 2 Component Manager

If you purchased our extension on the Magento Marketplace, you can install the extension with the Component Manager. The installation process for this extension similar to any other extensions on the Magento Marketplace.

Using of extension:

In order to utilize an extension, you need to go by path

Stores->Configuration->Advanced->System->SMTP Settings

After enabling extension you have two providers Gmail and Amazon SES. They have ready-made configuration like protocol, host, port etc. These fields are pre-populated, but you can change their values if necessary. Option “Custom SMTP provider” stands for creating custom provider with custom configuration. It is useful when provider is not listed through the available options.

On the screenshot below as an example we choose Gmail and all needed configuration will be fetched. All we need is to set username and password for your Gmail account.

SMTP Connector ⌵

⌵ SMTP Configuration Options

Enable SMTP [store view] Yes ▼

SMTP Provider [store view] - Choose SMTP Provider - ▼
This will automatically load SMTP settings.

Host [store view] smtp.gmail.com

Authentication [store view] Login ▼

Port [store view] 465
Default ports: 25, 465, or 587. Port 465 (SSL required), Port 587 (TLS required).

Protocol [store view] SSL ▼

Username [store view] yourmail@gmail.com

Password [store view]

After setting all fields we need to save it. You can test your provider by sending a test mail. Enter email you want to send to and click "Send Mail" button. After a few seconds you will get a message with status of your test.

Emails Log Lifetime
[store view]
In days.

All logs you can see in grid table by this path System->Logging->Emails.

The screenshot shows the Magento Admin interface for the 'Emails Log' section. On the left is a vertical sidebar with navigation icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stores, System, and Read Partners & Extensions. The main content area is titled 'Emails Log' and includes a search bar, a 'Filters' button, a 'Default View' dropdown, and a 'Columns' dropdown. Below this, it indicates '8 records found' and shows a pagination control set to '20 per page' on page '1 of 1'. The central part of the interface is a grid table with the following data:

| ID | From | To | Subject | Created at | Status |
|----|---------------------|------------------------|-----------------------------------|---------------------|---------|
| 13 | owner@example.com | customermail@gmail.com | Newsletter subscription success | 2018-02-08 10:00:20 | Success |
