

Mirakl Seller Connector for Magento 2

Compatibility

Magento 2 Seller Connector is successfully tested on the following Magento versions:

- Magento Open Source 2.2 to 2.3
- Magento Commerce 2.2 to 2.3

Installation

There is different ways to install the Mirakl connector for Magento 2. Please use one of the following method according to your needs.

Method 1: Installation with Composer

Installing the connector

We advise you to backup your Magento folder and your database before installing the connector.

```
composer require mirakl/connector-magento2-seller
php bin/magento module:enable MiraklSeller_Api MiraklSeller_Core
MiraklSeller_Process MiraklSeller_Sales
php bin/magento setup:upgrade
php bin/magento cache:clean
```

Updating the connector

```
composer update
php bin/magento setup:upgrade
php bin/magento cache:clean
```

Removing the connector

```
php bin/magento module:disable MiraklSeller_Api MiraklSeller_Core
MiraklSeller_Process MiraklSeller_Sales
php bin/magento setup:upgrade
```

```
php bin/magento cache:clean  
composer remove mirakl/connector-magento2-seller
```

Method 2: Installation with Magento 2 Extension Manager

Purchasing the connector (free)

You must purchase the connector in the [Magento Marketplace](#) and then use the extension manager to install it.

Warning: You cannot download the connector and install it directly, it will not work since the connector is designed as a Magento 2 metapackage. More information about metapackages here: https://devdocs.magento.com/guides/v2.3/extension-dev-guide/package/package_module.html#package-metapackage

Please refer to the following documentation to learn more about the extension manager: <https://devdocs.magento.com/guides/v2.3/comp-mgr/extendsman/extendsman-main-pg.html>

Note: Due to some Magento configuration, it may happen that this installation does not work. We advise you then to install the connector using Composer as described above.
