Magento 2 Seller Connector

Prerequisites to use the Magento 2 Seller Connector

You must already be onboarded on a Mirakl Marketplace and have a Mirakl seller account to benefit from the Magento 2 Seller Connector.

What is the Magento 2 Seller Connector?

The Magento 2 Seller Connector is a plug-in that allows you to sell your products from Magento on an Marketplace powered by Mirakl.

Why use the Magento 2 Seller Connector?

The Magento 2 Seller Connector enables you to seamlessly integrate your products to any Mirakl Marketplaces. It also enables you to enrich the management of the Marketplace orders that are placed to your store.

It includes the following capabilities:

- connect to multiple Mirakl Marketplaces
- create listings and export products to the operator catalog
- update product Price & Stock (offers) in the operator catalog
- manage and import your Mirakl Marketplace orders
- automate your workflow with cron jobs
- select the connector interface language: French or English

Online documentation access

The complete documentation for the Magento 2 Seller Connector is available online only.

To access the documentation you must:

- already be onboarded on a Mirakl Marketplace
- have a Mirakl seller account

To access the online documentation from your Mirakl back office, go to **Help > Connectors and API integration > Magento 2 Seller Connector**.
