Database	MySQL 5.x

1.2. Installation instructions

1) Login into your magento admin panel and **Go to system -> Tools -> Compilation** and make sure it says Compiler status: Disabled. If it is not, then disable it.

2) Below is the **structure of magento** root at left side and extension package at right side.

3) Upload all extension files from extension package to Magento source in the same way as the file-structure. NOTE: JavaScript libs may already be present in default Magento installation. The upload of these libs may be skipped if they are identical (i.e. same version).

4) Now **Go to Admin Panel -> System -> Cache Management page** and click on “Flush Cache Storage” button. After this step, extension is installed.

5) To re-enable the compilation, please **go to System -> Tools -> Compilation** and click “Run Compilation Process” button. (Optional)

6) Now logout from Magento admin panel and login again for refresh all the Magento permissions.

7) Now go to **System -> Configuration**. On the left side, click on Sales->Payment Methods.

8) Mobysign Payment is shown as one of the Payment Methods.
