Before You Begin

Sign Up at <https://moceanapi.com/> and try for free now.

MoceanAPI had a goal to be a premier provider for mobile messaging solutions. With a team of people with vast experience in the industry we started off our humble journey. We empower you with the ability to engage people with cloud communications.

Installation Steps

1. Go to the command line, navigate to the site root directory.

```
c:\xampp\htdocs\magento>
```

2. Download the package using the command below which includes extension name and version.

Composer require moceanapi:1.0.0

3. Input command below to enable the extension and clear static view files.

php bin/magento module:enable moceanapi --clear-static-content

4. Input command below to register the extension

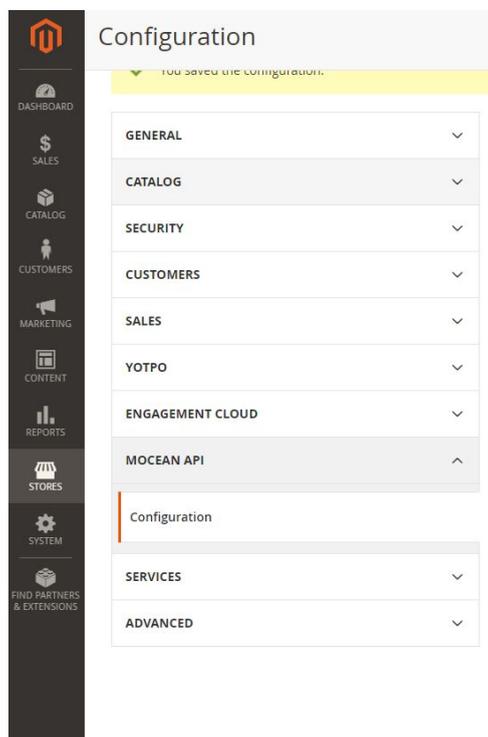

php bin/magento setup:upgrade

5. Input command below to clean the cache

php bin/magento cache:clean

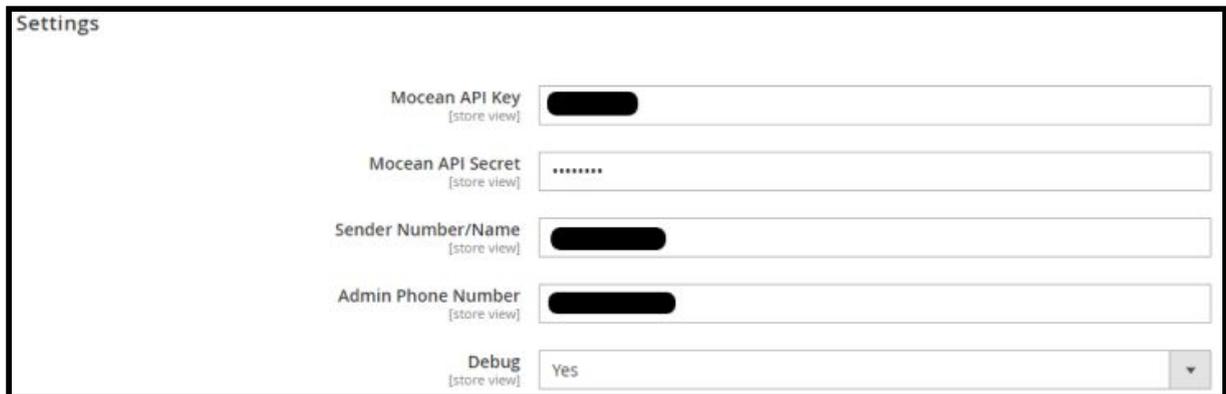

6. Configure the extension in Admin as needed

- Navigate to Admin Panel => Stores => Configuration => MoceanAPI to configure the Mocean API credentials and message settings.

Configuration

Settings

The screenshot shows a settings interface with the following fields:

- Mocean API Key** [store view]: A text input field containing a blacked-out value.
- Mocean API Secret** [store view]: A text input field containing seven asterisks.
- Sender Number/Name** [store view]: A text input field containing a blacked-out value.
- Admin Phone Number** [store view]: A text input field containing a blacked-out value.
- Debug** [store view]: A dropdown menu currently set to "Yes".

1. Mocean API Key

- Get API Key from Dashboard after sign-in to <https://moceanapi.com/> .

2. Mocean API Secret

- Get API Secret from Dashboard after sign-in to <https://moceanapi.com/>.

3. Sender Number / Name

- Name or Number for the SMS sent / SMS sent from Who

4. Admin Phone Number

- Notification for the admin will send to the number. For example, when a new order is placed, the system will send a notification to the admin for preparing the order items.

5. Debug

- If this set to 'Yes', all API calls will be logged

Messages

Send SMS to admin on New Order [store view] Yes

New Order Notification Message [store view]
Hi, You receive a new order, Please start prepare your order as soon as possible.
Order: {ORDER-NUMBER}, Status = {ORDER-STATUS}
Customer is {CUSTOMER-NAME}, Email = {CUSTOMER-EMAIL}.

The following variables can be mixed with your message: {ORDER-NUMBER},{ORDER-TOTAL},
{ORDER-STATUS},{CARRIER-NAME},{PAYMENT-NAME},{CUSTOMER-NAME}, and {CUSTOMER-EMAIL}

Send SMS to customer on status change to SHIPPED [store view] Yes

Status Change Notification Message [store view]
Hi, Thank You for purchased.
Your order: {ORDER-NUMBER} is {ORDER-STATUS} by Carrier [{CARRIER-NAME}].

The following variables can be mixed with your message: {ORDER-NUMBER},{ORDER-TOTAL},
{ORDER-STATUS},{CARRIER-NAME},{PAYMENT-NAME},{CUSTOMER-NAME}, and {CUSTOMER-EMAIL}

1. Send SMS to admin on New Order

- If No, field for [New Order Notification Message] will not display.
- If Yes, the field for [New Order Notification Message] will display and the admin will get the SMS notification when a new order is placed.

2. New Order Notification Message

- Owner can input the message that he/she wants to send to the admin when a new order is placed. E.g. Owner can inform the admin to start preparing order items based on the new order number.

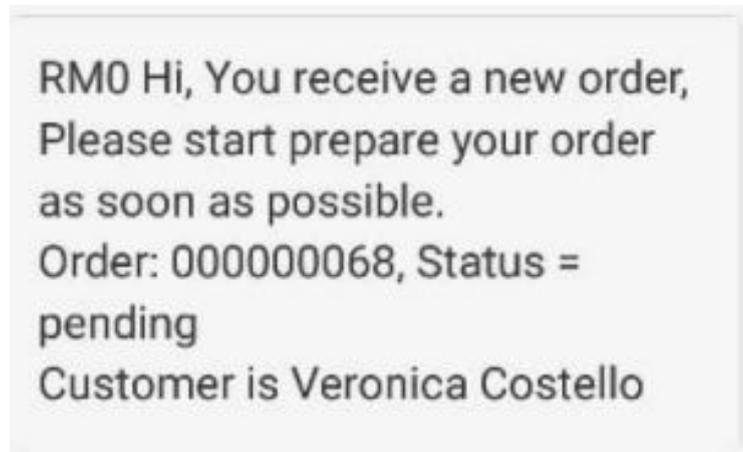

3. Send SMS to customer on status change to SHIPPED

- If No, field for [Status Change Notification Message] will not display.
- If Yes, the field for [Status Change Notification Message] will display and the customer will get the SMS notification when the order status is changed.

4. Status Change Notification Message

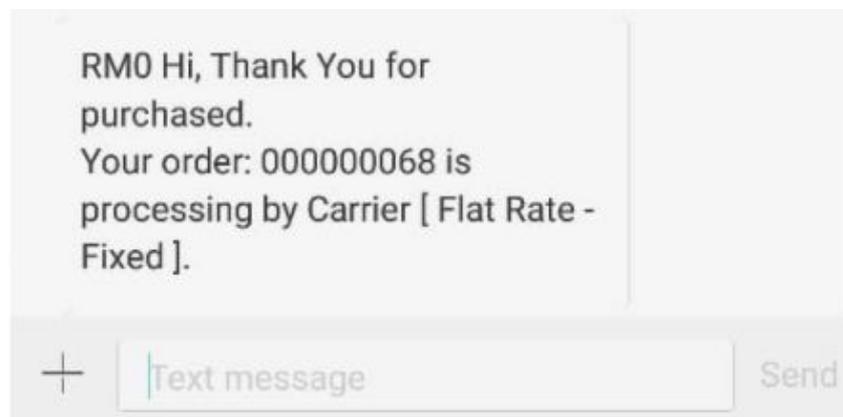

- Owner can create a message template when the system detects the order status is changed. E.g. Customers will get SMS notifications when orders are shipped or canceled.
