

#### Description:-

Now integrate Australia Post with your store using Australia Post Shipping module. Works for domestic & international shipping.

#### Functionalities:-

1. The module will provide the functionality to use Australia post shipping methods in store.
2. The module provide domestic and international Australia post rates
3. Once the user will select the country and put the destination zip code to estimate shipping cost , if the cart items weight and size is as per Australia post limits , it will show the list of shipping methods those are enabled by admin from back end.
4. If the cart items total weight and size exceeds the Australia posts limits, the extension will not display any method.

#### Installation Process:-

1. Disable the compilation
2. Copy and upload the app directory to your server root.
3. Connect to your server using ssh.
4. Run the magento store upgrade command - bin/magento setup:upgrade
5. Run the magento store upgrade command - bin/magento setup:static-content:deploy -f
6. Clear the system cache.
7. Go to Admin Stores > Configuration > Aupost Settings put the extension key provided by <http://magento.ocodewire.com>
8. Then Got to Stores > Configuration > Sales > Shipping Methods > Australian Post Settings

The screenshot displays the 'Australia Post Shipping Method Setting' configuration page. On the left is a sidebar with navigation icons and labels such as 'DASHBOARD', 'AUPOST SETTING', 'CATALOG', 'CUSTOMERS', 'YEAR MAKE MODEL', 'OCODEWIRE SOCIALSTREAM', 'OCODEWIRE PRICEBARGAIN', 'OCODEWIRE DAILYDEAL', 'SALES', 'REPORTS', 'STORES', 'SYSTEM', 'FIND PARTNERS & EXTENSIONS', 'OCODE T', and 'OCODE WIRE KEDDNER'. The main content area has a header 'Australia Post Shipping Method Setting' and a 'Save Config' button. Below the header, there are several configuration fields: 'Enabled' (Yes), 'Name' (Aupost Shipping), 'Title' (Australian Post Shipping), 'Api Key' (03300de2-b166-4379-a48f-ef524146cda4), and 'Warehouse Postcode' (3251). There are also sections for 'Enable Domestic services for Parcel' and 'Enable International services for Parcel' with dropdown menus for selecting shipping methods.

9. Put the warehouse postal code, the Australian post developer extension key, if you don't have, get it by clicking here link under Api Key field.

10. Then Select the methods you want to enable and the methods you want to disable.

Note:-

1. API Key: Visit the Australia Post site i.e <http://auspost.com.au/> and here, contact the support team for the API key.
2. For Domestic Shipping Service: Add the length, width, height, & weight of the products.
3. Here, weight is in Kilogram(Kg), not in Gram(Gm).
4. Weight of the parcel, not more than 25 Kg.
5. Check the link for more information about eParcel terms & conditions <http://auspost.com.au/business-solutions/eparcel.html>

General Admin configuration:-

1. To set the following configuration of the extension, Go to Admin Stores > Configuration > Aupost Settings put the extension key.

2. Enabled: Enable/disable extension

3. Title/Name: Name of the Shipping method which is display during select shipping method

4. Api Key: Add aupost api key to connect with aupost

5. Warehouse Postcode: Enter warehouse postcode

6. Enable Domestic services for Parcel: Select domestic service for domestic customers

7. Enable International services for Parcel: Select International service for International customers
