

## Magento2 module configuration guide

## 1. CREATE OCT8NE ACCOUNT

Go to <https://secure.oct8ne.com/signup> and create an account.

### Start using Oct8ne in 5 minutes!

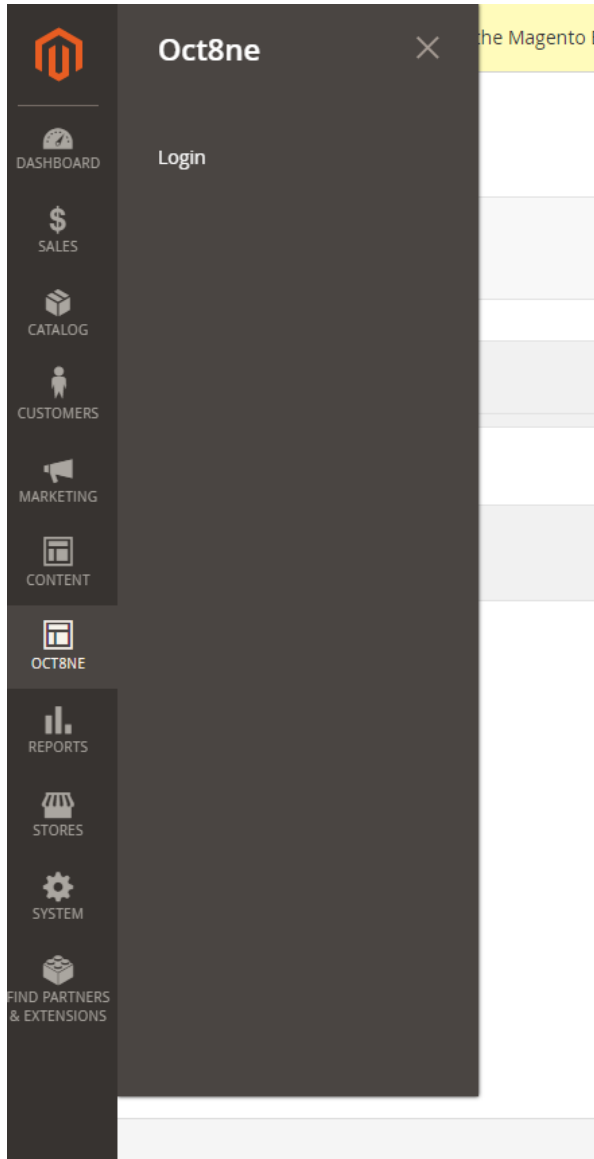

Try our Pro version for free during 14 days.  
We won't ask for your credit card details!

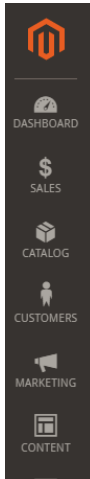

By creating an account you agree to [Legal Notice](#) and [Privacy Policy](#).

## 2. CONFIGURE THE OCT8NE MODULE

Once you have installed the oct8ne module in your Magento2, open the Oct8ne option in the left menu, and select the Login option:

On the oct8ne configuration page, fill in the form with your oct8ne credentials created before:

## Oct8ne configuration

From this section a general linkup (Login / Logout) will be made for your Magento installation (except for exclusions).  
To make a specific linkup (Login / Logout) for a store, access **Stores > Configuration** and select your store view.  
In most cases the linkup is general, so it will not be necessary to select any exclusion or access Stores> Configuration

Oct8ne username [user]

Oct8ne password [pass]

[Login in Oct8ne](#)

Exclusions [store views]  Default Store View

### 3. CHECK THAT THE OCT8NE CHAT IS VISIBLE ON YOUR WEBSITE
