

# Round Prices Cut extension for Magento 2

## User Guide

### Description

The Round Prices Cut extension for Magento 2 allows removing the `00` decimal part of prices.

For example, `$99.00` will become `$99` while `$99.50` will remain unchanged.

You can choose to enable this feature on front and/or admin area.

### Usage

#### Features

- Before enabling the rounding feature, a round price looks like :

### Configurations

This module comes with two configurations:

- Stores > Configuration > Catalog > Catalog > Price > Enable round prices cut on front ( store view scope)
- Stores > Configuration > Catalog > Catalog > Price > Enable round prices cut on admin ( global scope)

#### Price

Catalog Price Scope <small>[global]</small>	Global	▼
This defines the base currency scope ("Currency Setup" > "Currency Options" > "Base Currency").		
Enable round prices cut on front <small>[store view]</small>	Yes	▼
Enable round prices cut on admin <small>[global]</small>	Yes	▼

These configurations allows you to enable / disable round prices cutting feature on front and / or in admin areas.
