## Quick View for Magento Installation Guide

### Installation

1. First of all, back up your store database and web directory. It is wise to perform this procedure before any installation.
2. On your back end, go to **System** → **Magento Connect** → **Magento Connect Manager** and log in to Magento Connect Manager with administrator credentials.
3. Under “Direct package file upload” section, browse for package file and hit “Upload”.

The screenshot shows the Magento Connect Manager interface. The 'Direct package file upload' section is highlighted with a red border. It contains the following elements:

- Step 1: Download or build package file.
- Step 2: Upload package file. A red arrow points to the 'Browse...' button, and another red arrow points to the 'Upload' button.

Other visible sections include 'Settings' (with a checked box for 'Put store on the maintenance mode while installing/upgrading/backup creation' and a dropdown for 'Create Backup' set to 'Database'), 'Install New Extensions' (with a search field and an 'Install' button), and 'Manage Existing Extensions' (with a 'Check for Upgrades' button). The channel is set to 'Magento Community Edition' and there is a 'Commit Changes' button. A checkbox at the bottom right is labeled 'Clear all sessions after successful install or upgrade:

4. Return to website back end, log out and then log in again.
5. Flush Magento Cache under **System** → **Cache Management**.
6. Congratulations! You are now ready to use Quick View on your site.
